SAFE HARBOR PROVISIONS FOR FORWARD-LOOKING STATEMENTS:

Statements made during this presentation, the proxy statements filed with the Securities and Exchange Commission ("Commission"), communications to shareholders, press releases and oral statements made by our representatives that are not historical in nature, or that state our or management's intentions, hopes, beliefs, expectations or predictions of the future, may constitute "forward-looking statements" within the meaning of Section 21E of the Securities and Exchange Act of 1934, as amended. Forward-looking statements can often be identified by the use of forward-looking terminology, such as "could," "should," "will," "will be," "will lead," "will assist," "intended," "continue," "believe," "may," "expect," "hope," "anticipate," "goal," "forecast," "plan," or "estimate" or variations thereof or similar expressions. Forward-looking statements are not guarantees of future performance.

Forward-looking statements involve risks, uncertainties and assumptions. It is important to note that any such performance and actual results, financial condition or business, could differ materially from those expressed in such forward-looking statements. Factors that could cause or contribute to such differences include, but are not limited to, the risk factors discussed under "Risk Factors" in our Annual Report on Form 10-K for fiscal year ended March 31, 2008, as well as factors discussed elsewhere in other reports and documents we file with the Commission. Other unforeseen factors not identified herein could also have such an effect. We undertake no obligation to update or revise forward-looking statements to reflect changed assumptions, the occurrence of unanticipated events or changes in future operating results, financial condition or business over time unless required by law. Interested persons are urged to review the risks described under "Risk Factors" and in "Management's Discussion and Analysis of Financial Condition and Results of Operations" in our Annual Report on Form 10-K for fiscal year ended March 31, 2008, as well as in our other public disclosures and filings with the Commission.

Quality Systems, Inc. : Company Overview

- Quality Systems and its NextGen Healthcare Information Systems subsidiary develop and provide a broad range of computer-based business applications for U.S. medical and dental groups practices. These include practice management, patient medical records, revenue cycle management and e-business applications.
  - Revenue primarily derived from physician group businesses that utilize the company's high functionality practice management suites
  - Focused is on growing organically with a strong emphasis on reinvestment in new product and service development initiatives
  - Acquisitions of complimentary business lines also contribute to growth

ARRA Healthcare Information Technology Finances

- **$2B** for HIT infrastructure, especially HIE
- **$17.2B** Medicare/Medicaid incentives to doctors and hospitals for "meaningful" use of *certified* HIT (net $ after government projected savings)
- **$4.7B** for the National Telecommunications and Information Administration's Broadband Technology Opportunities Program
- **$2.5B** for the U.S. Department of Agriculture's Distance Learning, Telemedicine, and Broadband Program
- **$1.1B** for comparative effectiveness grants from AHRQ, NIH, and HHS - does automation improve care

HITECH Finances

- $2B for the community health centers through the Health Resources and Services Administration
- $500M for the Social Security Administration
- $85M for the Indian Health Service
- $50M for the Veterans Benefits Administration
- Assorted “pockets” of HIT funding in state and community funding allotments

$30.1B IN TOTAL (not counting local funding)

(Note: there is actually another $20 billion for Medicare Incentives before government calculations for savings. The real total for HIT is about $50 billion.)

ARRA Update

- Federal government has released first of two of ARRA grant programs - $850 million was due June 2 and will be awarded July 1, and $200 million already awarded. HIT grant awards can go as high as $2.5 million from a "competitively selective" application process.
- Regional IT Extension Center Program out for public comment
- Comparative Effectiveness and Connectivity Programs to follow shortly

Incentives Development Schedule *(approximate dates)*

- June 16 - ONC releases details on meaningful use
- August 26 - HIT Policy Committee recommends certification body
- September 15 - 2009/2010 certification process begins

Development Schedule (con't.)

- December 31 - ONC finalizes meaningful use definitions
- January 1, 2010 - Federally Approved State HIT plan can be implemented
- April 15, 2011 - 2012 certification process commences
- January 1, 2011- Medicare incentive period commences

Financial Highlights

Fiscal year ended March 31,	2009	2008	2007	2006	2005
