Founded: 1973
Date Public: 1997
Employees: ~ 3,231

NASDAQ: PWER

Revenue
FY2012: $1.02 billion
FY2011: $1.02 billion
FY2010: $1.05 billion
FY2009: $432 million
FY2008: $537 million

Total Assets (FY2012)
$799 million

Revenue by Geography (2012)
Asia/Pacific: 15%
Europe/Middle East/Africa: 69%
North America: 16%

Manufacturing and R&D Sites
China (Power & RE)
Italy (RE)
Ontario, Canada (RE)
Phoenix, AZ (RE)
Slovakia (Power)

Power-One's products enable the industry's highest yielding conversion of power from solar arrays for use by utilities, commercial enterprises and homes. Power-One has a 40 year history as the leader in high efficiency and high density power supply products for a variety of industries including Renewable Energy, Servers Storage & Networking, Industrial and Network Power Systems.

Technology Innovator | **Strong Operational Infrastructure** | **Positioned for Growth**

POWER-ONE AT A GLANCE

Power-One develops and manufactures innovative power conversion technology and products to excel in high-growth and long-term markets. In 2010, it created two strategic business units, Power Solutions and Renewable Energy Solutions, to align the company with its end markets and improve customer service and response. Power-One's management team possesses an extensive and positive track record in the renewable energy and power businesses, driving the growth and profitability of the company.

Power-One has expanded its global footprint, hosting manufacturing, sales, service, and design in Asia, Europe, and North America. As a leading global supplier of photovoltaic inverters, it has established a strong presence in Europe while expanding into the rapidly growing Asian and North American markets. To serve the new and existing geographies, new manufacturing and R&D facilities were opened in Shenzhen, China and Phoenix, AZ. The company continues to build out its sales and service locations throughout the globe. In the fiscal year ending December 30, 2012, Power-One recorded revenue of $1.0 billion and recorded EBITDA of $120 million.

A 40-YEAR HISTORY OF INNOVATION

Power-One has a long history of designing and introducing market-leading products in power conversion. These technologies range from innovative products for the renewable energy industry, to high-efficiency DC-DC and digital power conversion for industries that include servers, storage and networking, among others. We launched our first renewable energy products in 2006 and continue to bring new products to market. Power-One holds 180 active patents. Our evolution into a tier-one, world-class global supplier has been facilitated by a complement of strategies and milestones, including our goals to:

- Support global customers and local markets with strategically-located manufacturing and R&D facilities.
- Consistently invest in R&D to provide industry-leading energy efficiencies and breakthrough solutions, such as our digital power technology.
- History of key acquisitions, including Fat Spaniel in 2010, which enables customers to control and manage their renewable energy assets.
- Continually improve the key attributes required to grow our business with strategic customers and distributors.
- Pursue fast-growth markets: digital power, Platinum technology, and alternative energy.

Why Power-One Wins

- Industry-leading yield
- Competitive pricing
- Innovative new designs
- Service responsiveness
- Global operations and support
- Strong balance sheet

MANAGEMENT

Chief Executive Officer

OUR BUSINESSES

With a long history of innovating new products and technologies for the power conversion and power management markets, Power-One brings a unique expertise to its industry-leading renewable energy and power solutions products. It possesses extensive research and development history, manufacturing capability, management prowess and strong industry relationships. To that end, its renewable energy products provide industry-leading yields, based on reliability, uptime and energy harvesting. Further, its power conversion products have reached platinum level efficiency (94+%) and it owns the court-affirmed capstone patent in digital power conversion.

RENEWABLE ENERGY SOLUTIONS: INNOVATING TO LEAD

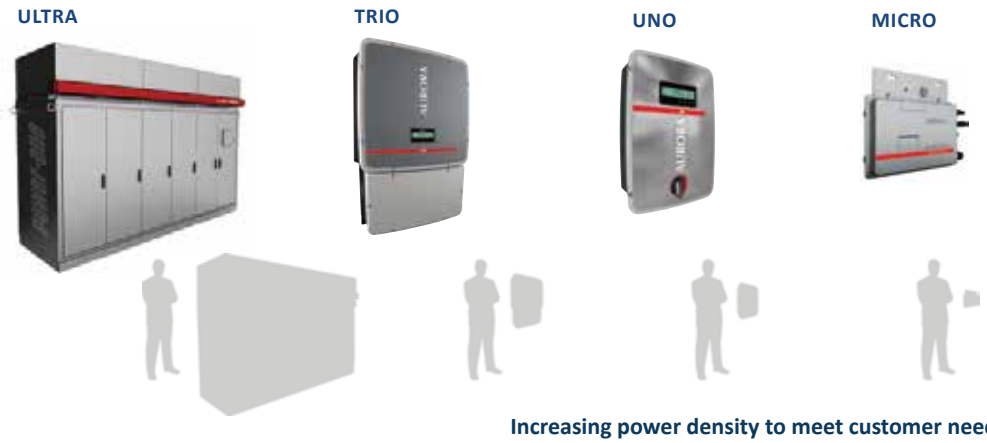
Technology Innovator
- 3-Phase string inverters
- Expanding product line
- Superior energy harvesting

R&D & Production
- Regional R&D centers
- Recently opened China and NA factories

Growing market share
- World's #2 PV inverter vendor
- Shipped 3.6 GW in FY2012
- Expanding into new regions

Launched Global Services
- Renewable Energy Systems management software
- Repair & Maintenance Centers
- Extended Warranty/Services

POWER-ONE RE PRODUCTS YIELD CUSTOMERS THE LOWEST TCO



Increasing power density to meet customer needs
