Constellation Energy Enters Ohio Residential Electric Market with 100 Percent Green Energy Offer to 2 Million Homeowners and Renters

Clean Energy Offer Available Through Easy Web Signup

BALTIMORE--(BUSINESS WIRE)-- Constellation Energy (NYSE:CEG), one of the nation's leading competitive electricity suppliers, today announced it is offering 2 million Ohio residential electric customers the opportunity to use 100 percent green energy in their home.

The Constellation Energy offer gives homeowners and renters in the service territories of Cleveland Electric Illuminating, Ohio Edison and Toledo Edison the option to power their homes with clean, renewable energy sources at a fixed rate for 12 months.

"We recognize the growing demand for green energy in all sectors and are pleased to offer more than 2 million Ohioans price-protected, 100 percent green energy for their home," said Kenny Matula, Constellation's senior vice president for residential markets. The easy web signup for the green energy offer is available at home.constellation.com.

"As a market leader nationwide, we are the logical choice for Ohio residential electricity shoppers who want to choose clean energy to power their home," said Matula.

Constellation Energy, an established energy supplier to thousands of Ohio businesses, recently began expanding its energy supply options to residential customers in Ohio. A September 2011 analysis of residential gas prices in the Akron Beacon Journal concluded Constellation offered "the best one-year fixed rate" to residential consumers.

The Ohio residential green electric choice offer is being made by Constellation NewEnergy Inc., a wholly-owned subsidiary of Constellation Energy Group, Inc. Constellation Energy has about 900,000 residential customers in 15 states, including Ohio, Maryland, Illinois, Pennsylvania, and New Jersey.

Residential consumers who choose an alternative electricity supplier will continue to have their power delivered by their electric utility and will continue to contact their electric utility for billing and service inquiries, including queries about outages.

About Constellation Energy

Constellation Energy (www.constellation.com) is a leading competitive supplier of power, natural gas and energy products and services for homes and businesses across the continental United States. It owns a diversified fleet of generating units, totaling approximately 12,000 megawatts of generating capacity and is a leading advocate for clean, environmentally sustainable energy sources, such as solar power and nuclear energy. The company delivers electricity and natural gas through the Baltimore Gas and Electric Company (BGE), its regulated utility in Central Maryland. A Fortune 500 company headquartered in Baltimore, Constellation Energy had revenues of $14.3 billion in 2010.
