Please connect to the web site at least 15 minutes prior to the beginning of the presentation to allow for any necessary software downloads. An archived replay will be available for three months beginning 24 hours after the live presentation.

About Genomic Health

Genomic Health, Inc. is a life science company focused on the development and commercialization of genomic-based clinical diagnostic tests for cancer that allow physicians and patients to make individualized treatment decisions. In 2004, Genomic Health launched its first test, Oncotype DX(TM), which has been shown to predict the likelihood of breast cancer recurrence and chemotherapy benefit in early stage breast cancer patients. The company was founded in 2000 and is located in Redwood City, California. For more information, please visit www.genomichealth.com.
