inTEST to Present at TechAmerica's 40th Annual AeA Classic Financial Conference

CHERRY HILL, NJ, October 19, 2010 - inTEST Corporation (Nasdaq: INTT), an independent designer, manufacturer and marketer of semiconductor automatic test equipment (ATE) interface solutions and temperature management products, today announced that it is scheduled to present at TechAmerica's 40th Annual AeA Classic Financial Conference, on Tuesday, November 9, 2010 in San Diego.

Robert E. Matthiessen, President and Chief Executive Officer, and Hugh T. Regan, Jr., Treasurer and Chief Financial Officer, will be hosting meetings with investors to discuss the Company's financial performance, business trends and growth opportunities. Presentation materials will be made available on the investor relations section of the Company's website at www.intest.com.

About TechAmerica's 40th Annual AeA Classic Financial Conference

The AeA Classic Financial Conference presented by TechAmerica has been ranked as one of the top three tech showcases in America by Forbes Magazine. The independent conference turns 40 this year, celebrating an impressive history of helping some of today's best known public technology businesses gain early market traction and visibility. Companies discovered at the Classic who have gone on to become global leaders include: Cisco, Intel, Advanced Micro Devices, and 3Com.

In 2010, the Classic continues its important role as a financial catalyst for growth and innovation, helping today's leading tech companies gain access to capital, build investor interest and grow shareholder value. For more information visit www.itaa.org/classic.

About inTEST Corporation

inTEST Corporation is an independent designer, manufacturer and marketer of ATE interface solutions and temperature management products, which are used by semiconductor manufacturers to perform final testing of integrated circuits (ICs) and wafers. The Company's high-performance products are designed to enable semiconductor manufacturers to improve the speed, reliability, efficiency and profitability of IC test processes. Specific products include positioner and docking hardware products, temperature management systems and customized interface solutions. The Company has established strong relationships with semiconductor manufacturers globally, which it supports through a network of local offices. For more information visit www.intest.com.
