

T-Mobile USA Unveils the Motorola CLIQ With MOTOBLUR

First Android(TM)-Powered Device from Motorola Puts Social Networking Center Stage

SAN FRANCISCO, Sep 10, 2009 (BUSINESS WIRE) -- T-Mobile USA, Inc. today announced the upcoming availability of the Motorola CLIQ(TM) with MOTOBLUR(TM), the first Android-powered device from Motorola, Inc. (NYSE: MOT) and the first device to feature the innovative MOTOBLUR solution. The CLIQ will be available exclusively in the U.S. from T-Mobile later this fall.

Developed by Motorola, MOTOBLUR is an innovative solution that manages and integrates communications - from work e-mail to social networking activity - on your CLIQ. Updates to contacts, posts, messages, photos and more are streamed together and synced from sources including Facebook^(R), Twitter(TM), MySpace^(R), Gmail(TM), and work and personal e-mail. MOTOBLUR automatically delivers these updates to the home screen in easy-to-view streams so there is no need to open and close different mobile applications to keep up with the latest content. A 3G-capable smartphone featuring a slide-out QWERTY keyboard and a full touch-screen display, the CLIQ is designed to keep the conversation moving, enabling fast messaging on the fly and easy navigation through MOTOBLUR's streams and widgets.

Cole Brodman, chief technology and innovation officer with T-Mobile USA, jointly unveiled CLIQ with MOTOBLUR today with Sanjay Jha, co-CEO of Motorola and CEO of Motorola Mobile Devices, at GigaOM's Mobilize 09 conference.

"T-Mobile's highly social and always-connected customers have a natural affinity for mobile social networking, and we're excited to feature the Motorola CLIQ with MOTOBLUR prominently in what's shaping up to be our most innovative holiday product lineup ever," Brodman said. "The CLIQ lives up to Motorola's tradition of great design and quality, and to our history of working together to create products that enhance the lives and the relationships of our customers."

Jha said, "We're pleased to announce our first Android-powered device in partnership with T-Mobile USA. Motorola CLIQ with MOTOBLUR differentiates the Android experience for consumers by being the only smartphone that automatically syncs conversations, contacts and content, and delivers a solution that's instinctive, social and smart."

The CLIQ expands T-Mobile's compelling lineup of Android devices and underscores T-Mobile's commitment to the open, highly customizable platform that gives developers and manufacturers the opportunity to create truly unique experiences. This continued first-mover advantage with Android lets T-Mobile customers have access to incredible innovation in the Android Market(TM).

The CLIQ delivers a reliable mobile Web experience by harnessing the power and speed of T-Mobile's 3G network and Wi-Fi. Additional CLIQ features include a 3.1-inch HVGA touch-screen display, a 5 megapixel auto focus camera with video capture and playback at 24 frames per second, a 3.5mm headset jack, a music player with pre-loaded Amazon MP3 store application, Shazam, iMeem Mobile, and a pre-installed 2GB microSD memory card with support for up to 32 GB of removable memory.

CLIQ also features multitasking capabilities and one-touch access to the Google(TM) mobile services millions use every day, including Google Search(TM) by voice, Google Maps(TM) with Street View, YouTube(TM) and Picasa(TM). Easy access to both personal and corporate e-mail, calendars, and contacts is supported by Exchange Server and Gmail. E-mail and contacts are also supported by Yahoo!, Windows Live Hotmail, and other POP3 and IMAP e-mail services. It also combines instant messaging support for Google Talk(TM), as well as AOL^(R), Yahoo! Messenger^(R) and Windows Live Messenger.

T-Mobile's 3G network is currently available in 200 cities nationwide and covers more than 150 million people. By the end of 2009, T-Mobile USA expects its 3G network to be available to approximately 200 million people across the U.S.

Availability

Motorola CLIQ with MOTOBLUR will be available exclusively to T-Mobile customers later this fall in two colors -- Titanium and Winter White. Pricing will be announced at a later date. Customers can visit <http://www.t-mobile.com/cliq> for more information.

About T-Mobile USA, Inc.

Based in Bellevue, Wash., T-Mobile USA, Inc. is the U.S. wireless operation of Deutsche Telekom AG. By the end of the second quarter of 2009, almost 150 million mobile customers were served by the mobile communication segments of the Deutsche Telekom group -- 33.5 million by T-Mobile USA -- all via a common technology platform based on GSM and UMTS, the world's most widely used digital wireless standards. T-Mobile's innovative wireless products and services help empower people to connect to those who matter most. Multiple independent research studies continue to rank T-Mobile among the highest in numerous regions throughout the U.S. in wireless customer care and call quality. For more information, please visit <http://www.T-Mobile.com>. T-Mobile is a federally registered trademark of Deutsche Telekom AG.

About Motorola

Motorola is known around the world for innovation in communications and is focused on advancing the way the world connects. From broadband communications infrastructure, enterprise mobility and public safety solutions to high-definition video and mobile devices, Motorola is leading the next wave of innovations that enable people, enterprises and governments to be more connected and more mobile. Motorola (NYSE: MOT) had sales of US \$30.1 billion in 2008. For more information, please visit www.motorola.com.

Forward-Looking Statements

This press release contains forward-looking statements that reflect the current views of Deutsche Telekom management with respect to future events. The words "anticipate," "believe," "estimate," "expect," "intend," "may," "plan," "project" and "should" and similar expressions are intended to identify forward-looking statements. Forward-looking statements are based on current plans, estimates and projections, and therefore you should not place too much reliance on them. Such statements are subject to risks and uncertainties, most of which are difficult to predict and are generally beyond Deutsche Telekom's control, including, without limitation, those factors set forth in "Forward-Looking Statements" and "Risk Factors" contained in Deutsche Telekom's annual report. If these or other risks and uncertainties materialize, or if the assumptions underlying any of these statements prove incorrect, Deutsche Telekom's actual results may be materially different from those expressed or implied by such statements. Deutsche Telekom does not intend or assume any obligation to update these forward-looking statements.
