

NextGen Healthcare's Hospital Clients to Be Recognized for Achieving Meaningful Use

Inpatient facilities to be celebrated at annual Users' Group Meeting for attestation under Medicare and Medicaid EHR Incentive Programs

HORSHAM, Pa.--(BUSINESS WIRE)-- [NextGen Healthcare Information Systems, Inc.](#), a wholly owned subsidiary of [Quality Systems, Inc.](#) (NASDAQ: QSII) and a leading provider of healthcare information systems and connectivity solutions, today will recognize several critical access hospital clients for their successful Stage 1 Meaningful Use attestation.

Bullock County Hospital, Union Springs, AL; Crenshaw Community Hospital, Luverne, AL; King's Daughters' Hospital and Health Services, Yazoo City, MS; Salem Township Hospital, Salem, IL; and Washington County Hospital, Nashville, IL, will be recognized at the [2011 NextGen Healthcare Users' Group Meeting](#) for meeting all measures required under the Medicare or Medicaid EHR Incentive Programs.

"Rural and community hospitals face distinct challenges relevant to the adoption of healthcare IT," said Kim Larkin, MBA, CPHIMS, chief information officer at Washington County Hospital. "Few vendors offer the technology and resources we require to achieve such milestones, but having NextGen Healthcare as our partner through this process was critical to our success."

Washington County Hospital selected [NextGen® Inpatient Clinicals](#) in the spring of 2010 to complement its use of [NextGen® Inpatient Financials](#) and to help the facility secure incentives introduced by the American Recovery and Reinvestment Act (ARRA). NextGen Healthcare also worked closely with other external vendors to help ensure a seamless integration with the hospital's technology infrastructure. Washington County's ambulatory providers are currently working towards Meaningful Use attestation using [NextGen® Ambulatory EHR](#). In addition, Washington County is implementing [NextGen™ Health Information Exchange](#), a critical tool for fulfilling the data exchange requirements anticipated in Stage 2 Meaningful Use.

"The majority of Meaningful Use success stories to date come from large hospitals and physician practices," noted Steve Puckett, executive vice president and general manager at NextGen Inpatient Solutions. "These clients are leaders in many ways when it comes to deploying healthcare technology, but this milestone serves as a significant example to other community hospitals that Meaningful Use is in fact achievable with the right technology, support and partnership."

NextGen Healthcare's 2011 Users' Group Meeting is being held at the MGM Grand® Hotel & Conference Center in Las Vegas, November 13 — 16, with a record attendance of more than 4,200 participants. The public can follow what is happening at NextGen Healthcare's Users' Group Meeting on Twitter under the hashtag [#NextGenUGM](#).

This news release may contain forward-looking statements within the meaning of the federal securities laws. Statements regarding future events, developments, the Company's future performance, as well as management's expectations, beliefs, intentions, plans, estimates or projections relating to the future (including, without limitation, statements concerning revenue and net income), are forward-looking statements within the meaning of these laws and involve a number of risks and uncertainties. Management believes that these forward-looking statements are reasonable and are based on reasonable assumptions and forecasts, however, undue reliance should not be placed on such statements that speak only as of the date hereof. Moreover, these forward-looking statements are subject to a number of risks and uncertainties, some of which are outlined below. As a result, actual results may vary materially from those anticipated by the forward-looking statements. Among the important factors that could cause actual results to differ materially from those indicated by such forward-looking statements are: volume and timing of systems sales and installations; length of sales cycles and installation process; the possibility that the products will not achieve market acceptance; seasonal patterns of sales and customer buying behavior; the development by competitors of new or superior technologies; the timing, cost and success or failure of new product and service introductions, development and product upgrade releases; undetected errors or bugs in software; product liability; changing economic, political or regulatory influences in the health-care industry; changes in product-pricing policies; availability of third-party products and components; competitive pressures including product offerings, pricing and promotional activities; the Company's ability or inability to attract and retain qualified personnel; possible regulation of the Company's software by the

U.S. Food and Drug Administration; uncertainties concerning threatened, pending and new litigation against the Company including related professional services fees; uncertainties concerning the amount and timing of professional fees incurred by the Company generally; changes of accounting estimates and assumptions used to prepare the prior periods' financial statements; general economic conditions; and the risk factors detailed from time to time in Quality Systems' periodic reports and registration statements filed with the Securities and Exchange Commission. A significant portion of the Company's quarterly sales of software product licenses and computer hardware is concluded in the last month of the fiscal quarter, generally with a concentration of such revenues earned in the final ten business days of that month. Due to these and other factors, the Company's revenues and operating results are very difficult to forecast. A major portion of the Company's costs and expenses, such as personnel and facilities, are of a fixed nature and, accordingly, a shortfall or decline in quarterly and/or annual revenues typically results in lower profitability or losses. As a result, comparison of the Company's period-to-period financial performance is not necessarily meaningful and should not be relied upon as an indicator of future performance. The Company undertakes no obligation to publicly update any forward-looking statements, whether as a result of new information, future events or otherwise.
