Edgewater Fullscope Launches ChemAXpress; A Cloud-based Implementation Tool for Chemical Manufacturers

Third Fullscope Solution Available on Microsoft Azure

ATHENS, Ala., Sept. 07, 2016 (GLOBE NEWSWIRE) -- Edgewater Fullscope, a wholly-owned subsidiary of Edgewater Technology, Inc. (NASDAQ:EDGW) and leading provider of Microsoft Dynamics AX and CRM solutions to manufacturers, today announced the availability of ChemAXpress, one of the first new Microsoft Dynamics AX solutions available on Microsoft Azure.

"A large portion of our customer base is chemical manufacturers, especially those who make specialty chemicals for industrial and agricultural use, so it makes sense for us to develop a special solution for this market segment," says Russell Smith, senior vice president, Edgewater Fullscope. "We've leveraged our chemical industry experience, as well as our Microsoft Dynamics AX expertise, to create a robust tool to help these customers leverage the cloud to implement quickly."

ChemAXpress is a rapid deployment template to help streamline the time it takes to implement an enterprise resource planning (ERP) solution in a chemical manufacturing company. Delivered through a ready-to-go environment in Azure using Microsoft Lifecycle Services (LCS), ChemAXpress includes:

- | A comprehensive business process model that reflects how Microsoft Dynamics AX addresses organizational, financial, operational and regulatory business processes and analytical needs in a chemical manufacturing organization
- | A preconfigured Microsoft Dynamics AX environment for a chemical manufacturing company that can be deployed in Azure with related setup, configuration and master data samples
- | An implementation methodology designed specifically for rapid deployment of Microsoft Dynamics AX in a chemical manufacturing company
- | A set of preconfigured data migration scripts to bring in master data including items, customers, vendors and bills of materials

"We have leveraged over 15 years of experience with chemical manufacturing ERP implementations and are excited to offer an easy-to-use, Cloud-based template to help chemical manufacturers achieve quicker results from their Dynamics AX investments," said Reddy Beeram, director of product development for Edgewater Fullscope.
