Aviat Awarded IP/MPLS Microwave Business for a Government Network in Latin America

Business Includes Microwave Routers, Radios and Full Turnkey Services

SANTA CLARA, Calif., Sept. 28, 2016 /PRNewswire/ -- Aviat Networks, Inc. (NASDAQ: AVNW), the leading expert in microwave networking solutions, today announced it has been awarded a turnkey project to supply an IP/MPLS Microwave Solution for a Government Network in Latin America.

Aviat's solution results in a multi-agency private data network that allows police, security personnel and correctional facilities to share information more easily, quickly and reliably. This network will support video surveillance, mobile communications, data traffic and other mission-critical applications used by government employees and first responders.

Supporting full IP/MPLS-based VPN services, CTR microwave routers enable the government to deliver seamless inter-agency communications and because CTR combines all the functionality of a microwave radio and router in a single device, these services are delivered with fewer boxes to buy, deploy and maintain resulting in a simpler overall solution.

To achieve further simplification for the customer, Aviat will deliver design, engineering and deployment services.

"Aviat has a highly differentiated offering for public safety networks globally," states Michael Pangia, president and CEO, Aviat Networks. "This win further validates the value of an integrated IP/MPLS microwave router as the simplest solution for government networks that need to service multiple agencies over a converged infrastructure."

About Aviat Networks

Aviat Networks, Inc. (NASDAQ: AVNW) is a leading global provider of microwave networking solutions transforming communications networks to handle the exploding growth of IP-centric, multi-Gigabit data services. With more than one million systems sold in over 140 countries, Aviat Networks provides LTE-proven microwave networking solutions to mobile operators, including some of the largest and most advanced 4G/LTE networks in the world. Public safety, utility, government and defense organizations trust Aviat Networks' solutions for their mission-critical applications where reliability is paramount. In conjunction with its networking solutions, Aviat Networks provides a comprehensive suite of localized professional and support services enabling customers to effectively and seamlessly migrate to next-generation Carrier Ethernet/IP networks. For more than 50 years, customers have relied on Aviat Networks' high performance and scalable solutions to help them maximize their investments and solve their most challenging network problems. Headquartered in Santa Clara, California, Aviat Networks operates in more than 100 countries around the world.
