Celldex to Report Fourth Quarter and Year-End 2017 Business/Financial Results and Present at Upcoming Investor Conference

HAMPTON, N.J., March 02, 2018 (GLOBE NEWSWIRE) -- Celldex Therapeutics, Inc. (Nasdaq:CLDX) announced today upcoming investor events in March.

2017 Year-End Results and Conference Call/Webcast

Celldex will release fourth quarter and year-end 2017 financial results on Wednesday, March 7, 2018 after the U.S. financial markets close. Celldex executives will host a conference call at 4:30 p.m. EST on the same day to discuss 2017 financial and business results and to provide an update on upcoming milestones for 2018.

The conference call and presentation will be webcast live over the internet and can be accessed by going to the "Events & Presentations" page under the "Investors & Media" section of the Celldex Therapeutics website at www.celldex.com. The call can also be accessed by dialing (866) 743-9666 (within the United States) or (760) 298-5103 (outside the United States). The passcode is 8296067.

A replay of the call will be available approximately two hours after the live call concludes through March 15, 2018. To access the replay, dial (855) 859-2056 (within the United States) or (404) 537-3406 (outside the United States). The passcode is 8296067. The webcast will also be archived on the Company's website.

Upcoming Investor Conference

Anthony Marucci, Co-founder, President and Chief Executive Officer, will present a corporate overview at the Cowen and Company 38th Annual Health Care Conference in Boston on Monday, March 12, 2018 at 2:10 p.m. EDT.

A live webcast of the presentation will be available on the "Events & Presentations" page of the "Investors & Media" section of the Celldex website. A replay will be available for seven days following the event.

About Celldex Therapeutics, Inc.

Celldex is developing targeted therapeutics to address devastating diseases for which available treatments are inadequate. Our pipeline includes antibodies, antibody-drug conjugates and other protein-based therapeutics derived from a broad set of complementary technologies which have the ability to engage the human immune system and/or directly inhibit tumors to treat specific types of cancer or other diseases.
