## **Interim Report Q1 2018**

The Interim Report 1<sup>st</sup> Quarter 2018 for A.P. Møller - Mærsk A/S is hereby enclosed.

CEO of A.P. Møller - Mærsk A/S, Søren Skou, states:

"In the first quarter of 2018, we reported a 30% revenue growth and the integration of the business is well underway with a successful start to the Hamburg Süd integration and the closing of Maersk Oil transaction in March with an accounting gain of USD 2.6bn. At the same time, on the short-term performance, our result especially in the ocean related part of the business was unsatisfactory. In response to the current challenging market conditions we are implementing a number of short-term initiatives to improve profitability and we reiterate our guidance for 2018.

The new format reflects that we are an integrated global container transport and logistics business focusing on our customers' value chains, and it allows us to follow our progress, particularly in those parts of the business which are not purely ocean freight, which we need to grow in order to minimise the cyclical part of our business."
