

Power-One Launches Dedicated Central Solar Inverter for Asian Market

CAMARILLO, Calif., Dec. 3, 2010 (GLOBE NEWSWIRE) -- Power-One Inc. (Nasdaq:PWER), a leading provider of renewable energy and energy-efficient power conversion and power management solutions, has announced it has launched a newly designed central product specifically targeting the emerging Asian inverter market.

Power-one's new 250kW and 500kW utility grade central inverters have a number of key features, including a very high efficiency of 98.3%; electrolytic capacitor free, leading to longer MTBF (mean time between failures); compact size and weight; touch screen display; and 1000 Voc (open circuit voltage) rating.

"This product offers high performance with affordable capital expenditure and has been specifically designed for the fast growing Asian market," said Paolo Casini, Power-One's Vice President for Marketing. "Its design is the result of the experience we have acquired with more than 50MW of installation in the challenging Asian market."

Power-One is currently the world's second largest manufacturer of solar power inverters. With manufacturing centers in three continents, Power-One and its Aurora brand of solar and wind power inverters, ranging from 2kw to 2.5MW, offer best-in-class product performance and reliability along with a global customer care package.
