INVISIO Communications launches two new products at EUROSATORY 2010

INVISIO Communications launches two new products at the EUROSATORY 2010 Defence and Security Trade Show in Paris; a customized dual-digital headset with hearing protection and a wireless PTT solution

"In 2009 we launched the world leading INVISIO X50 communication system, which is the world's first digital communication system with certified hearing protection and the patented technology INVISIO Bone Conduction that enables communication even in extreme conditions. During the late part of 2009 and the first quarter of 2010 we received the first reference orders from a range of Special Forces across the world and many potential customers are currently testing the system in their own environment. These two new products complement that system and further solves problems for the very demanding users", says Lars Højgård Hansen, CEO of INVISIO Communications.

INVISIO X6 - Individually customized dual-digital headset with certified hearing protection

The INVISIO X6 is another world's first and is a dual sided in-ear headset using the patented INVISIO Bone Conduction technology. The INVISIO X6 is customized for each user providing a unique level of continuous comfort and ease of use.

The patent pending INVISIO Custom Protect™ ensures an unsurpassed level of hearing protection (certified at 29dB attenuation, SNR). INVISIO X6 is available for shipment.

"The INVISIO X6 is another great example how we constantly seek to transform the growing market for in-ear headset by providing new standards for comfort, fit and protection within demanding environments" says Lars Højgård Hansen.

INVISIO M80 - Wireless PTT (Push to Talk) for the INVISIO X50 Control Unit

The new INVISIO M80 wireless PTT enables the user to operate the INVISIO X50 Control Unit remotely. It can be mounted to any kind of device using a NATO accessory rail attachment. INVISIO M80 is fully submersible down to two meters and uses military grade encryption for a secure connection. Shipment of the INVISIO M80 will begin in the third quarter of 2010.

About EUROSATORY 2010: EUROSATORY 2010 is an international exhibition for Land, Air and Homeland Defence held in Paris, France 14 – 18 June 2010. Welcome to visit INVISIO at booth # 5 S 711.
