INVISIO receives orders from the US Army's TCAPS program

INVISIO (IVSO) has received an order for its communication and hearing protection systems valued approximately SEK 16 million from the US army's modernization program TCAPS. This is the third order from the customer during the second quarter. The total value of the three orders amounts to approximately 25 MSEK. Deliveries are planned for the later part of 2017.

TCAPS, the Tactical Communication and Protective System, is one of the world's largest modernization programs for hearing protection and communication. Run by the US Army and PEO soldier, the program approved and implemented INVISIO's product solutions in 2013 to reduce the risk of hearing loss and improve the wearer's communication potential.

The orders were via INVISIO's local reseller TEA.

About INVISIO Communications AB (publ)

INVISIO offers cutting-edge personal communication and hearing protection systems. The systems enable users to operate and communicate safely and clearly in all environments, even under extreme conditions, such as loud noise, heat, and underwater. INVISIO systems consist of headsets and advanced control units that interface to a wide range of communication devices. The systems provide hearing protection while maintaining the natural level of situational awareness. Customers are mainly from the public sector. Sales are made via a global network of partners and to some extent directly to end customers. INVISIO is listed on Nasdaq Stockholm (IVSO). Additional information is available on the company's website, www.invisio.com.
