## PositiveID Corporation Launches New Website at [www.psidcorp.com](http://www.psidcorp.com)

DELRAY BEACH, Fla., Feb. 25, 2015 (GLOBE NEWSWIRE) -- PositiveID Corporation ("PositiveID" or "Company") (OTCQB:PSID), a developer of biological detection and diagnostics solutions, today announced that it has launched a new corporate website at [www.psidcorp.com](http://www.psidcorp.com).

PositiveID's M-BAND (Microfluidic Bio-agent Autonomous Networked Detector) continuously and autonomously analyzes air samples for the detection of biological airborne threats in the form of bacteria, viruses, and toxins for up to 30 days. Results from individual M-BAND instruments are reported via a secure wireless network in real time to give an accurate and up-to-date status of field conditions. M-BAND is the only system of its kind successfully demonstrated in the field under the DHS' BAND Program (Bio-agent Autonomous Networked Detector).

PositiveID's Firefly Dx is a point-of-need, handheld system designed to deliver molecular diagnostic results from a sample in less than 20 minutes, compared to two to four hours for a lab device, using real-time PCR (polymerase chain reaction) chemistry. The system is a two-part device consisting of a portable handheld instrument with wireless communication and disposable single-use cartridges containing all necessary analytical elements. The system is designed to process a variety of sample types, including whole blood, buccal and nasopharyngeal swabs, urine, and environmental field samples.

### About PositiveID Corporation

PositiveID Corporation is an emerging growth company and developer of biological detection systems for America's homeland defense industry as well as rapid biological testing. PositiveID is focused on the development of microfluidic systems for the automated preparation of and performance of biological assays in order to detect biological threats and analyze biological samples. For more information on PositiveID, please visit <http://www.psidcorp.com>.

*Statements about PositiveID's future expectations constitute "forward-looking statements" within the meaning of Section 27A of the Securities Act of 1933, Section 21E of the Securities Exchange Act of 1934, and as that term is defined in the Private Litigation Reform Act of 1995. Such forward-looking statements involve risks and uncertainties and are subject to change at any time, and PositiveID's actual results could differ materially from expected results. These risks and uncertainties include, without limitation, the Company's ability to target the bio-threat detection and rapid medical testing sectors; the Company's ability to complete the development of its Firefly Dx system; as well as other risks. Additional information about these and other factors that could affect the Company's business is set forth in the Company's various filings with the Securities and Exchange Commission, including those set forth in the Company's 10-K filed on April 11, 2014, and 10-Qs filed on November 17, 2014, August 14, 2014, and May 20, 2014, under the caption "Risk Factors." The Company undertakes no obligation to update or release any revisions to these forward-looking statements to reflect events or circumstances after the date of this statement or to reflect the occurrence of unanticipated events, except as required by law.*
