

EFI Q4 2011 Earnings Call

January 24, 2012

Safe Harbor For Forward-Looking Statements

Certain statements in this presentation are forward-looking statements within the meaning of Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of 1934, as amended. Statements other than statements of historical fact including words such as “anticipate”, “believe”, “estimate”, “expect”, “consider” and “plan” and statements in the future tense are forward looking statements. The statements in this presentation that could be deemed forward-looking statements include statements regarding our projections and estimates, including but not limited to projections of revenue, operating profit growth, earnings per share, and any statements or assumptions underlying any of the foregoing.

Forward-looking statements are subject to certain risks and uncertainties that could cause our actual future results to differ materially, or cause a material adverse impact on our results. Potential risks and uncertainties include, but are not necessarily limited to, unforeseen expenses; the difficulty of aligning expense levels with revenue; management’s ability to forecast revenues, expenses and earnings; any world-wide financial and economic difficulties and downturns; adverse tax-related matters such as tax audits, changes in our effective tax rate or new tax legislative proposals; the unpredictability of development schedules and commercialization of our OEM partners’ products and declines or delays in demand for our related products; changes in the mix of products sold; the uncertainty of market acceptance of new product introductions; intense competition in each of our businesses, including competition from products developed by EFI’s customers; challenge of managing assets levels, including inventory and variations in inventory levels; the uncertainty of continued success in technological advances; the challenges of obtaining timely, efficient and quality product manufacturing and components supplying; litigation involving intellectual property rights or other related matters; our ability to successfully integrate acquired businesses; and any other risk factors that may be included from time to time in the Company’s SEC reports.

The statements in this presentation are made as of the date of this presentation. EFI undertakes no obligation to update information contained in this presentation. For further information regarding risks and uncertainties associated with EFI’s businesses, please refer to the section entitled “Risk Factors” in the Company’s SEC filings, including, but not limited to, its annual report on Form 10-K and its quarterly reports on Form 10-Q, copies of which may be obtained by contacting EFI’s Investor Relations Department by phone at 650-357-3828 or by email at investor.relations@efi.com or EFI’s Investor Relations website at www.efi.com.

- This information is current as of January 24, 2012 and is not subject to update.

Q4 2011 Summary

- Record \$163M revenue, up 12% Year-over-Year (YoY)
 - Eighth consecutive quarter of double-digit growth
- Record recurring revenue of \$37M, up 16% YoY
- Non-GAAP Gross Margin of 56.0%, up +210 bps YoY driven by operational efficiencies and growing sales volumes
 - Inkjet gross margin of 40.4%, up 560 bps YoY
- Non-GAAP Operating profit of \$22.8M, up 48% YoY resulting in 14.0% operating margin
 - Highest operating margin percentage since Q3 2007
- Non-GAAP EPS of \$0.36 including \$0.03 non-operational loss from currency
- Cash flow from operating activities of \$29M, up 17% YoY
 - YTD cash flows from operations of \$72M, up 64% YoY
- Q1 2012 Guidance
 - Revenue increase of ~10% YoY, operating profit growth of ~10% YoY
 - Non-GAAP EPS of \$0.27 to \$0.28 assuming neutral currency fluctuation

Notes:

- This information is current as of January 24, 2012 and is not subject to update.
- Non-GAAP numbers have been adjusted to exclude certain items. See GAAP to Non-GAAP reconciliation & our description of our use of non-GAAP information.

About our Non-GAAP Net Income and Adjustments

Use of Non-GAAP Financial Information

To supplement our consolidated financial results prepared in accordance with GAAP, we use non-GAAP measures of net income (loss), as the case may be, and earnings per diluted share that are GAAP net income (loss), as the case may be, and GAAP earnings per diluted share adjusted to exclude certain recurring and non-recurring costs, expenses, and gains.

We believe that the presentation of non-GAAP net income and non-GAAP earnings per diluted share provides important supplemental information regarding non-cash expenses, significant recurring and non-recurring items that we believe are important to understanding our financial and business trends relating to our financial condition and results of operations. Non-GAAP net income and non-GAAP earnings per diluted share are among the primary indicators used by management as a basis for planning and forecasting future periods and by management and our board of directors to determine whether our operating performance has met specified targets and thresholds. Management uses non-GAAP net income and non-GAAP earnings per diluted share when evaluating operating performance because it believes that the exclusion of the items described below, for which the amounts and/or timing may vary significantly depending upon the Company's activities and other factors, facilitates comparability of the Company's operating performance from period to period. We have chosen to provide this information to investors so they can analyze our operating results in the same way that management does and use this information in their assessment of our business and the valuation of our Company.

Use and Economic Substance of Non-GAAP Financial Measures

We compute non-GAAP net income and non-GAAP earnings per diluted share by adjusting GAAP net income and GAAP earnings per diluted share to remove the impact of recurring amortization of acquisition-related intangibles and stock-based compensation expense, as well as restructuring related and non-recurring charges and gains and the tax effect of these adjustments. Such non-recurring charges and gains include end-of-life inventory purchases and related obsolescence, asset impairment, sale of a non-strategic minority investment in a private company, acquisition-related transaction costs, and costs to integrate such acquisitions into our business.

- Recurring charges and gains, including:
 - Amortization of acquisition-related intangibles. Intangible assets acquired to date are being amortized on a straight-line basis.
 - Stock-based compensation expense recognized in accordance with FASB Accounting Standards Codification, Topic 718, Stock Compensation.
- Non-recurring charges and gains, including:
 - Excess solvent inventories and related end-of-life purchases.
 - Restructuring and other consists of:
 - Restructuring related charges. We have incurred restructuring charges as we reduced the number and size of our facilities and the size of our workforce.
 - Asset impairment costs consist primarily of a facility closure and the write-off of a private minority investment.
 - Expenses incurred to integrate businesses acquired during the periods reported.
 - Acquisition-related transaction costs associated with businesses acquired during the periods reported and anticipated transactions.
 - Change in fair value of contingent consideration. Our management has determined that when analyzing the operating results of an acquired entity, we should focus on the total return provided by the investment (i.e., operating profit generated from the acquired entity compared to the purchase price paid, including the final amounts paid for contingent consideration) without taking into consideration any expenses recognized post-acquisition related to the change in the fair value of the contingent consideration. Our management determined that because the final purchase price paid for an acquisition necessarily reflects the accounting value assigned to both contingent consideration and to the intangible assets, when analyzing the operating results of an acquisition in subsequent periods, we should exclude the GAAP impact of any adjustments to the fair value of acquisition-related contingent consideration to its financial results. We believe this approach is useful in understanding the long-term return provided by an acquisition and that investors benefit from a supplemental non-GAAP financial measure that excludes the impact of this adjustment. For the twelve months ended December 31, 2011, we have excluded approximately \$1.5 million from our non-GAAP results related to the change in the fair value of contingent consideration related to the Radius acquisition.
 - Gain on sale of minority investment in a privately held company. Other investments, included within other assets, consist of equity and debt investments in privately-held companies that develop products, markets, and services that are considered to be strategic to us. Each of these investments had been fully impaired in prior years. On September 1, 2011, we sold one of these investments for \$2.9 million because it was no longer considered to be strategic.
- Tax effect of non-GAAP adjustments.
 - After excluding the items described above, we apply the principles of ASC 740, Income Taxes, to estimate the non-GAAP income tax provision in each jurisdiction in which we operate.
 - We have excluded the recognition of previously unrecognized tax benefits of \$2.7 and \$8.7 million, and we have also excluded interest expense accrued on prior year reserves of \$0.4 and \$0.6 million, from our non-GAAP net income for the years ended December 31, 2011 and 2010, respectively, to facilitate comparability of our operating performance between the years. These tax benefits primarily arose from the release of previously unrecognized tax benefits resulting from the expiration of U.S. federal and state statutes of limitations.
 - We have excluded other tax benefits of \$0.3 million from our non-GAAP net income for the year ended December 31, 2011.

Usefulness of Non-GAAP Financial Information to Investors

These non-GAAP measures are not in accordance with or an alternative to GAAP and may be materially different from other non-GAAP measures, including similarly titled non-GAAP measures, used by other companies. The presentation of this additional information should not be considered in isolation from, as a substitute for, or superior to, net income or earnings per diluted share prepared in accordance with GAAP. Non-GAAP financial measures have limitations in that they do not reflect certain items that may have a material impact upon our reported financial results. We expect to continue to incur expenses of a nature similar to the non-GAAP adjustments described above, and exclusion of these items from our non-GAAP net income and non-GAAP earnings per diluted share should not be construed as an inference that these costs are unusual, infrequent, or non-recurring.

Notes:

- This information is current as of January 24, 2012 and is not subject to update.
- Non-GAAP numbers have been adjusted to exclude certain items. See GAAP to Non-GAAP reconciliation & our description of our use of non-GAAP information.
