## Progress Announces Support for Microsoft Visual Studio 2017

*Telerik DevCraft by Progress extends Visual Studio 2017 and increases productivity for .NET developers*

BEDFORD, Mass.--(BUSINESS WIRE)-- [Progress](#) (NASDAQ: PRGS) today announced its support for Microsoft Visual Studio 2017 RC, enabling developers to leverage the power of the [Telerik® DevCraft™ by Progress](#) suite to build and deploy .NET applications with ease.

Progress is a Visual Studio 2017 Sim-Ship partner, underscoring the company's ongoing commitment to providing immediate support to new Microsoft development platforms and tooling releases.

The DevCraft suite of productivity tools enables developers to create high-performance and scalable web, mobile and desktop applications for any Microsoft platform and device. With the latest upgrade to Visual Studio 2017 RC, Progress continues its close collaboration with Microsoft to provide .NET developers an easy path to productivity with Visual Studio 2017, as well as the ability to build apps on Microsoft's most modern platforms and devices.

The DevCraft suite is fully compatible with Visual Studio 2017; developers can take advantage of the new benefits of Visual Studio while continuing to enjoy productivity gains enabled by Telerik UI controls for all major Microsoft developer platforms, including [ASP.NET](#) MVC, ASP.NET AJAX, [ASP.NET](#) Core, Xamarin, WPF and WinForms, Universal Windows Platform and Windows Universal.

"Millions of developers look to us to deliver the best .NET tools for building innovative UIs with unbeatable Visual Studio productivity," said Marina Hristova, Vice President and General Manager, Product Marketing and Management, Progress. "Telerik had a keen focus on the .NET community, and that focus has continued and in many ways advanced at Progress. We will continue to work closely with Microsoft to deliver everything developers need to build great apps on new and existing platforms and devices for the foreseeable future."

"The Telerik DevCraft suite has long been a strong toolset for enhancing advancements within the Microsoft technology stack. With the upcoming release of Visual Studio 2017 RC, Progress continues this tradition by helping development teams release applications in concert with Microsoft's latest and greatest advancements," said Shawn Nandi, Senior Director, Cloud Application Development and Data Marketing, Microsoft Corp. "We're excited to see Progress support Visual Studio 2017, enriching the tooling ecosystem for developers building apps with Visual Studio."

In addition to supporting Visual Studio 2017, Progress developer tools will remain integrated and fully compatible with all previous versions of Visual Studio. For more details about the Progress suite, please visit <http://www.telerik.com/devcraft>
