

Gladstone Capital Corporation

*Financial and Portfolio Overview
for the Fiscal Quarter Ended June 30, 2017*

Legal Disclaimer

Forward-Looking Statements: *This presentation may include forward-looking statements. These forward-looking statements may include comments with respect to our objectives and strategies, and the results of our operations and our business.*

However, by their nature, these forward-looking statements involve numerous assumptions, uncertainties and opportunities, both general and specific. The risk exists that these statements may not be fulfilled. We caution readers of this presentation not to place undue reliance on these forward-looking statements as a number of factors could cause future results to differ materially from these statements, including those factors listed under the caption “Risk Factors” in our Form 10-K and Form 10-Q filings as well as our registration statement, as filed with the Securities and Exchange Commission, all of which can be found on our web site at www.GladstoneCapital.com or the SEC’s web site, www.SEC.gov.

Forward-looking statements may be influenced in particular by factors such as fluctuations in interest rates and stock indices, the effects of competition in the areas in which we operate, and changes in economic, political, regulatory and technological conditions. We caution that the foregoing list is not exhaustive. When considering forward-looking statements when making decisions, investors should carefully consider the aforementioned factors as well as other uncertainties and events.

Past or Present Performance Disclaimer: **This presentation includes information regarding our past or present performance. Please note, past or present performance is not a guarantee of future performance or future results. We undertake no obligation to update the information contained herein to reflect subsequently occurring events or circumstances, except as required by applicable securities laws and regulations.**

Gladstone Capital Overview

Background:

- Founded in 2001, Gladstone Capital was one of the first business development companies focused on making loans to lower middle market U.S. businesses (\$3-15MM of EBITDA)
- Managed by Gladstone Management Corporation, an SEC registered investment adviser that manages more than \$2.0 billion in assets across 4 publicly traded funds
- Funding sources include publicly traded common stock (*NASDAQ:GLAD*), preferred stock (*NASDAQ:GLADO*) and a revolving credit facility.
- Common stock annual distribution is currently \$0.84 per share; paid monthly at \$0.07 per share
- Preferred stock annual distribution rate is 6.75%; paid monthly at \$0.140625 per share

Objective: “Delivering Distributions to Our Stockholders”

- Maintain and grow common distributions from interest income from our secured loan portfolio
- Target investments in growth oriented industries while maintaining portfolio industry diversity
- Invest in companies with proven cash flow and experienced management teams, which are backed by private equity sponsors or owner-operators with significant equity at risk

Investment Portfolio (as of June 30, 2017):

- \$346 million at fair value with 50% in lower risk 1st lien secured loans and 94% of our investments are secured loans
- Well diversified across 47 companies and 22 different industries
- Average portfolio yield of 11.5%

What is a Business Development Company?

- **Business Development Companies (“BDCs”)** are often publicly traded closed-end funds that enable public investors to participate in potentially high yielding private U.S. middle market investments while maintaining daily liquidity
- **BDCs are regulated under the Investment Company Act of 1940 and have the following characteristics**
 - **Diversification** – BDCs must maintain certain asset diversification criteria
 - **Transparency** – Required annual and quarterly SEC filings
 - **Fair Value** – All investments are marked at fair value quarterly
 - **Low Leverage** – Maximum debt-to-equity ratio of 1:1
- **Most BDCs operate under a regulated investment company tax structure**
 - BDCs are required to distribute at least 90% of any taxable income
 - Eliminates corporate level income tax
 - Earnings and capital gains are passed through to investors (similar to a REIT)

Why Invest in a BDC?

- **Superior returns** – Current yields typically exceed other yield oriented investment alternatives
- **Limited interest rate risk** – Distributions backed by floating rate loans supporting increased distributions or appreciation as interest rates rise
- **Superior credit protections** – Distributions generated by a diversified portfolio of secured loans
- **Investment liquidity** – Established public equity market for common stock shares
- **Experienced credit managers** – Experience and capital base structured to manage loan portfolio through a business cycle to minimize credit losses

Gladstone Strategy and Risk Management

Investment Strategy:

- Originate secured debt investments in lower middle market companies in stable industries, with sustainable margins/cash flows and favorable growth characteristics which can support a leveraged capital structure
- Target companies with operating cash flow (EBITDA) of \$3-\$15 million and investments of \$8-\$30 million
- Focus on industries including light and specialty manufacturing, industrial products and services, business and information services, added-value distribution/logistics and healthcare services while avoiding financial institutions, early stage or high technology companies, commodity or highly cyclical businesses

Deal Sourcing:

- Dedicated origination team across 3 offices to provide regional coverage of middle market private equity firms, investment banks and other deal sources
- Leverage dedicated lower middle market focus and team experience to deliver investor oriented financing solutions

Due Diligence:

- Thorough multi-disciplinary equity oriented underwriting approach – blending internal industry experience, onsite visits and management assessments, supplemented with third party financial reviews, industry assessments, management background checks, and legal and insurance investigations, etc.

Risk Management:

- Board level participation in portfolio companies to monitor performance and proactively manage exposure
- Ongoing Gladstone senior management review, quarterly external investment valuations, and Gladstone board oversight

Attractive Lower Middle Market Dynamics

Why we target lower middle market companies

- Lower middle market companies typically sell for lower cash flow multiples which translate into reduced debt financing requirements and lower leverage levels
- Greater industry diversity and more consistent flow of growth oriented investment opportunities
- Better asset collateral coverage and lender protective covenants
- Limited competition from larger funds and commercial banks can yield more attractive investment returns at lower relative leverage
- More receptive to equity co-investments, which provide Gladstone an opportunity to capitalize on the anticipated growth and equity appreciation

Trends Enhancing Opportunity for Non-Bank Lenders

- Ability to provide simplified “one-stop” financing solutions, and reduce repayment requirements or fund follow-on capital to support a company’s growth objectives
- Existing regulations have curtailed commercial bank flexibility and appetite to hold leveraged investments
- Bulk of loan funds / private debt managers focus on larger borrowers (>\$10 million EBITDA) and deal size to get larger funds deployed on timely basis

Gladstone Capital 6/30/17 Quarter Summary

Originations/Portfolio Activity:

- Closed 3 new investments totaling \$29.0 million of originations and \$8.0 million of follow-on investments
- Net originations of \$31.0 million for the period after repayments of \$6.0 million primarily related to a sell-down of one of the largest investments in the fund
- Subsequent to June 30, 2017, we exited one syndicated loan for net proceeds of \$4.8 million
- Recent proprietary loan originations affirm lower middle market investment strategy with average leverage under 3.2x EBITDA and accretive 11% average yield

Portfolio Yield / Net Investment Income (NII):

- Weighted Average Yield on our interest-bearing investment portfolio increased slightly to 11.5%
- Other fee related income on the quarter was negligible with no exits or significant fee opportunities.
- NII was \$5.4 million or \$0.21 per common share which covered 100% of shareholder distributions

Portfolio Performance and Valuation:

- Maintained asset quality with secured 1st lien loans at 50% of the portfolio at FV as of June 30, 2017
- Non-accrual investments totaling \$7.5 million or 2.3% of assets at FV
- Net realized and unrealized portfolio gains totaled \$1.0 million impacted by favorable operating performance which reduced unrealized depreciation on several investments
- Portfolio appreciation increased NAV per share by \$0.05/share to \$8.38

Gladstone Capital 6/30/17 Quarter Summary

Capital Base and Liquidity

- Revolving line of credit borrowings increased by \$28.1 million to \$82.2 million on \$170.0 million bank line
- Balance Sheet leverage position increased as debt and preferred stock increased to 65% of total capital, but remains well below the BDC peer average of 77% (*Raymond James 7/21/17 Newsletter*).
- Borrowing capacity of approximately \$70.0 million is available to support the growth of our investment portfolio and investment income
- We issued 362.2 thousand shares under our ATM stock program at a weighted average price of \$9.89 in the quarter, adding \$3.4 million to the capital base net of fees.

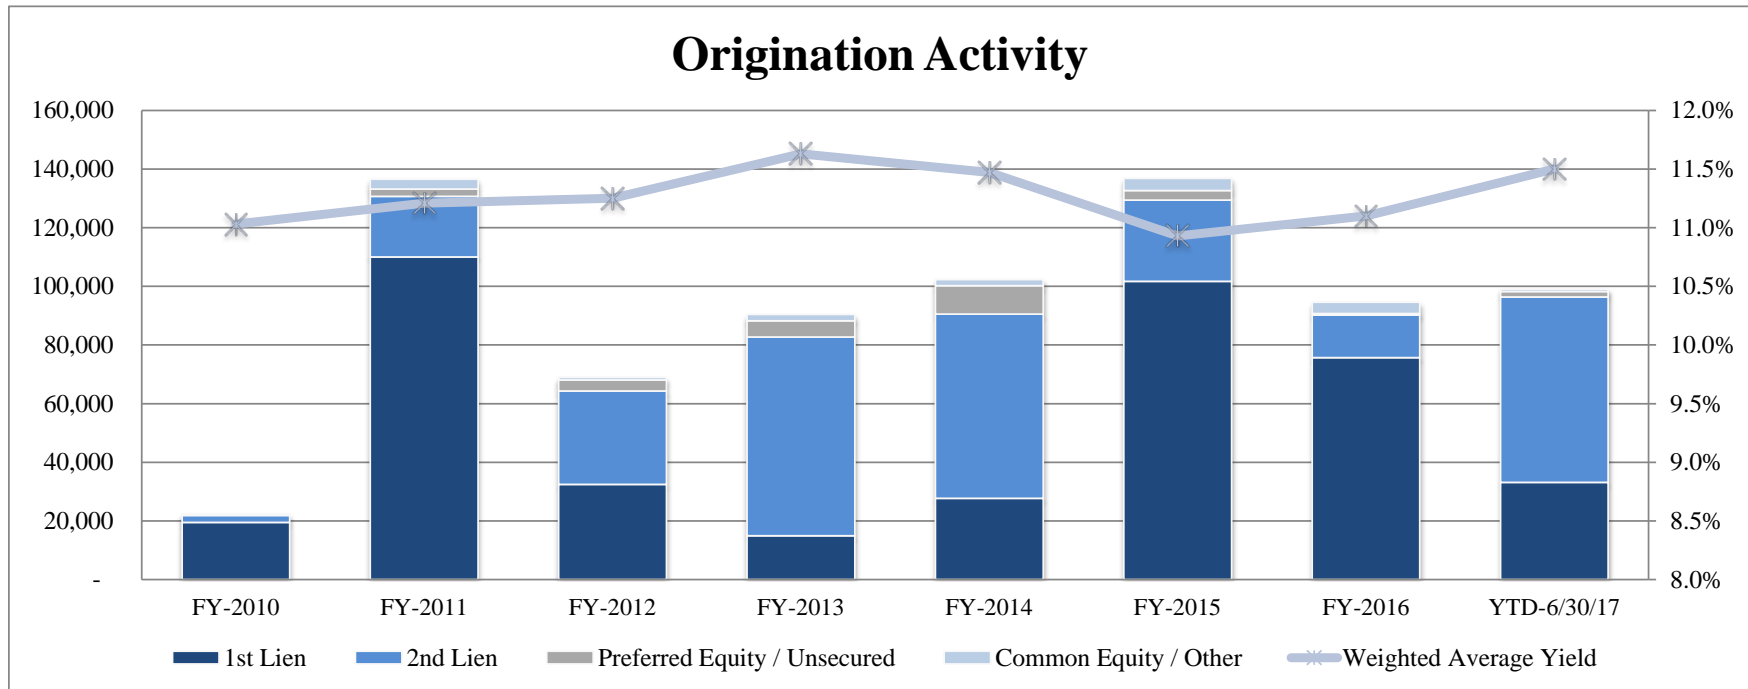

Improving ROE

- Over the last 24 months, GLAD's portfolio performance, as measured by NII / Average Net Assets, has trended up with the diverse loan mix, lower non-performing assets, and increasing fee income
- Legacy assets have largely run-off and portfolio losses moderated contributing to a ROE of ~10% for the LTM period

BDC ROE Source: Raymond James BDC Industry Weekly Newsletters

Gladstone Capital Origination Activity

- Loan originations for the YTD period through 6/30/17 include eight new investments totaling \$85.2 million, which is in line with our historic pacing of loan originations
- Even with the recent shift towards second lien investments, the portfolio remains conservatively ~50% first lien securities

Historical Originations Affirm LMM Strategy

(Consistency of Deal Flow at Attractive Leverage & Yields)

(3) Projected Debt IRR under Gladstone's Base Case over projected life of investment

Gladstone Capital Portfolio Trends

- Attractive flow of lower middle market opportunities have fueled generally consistent asset growth
- Two large exits caused repayments to spike to ~\$50 million and the portfolio contracted temporarily at 12/31/16. Strong net loan growth since has absorbed prepayments and resumed portfolio growth.
- Maintained prudent asset mix with first lien loans at 49.6% of total investments and secure debt investments are 93.8% of total investments.

	3/31/16	6/30/16	9/30/16	12/31/16	3/31/17	6/30/17

***Weighted average yield on interest bearing debt investments (excludes non-accruals and reserves on interest receivables)*

Portfolio Composition

Debt Interest Rate Composition as of 6/30/17 Principal Cost

GLAD is well positioned to participate in any increase in interest rates with its high floating rate asset mix

Interest Rate Sensitivity - Annual Impact

Basis Point Change	Increase Int. Income	Incr. (Dec.) in Int. Exp.	Net Interest Income Impact	Net Interest Income Impact (% Change)
Up 300 basis points	\$ 8,302	\$ 2,466	\$ 5,836	19.6%
Up 200 basis points	5,183	1,644	3,539	11.9%
Up 100 basis points	2,426	822	1,604	5.4%

- With expectations of increasing interest rates over the next year, the portfolio should generate a rise in net interest income available for distributions
- The weighted average LIBOR floor on these assets is 1.3%, and with only \$82 million of floating rate debt, a 100bp rise in LIBOR should generate a 5.4% increase to net interest income.
- The team continues to target adding floating rate loans to the portfolio to maintain upside in a rising rate environment

Note: Sensitivity Analysis above assumes no significant changes in the composition of the portfolio and the continued ability of portfolio companies to service debt obligations.

Industry and Deal Sources Are Diversified

Why Own Gladstone Capital Stock?

- **Well established lender in attractive lower middle market arena**
 - Dedicated focus on this sector supported by a team of more than 60 experienced professionals
 - Less efficient lending market with more consistent deal flow and favorable non-bank growth outlook
 - Recent originations averaging under 3.2x leverage and yields of 11%
- **Conservative Business Model**
 - Reduced credit risk profile with mix of lower leverage and predominately 1st lien senior loans
 - Shareholder distributions supported by interest income from a diversified portfolio of secured loans
 - Paid 173 consecutive distributions; annual distribution yield of 8.5% as of June 30, 2017
 - Net investment income has consistently covered 100% of common stock distributions
 - Commitment to support the common stock distributions with the management fee credits as needed
 - Insiders own more than 5% of our common stock
- **Significant capacity to grow NII / Distributions**
 - The deployment of our excess investment capacity at current yields will materially lift NII. We continue to have a strong pipeline of opportunities from which we anticipate deploying much of this excess capacity over the remainder of the year
 - The portfolio is well positioned to benefit from any incremental increase in Fed rates, as a 100 bps rise in libor should lift NII available for distributions by approximately 7% assuming the continued ability of portfolio companies to service debt obligations

Distributions and Earnings Consistency

- Our Adviser's investment track record and commitment to supporting shareholder distributions via incentive fee credits has contributed to an uninterrupted distribution track record
- Gladstone Capital has made 173 consecutive monthly or quarterly distributions since inception. Cumulative distributions since the end of fiscal 2009 total \$141.4 million or \$6.51 per common share through the fiscal quarter ending 6/30/17.
