EXFO reveals new 400G Solution for Network Equipment Manufacturers, Data Centers and Service Providers at OFC 2017

Visit EXFO's booth #2725 at OFC, Los Angeles from March 20-23 as we showcase our new 400G Test Solution

QUEBEC CITY, March 15, 2017 /PRNewswire/ - EXFO Inc. (NASDAQ: EXFO) (TSX: EXF) the global network test, data and analytics experts, today announced that EXFO will be previewing its new 400G solution for lab and manufacturing as well as for field deployments at the Optical Fiber Communication Conference and Exhibition (OFC) from March 20-23 in Los Angeles, California.

With the explosive growth in global network traffic and high speed deployment extending into metro networks and data centers, the deployment of 400G in the core is the next step in the evolution. To accelerate this transformation, EXFO will be demonstrating its new 400G test solution capable of addressing all new technologies in the 400G ecosystem, including 400GE, Flex-E, OTUc4 and Flex-O and CFP8.

"EXFO is pleased to showcase our 400G test solution at OFC 2017," said Stephane Chabot, Vice-President Test and Measurement. "As the market moves to 400G in lab and field deployments, EXFO continues to extend our high-speed multiservice portfolio offering in response to the needs of Network Equipment Manufacturers, Data Centers, and Service Providers. EXFO is committed to bringing advanced testing capabilities like our 400G testing solution to address our customers' challenges to speed up delivery of their services, increase revenue without compromising quality."

About EXFO

EXFO develops smarter network test, data and analytics solutions for the world's leading communications service providers, network equipment manufacturers and web-scale companies. Since 1986, we've worked side by side with our clients in the lab, field, data center, boardroom and beyond to pioneer essential technology and methods for each phase of the network lifecycle. Our portfolio of test orchestration and real-time 3D analytics solutions turn complex into simple and deliver business-critical insights from the network, service and subscriber dimensions. Most importantly, we help our clients flourish in a rapidly transforming industry where "good enough" testing and data analytics just isn't good enough anymore—it never was for us, anyway.
