Profile

Horizon Technology Finance Corporation (“Horizon” or “Company” or “we”) is a specialty finance company that lends to and invests in the technology, life science, healthcare information and services and cleantech industries (collectively, our “Target Industries”). Our investment objective is to maximize our investment portfolio’s return by generating current income from the debt investments we make and capital appreciation from the warrants we receive when making such debt investments. We are focused on making secured loans to venture capital backed companies in our Target Industries. We also selectively lend to publically traded companies in our Target Industries.

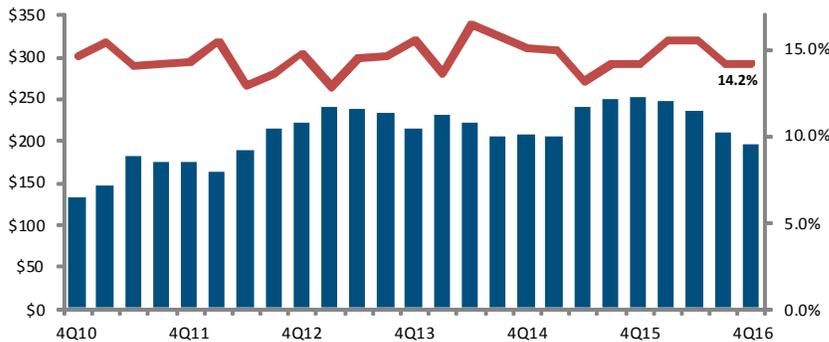

We are an externally managed, closed-end, non-diversified management investment company that has elected to be regulated as a Business Development Company (“BDC”) under the Investment Company Act of 1940 and treated for federal income tax purposes as a regulated investment company (“RIC”). As a RIC, we generally will not have to pay corporate-level federal income taxes on any net ordinary income or capital gains that we distribute to our stockholders if we meet certain source-of-income, distribution, asset diversification and other requirements.

We are externally managed by our advisor, Horizon Technology Finance Management LLC, which manages our day-to-day operations and provides all administrative services necessary for us to operate.

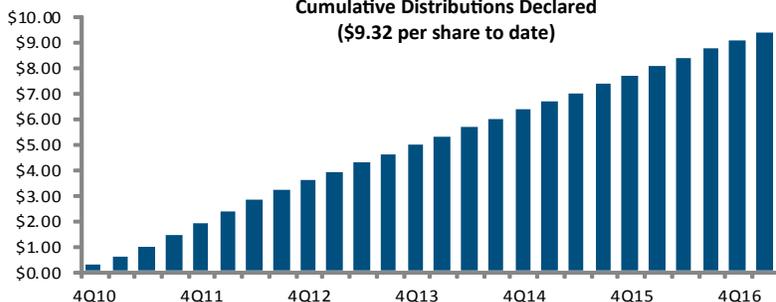

High-Yield Investment Portfolio

As of December 31, 2016, our portfolio consisted of 44 secured loans with an aggregate fair value of \$186 million, and warrants and equity investments in 83 companies with an aggregate fair value of \$7 million.

Proven Business Model in an Underserved Market

Over \$58 billion* in venture capital has been invested over the past year. We estimate that venture lending represents 10% to 20% of the total capital invested. As demand for venture lending remains strong, our business model creates significant value for our portfolio companies while loan structures and market attributes help mitigate risk to Horizon.
