**TERADYNE, INC.**

(Exact name of registrant as specified in its charter)

---

Massachusetts  
(State or Other Jurisdiction of  
Incorporation or Organization)

600 Riverpark Drive, North Reading,  
Massachusetts  
(Address of Principal Executive Offices)

04-2272148  
(I.R.S. Employer  
Identification No.)

01864  
(Zip Code)

978-370-2700  
(Registrant's Telephone Number, Including Area Code)

---

Indicate by check mark whether the registrant: (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to the filing requirements for the past 90 days. Yes  No

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files) Yes  No

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, smaller reporting company, or an emerging growth company. See the definitions of "large accelerated filer," "accelerated filer," "smaller reporting company," and "emerging growth company" in Rule 12b-2 of the Exchange Act (check one):

Large accelerated filer	<input checked="" type="checkbox"/>	Accelerated filer	<input type="checkbox"/>
Non-accelerated filer	<input type="checkbox"/> (Do not check if a smaller reporting company)	Smaller reporting company	<input type="checkbox"/>
		Emerging growth company	<input type="checkbox"/>

If an emerging growth company, indicate by check mark if the registrant has elected not to use the extended transition period for complying with any new or revised financial accounting standard provided pursuant to Section 13(a) of the Exchange Act.

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act). Yes  No

The number of shares outstanding of the registrant's only class of Common Stock as of May 8, 2017 was 198,950,727 shares.

TERADYNE, INC.

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS  
(Unaudited)

**A. THE COMPANY**

Teradyne, Inc. (“Teradyne”) is a leading global supplier of automation equipment for test and industrial applications. Teradyne designs, develops, manufactures and sells automatic test systems used to test semiconductors, wireless products, data storage and complex electronics systems in the consumer electronics, wireless, automotive, industrial, computing, communications, and aerospace and defense industries. Teradyne’s industrial automation products include collaborative robots used by global manufacturing and light industrial customers to improve quality, increase manufacturing efficiency and decrease manufacturing costs. Teradyne’s automatic test equipment and industrial automation products and services include:

- semiconductor test (“Semiconductor Test”) systems;
- defense/aerospace (“Defense/Aerospace”) test instrumentation and systems, storage test (“Storage Test”) systems, and circuit-board test and inspection (“Production Board Test”) systems (collectively these products represent “System Test”);
- industrial automation (“Industrial Automation”) products; and
- wireless test (“Wireless Test”) systems.

**B. ACCOUNTING POLICIES**

*Basis of Presentation*

The consolidated interim financial statements include the accounts of Teradyne and its wholly-owned subsidiaries. All significant intercompany balances and transactions have been eliminated. These interim financial statements are unaudited and reflect all normal recurring adjustments that are, in the opinion of management, necessary for the fair statement of such interim financial statements. Certain prior year amounts were reclassified to conform to the current year presentation. The December 31, 2016 condensed consolidated balance sheet data was derived from audited financial statements, but does not include all disclosures required by accounting principles generally accepted in the United States of America.

The accompanying financial information should be read in conjunction with the consolidated financial statements and notes thereto contained in Teradyne’s Annual Report on Form 10-K, filed with the U.S. Securities and Exchange Commission (“SEC”) on March 1, 2017, for the year ended December 31, 2016.

*Preparation of Financial Statements and Use of Estimates*

The preparation of consolidated financial statements requires management to make estimates and judgments that affect the amounts reported in the financial statements. Actual results may differ significantly from these estimates.

*Stock-Based Compensation*

In March 2016, the Financial Accounting Standards Board (“FASB”) issued Accounting Standards Update (“ASU”) 2016-09, “*Compensation-Stock Compensation (Topic 718): Improvements to Employee Share-Based Payment Accounting.*” Teradyne adopted this ASU in the first quarter of 2017. This ASU changes how Teradyne accounts for certain aspects of share-based payment awards to employees, including the accounting for income taxes, forfeitures, and statutory tax withholding requirements, as well as classification in the statements of cash flows.

Adoption of this ASU required recognition of a cumulative effect adjustment to retained earnings for any prior year excess tax benefits or tax deficiencies not previously recorded. The cumulative effect adjustment of \$39 million was recorded as an increase to retained earnings and deferred tax assets.

This ASU also required a change in how Teradyne recognizes the excess tax benefits or tax deficiencies related to stock-based compensation. Prior to adopting ASU 2016-09, these excess tax benefits or tax deficiencies were credited or charged to additional paid-in capital in Teradyne’s consolidated balance sheets. In accordance with ASU 2016-09, starting in first quarter of 2017, these excess tax benefits or tax deficiencies are recognized as a discrete tax benefit or discrete tax expense to the current income tax provision in Teradyne’s consolidated statements of operations.

---

[Table of Contents](#)

ASU 2016-09 requires companies to adopt the amendment related to accounting for excess tax benefits or tax deficiencies on a prospective basis. For the three months ended April 2, 2017, Teradyne recognized a discrete tax benefit of \$5.2 million related to net excess tax benefit.

In addition, under ASU 2016-09, all excess tax benefits related to share-based payments are reported as cash flows from operating activities. Previously, excess tax benefits from share-based payments arrangements were reported as cash flows from financing activities. The classification amendment was applied prospectively. This ASU also clarifies that all cash payments made to taxing authorities on the employees' behalf for withheld shares should be presented as financing activities on the statement of cash flows. Previously, Teradyne reported cash payments made to taxing authorities as operating activities on the statement of cash flows. This change was applied retrospectively.

Upon adoption of ASU 2016-09, Teradyne made an accounting policy election to continue accounting for forfeitures by applying an estimated forfeiture rate.

#### *Contingencies and Litigation*

Teradyne may be subject to certain legal proceedings, lawsuits and other claims as discussed in Note P. Teradyne accrues for a loss contingency, including legal proceedings, lawsuits, pending claims and other legal matters, when the likelihood of a loss is probable and the amount of the loss can be reasonably estimated. When the reasonable estimate of the loss is within a range of amounts, and no amount in the range constitutes a better estimate than any other amount, Teradyne accrues the amount at the low end of the range. Teradyne adjusts the accruals from time to time as additional information is received, but the loss incurred may be significantly greater than or less than the amount accrued. Loss contingencies are disclosed when they are material and there is at least a reasonable possibility that a loss has been incurred. Attorney fees related to legal matters are expensed as incurred.

### **C. RECENTLY ISSUED ACCOUNTING PRONOUNCEMENTS**

On March 10, 2017, the FASB issued ASU 2017-07, " *Compensation—Retirement Benefits (Topic 715): Improving the Presentation of Net Periodic Pension Cost and Net Periodic Postretirement Benefit Cost* ." This ASU provides guidance on presentation of net periodic pension cost and net periodic postretirement benefit cost. The new standard requires the service cost component to be presented in the same line item as other employee compensation costs arising from services rendered during the period. The other components of net benefit cost such as interest cost, amortization of prior service cost, and actuarial gains or losses, are required to be presented separately outside of income or loss from operations. The presentation of service cost should be applied retrospectively. The guidance is effective for fiscal years beginning after December 15, 2017. Early adoption is permitted. This guidance will impact the presentation of Teradyne's consolidated financial statements. Current presentation of service cost components is consistent with the requirements of the new standard. Upon adoption of the new standard, Teradyne will present interest cost, amortization of prior service cost, and actuarial gains or losses within other (income) expense, net.

On January 26, 2017, the FASB issued ASU 2017-04, " *Intangibles – Goodwill and Other (Topic 350): Simplifying the Accounting for Goodwill Impairment* ." The new guidance removes Step 2 of the goodwill impairment test, which requires a hypothetical purchase price allocation. Goodwill impairment will now be the amount by which a reporting unit's carrying value exceeds its fair value, not to exceed the carrying amount of goodwill. All other goodwill impairment guidance will remain largely unchanged. Entities will continue to have the option to perform a qualitative assessment to determine if a quantitative impairment test is necessary. The same one-step impairment test will be applied to goodwill at all reporting units, even those with zero or negative carrying amounts. Entities will be required to disclose the amount of goodwill at reporting units with zero or negative carrying amounts. The revised guidance will be applied prospectively, and is effective in 2020. Early adoption is permitted for any impairment tests performed after January 1, 2017. Teradyne is currently evaluating the impact of this ASU on its financial position, results of operations and statements of cash flows.

In October 2016, the FASB issued ASU 2016-16, " *Accounting for Income Taxes: Intra-Entity Asset Transfers of Assets Other than Inventory* ." Under current Generally Accepted Accounting Principles ("GAAP"), the tax effects of intra-entity asset transfers are deferred until the transferred asset is sold to a third party or otherwise recovered through use. The new guidance requires recognition of the tax expense from the sale of the asset in the seller's tax jurisdiction when the transfer occurs, even though the pre-tax effects of that transaction are eliminated in consolidation. Any deferred tax asset that arises in the buyer's jurisdiction would also be recognized at the time of the transfer. The new guidance does not apply to intra-entity transfers of inventory. The income tax consequences from the sale of inventory from one member of a consolidated entity to another will continue to be deferred until the inventory is sold to a third party. The new guidance will be effective in fiscal years beginning after December 15, 2017. Early adoption is permitted. The modified retrospective approach will be required for transition to the new guidance, with a cumulative-effect adjustment recorded in retained earnings as of the beginning of the period of adoption. Teradyne does not expect this ASU to have a material impact on its financial position, results of operations and statements of cash flows.

## [Table of Contents](#)

In February 2016, the FASB issued ASU 2016-02, “*Leases (Topic 842)*.” The guidance in this ASU supersedes the lease recognition requirements in Accounting Standards Codification (“ASC”) Topic 840, “*Leases*.” The new standard establishes a right- of-use (“ROU”) model that requires a lessee to record an ROU asset and a lease liability on the balance sheet for all leases with terms longer than twelve months. Leases will be classified as either finance or operating, with classification affecting the pattern of expense recognition in the statements of operation. The new standard is effective for annual periods beginning after December 15, 2018 with early adoption permitted. A modified retrospective transition approach is required for lessees for capital and operating leases existing at, or entered into after, the beginning of the earliest comparative period presented in the financial statements. Teradyne is currently evaluating the impact of this ASU on our financial position and results of operations.

In January 2016, the FASB issued ASU 2016-01, “*Financial Instruments—Overall (Subtopic 825-10): Recognition and Measurement of Financial Assets and Financial Liabilities*.” This ASU provides guidance for the recognition, measurement, presentation, and disclosure of financial instruments. The new pronouncement revises accounting related to equity investments and the presentation of certain fair value changes for financial liabilities measured at fair value. Among other things, it amends the presentation and disclosure requirements of equity securities that do not result in consolidation and are not accounted for under the equity method. Changes in the fair value of these equity securities will be recognized directly in net income. This pronouncement is effective for fiscal years beginning after December 15, 2017. Teradyne is currently evaluating the impact of this ASU on its financial position and results of operations.

In May 2014, the FASB issued ASU 2014-09, “*Revenue from Contracts with Customers (Topic 606)*,” which will replace numerous requirements in U.S. GAAP, including industry-specific requirements, and provide companies with a single revenue recognition model for recognizing revenue from contracts with customers. The core principle of the new standard is that a company should recognize revenue to show the transfer of promised goods or services to customers in an amount that reflects the consideration to which the company expects to be entitled to in exchange for those goods or services. In August 2015, FASB issued ASU 2015-14, which deferred the effective date of the new revenue standard by one year. For Teradyne, the standard will be effective in the first quarter of 2018. The two permitted transition methods under the new standard are the full retrospective method, in which case the standard would be applied to each prior reporting period presented, or the modified retrospective method, in which case the cumulative effect of applying the standard would be recognized at the date of initial application. Teradyne is in the process of assessing the impact of this ASU, including identification of changes to policies, processes and controls and the presentation necessary to meet the additional disclosure requirements. Teradyne has selected the modified retrospective transition method. Teradyne is still conducting its assessment and will continue to evaluate the impact of this ASU on its financial position and results of operations.

## D. INVENTORIES

Inventories, net consisted of the following at April 2, 2017 and December 31, 2016:

	April 2, 2017	December 31, 2016
	(in thousands)	
Raw material	\$ 62,373	\$ 58,530
Work-in-process	22,511	22,946
Finished goods	118,394	54,482
	<u>\$203,278</u>	<u>\$ 135,958</u>

Inventory reserves for the periods ending April 2, 2017 and December 31, 2016 were \$115.2 million and \$116.0 million, respectively.

## E. FINANCIAL INSTRUMENTS

### Cash Equivalents

Teradyne considers all highly liquid investments with maturities of three months or less at the date of acquisition to be cash equivalents.

### Marketable Securities

Teradyne accounts for its investments in debt and equity securities in accordance with the provisions of ASC 320-10, “*Investments—Debt and Equity Securities*.” ASC 320-10 requires that certain debt and equity securities be classified into one of three categories: trading, available-for-sale or held-to-maturity securities. As of April 2, 2017, Teradyne’s investments in debt and equity securities were classified as available-for-sale and recorded at their fair market value.

On a quarterly basis, Teradyne reviews its investments to identify and evaluate those that have an indication of a potential other-than-temporary impairment. Factors considered in determining whether a loss is other-than-temporary include:

- The length of time and the extent to which the market value has been less than cost;

---

[Table of Contents](#)

- The financial condition and near-term prospects of the issuer; and
- The intent and ability to retain the investment in the issuer for a period of time sufficient to allow for any anticipated recovery in market value.

Teradyne uses the market and income approach techniques to value its financial instruments and there were no changes in valuation techniques during the three months ended April 2, 2017 and April 3, 2016. As defined in ASC 820-10, “*Fair Value Measurements and Disclosures*,” fair value is the price that would be received from the sale of an asset or paid to transfer a liability in an orderly transaction between market participants. ASC 820-10 requires that assets and liabilities carried at fair value be classified and disclosed in one of the following three categories:

Level 1: Quoted prices in active markets for identical assets as of the reporting date;

Level 2: Inputs other than Level 1, that are observable either directly or indirectly as of the reporting date. For example, a common approach for valuing fixed income securities is the use of matrix pricing. Matrix pricing is a mathematical technique used to value securities by relying on the securities’ relationship to other benchmark quoted prices, and is considered a Level 2 input; or

Level 3: Unobservable inputs that are not supported by market data. Unobservable inputs are developed based on the best information available, which might include Teradyne’s own data.

Teradyne’s available-for-sale debt and equity securities are classified as Level 1 and Level 2. Acquisition-related contingent consideration is classified within Level 3. Teradyne determines the fair value of acquisition-related contingent consideration using a Monte Carlo simulation model. Assumptions utilized in the model include forecasted revenues, revenues volatility and discount rate. The vast majority of Level 2 securities are fixed income securities priced by third party pricing vendors. These pricing vendors utilize the most recent observable market information in pricing these securities or, if specific prices are not available, use other observable inputs like market transactions involving identical or comparable securities.

Realized gains recorded in the three months ended April 2, 2017 and April 3, 2016 were \$0.3 million and \$0.2 million, respectively. Realized losses recorded in the three months ended April 2, 2017 and April 3, 2016 were \$0.2 million and \$0.2 million, respectively. Realized gains are included in interest income and realized losses are included in interest expense. Unrealized gains and losses are included in accumulated other comprehensive income (loss). The cost of securities sold is based on the specific identification method.

During the three months ended April 2, 2017 and April 3, 2016, there were no transfers in or out of Level 1, Level 2 or Level 3 financial instruments.

The following table sets forth by fair value hierarchy Teradyne’s financial assets and liabilities that were measured at fair value on a recurring basis as of April 2, 2017 and December 31, 2016.

April 2, 2017

[Table of Contents](#)

Changes in the fair value of Level 3 contingent consideration for the three months ended April 2, 2017 and April 3, 2016 were as follows:

	For the Three Months Ended	
	April 2, 2017	April 3, 2016
	(in thousands)	
Balance at beginning of period	\$38,332	\$ 37,436
Payments (a)	(1,050)	(15,000)
Fair value adjustment (b)	634	1,173
Balance at end of period	<u>\$37,916</u>	<u>\$ 23,609</u>

- (a) In the three months ended April 2, 2017, Teradyne paid \$1.1 million of the AIT contingent consideration. In the three months ended April 3, 2016 based on Universal Robots' calendar year 2015 EBITDA results, Teradyne paid \$15.0 million or 100% of the eligible EBITDA contingent consideration amount.
- (b) In the three months ended April 2, 2017 and April 3, 2016, the fair value of contingent consideration for the earn-out in connection with the acquisition of Universal Robots was increased by \$0.6 million and \$1.2 million, respectively, primarily due to a decrease in the discount rate.

The following table provides quantitative information associated with the fair value measurement of Teradyne's Level 3 financial instruments:

Liability	April 2, 2017 Fair Value (in thousands)	Valuation Technique	Unobservable Inputs	Weighted
				Average
Contingent consideration (Universal Robots)	\$ 21,711	Monte Carlo Simulation	Revenues for the period July 1, 2015—December 31, 2017 volatility	12.2%
			Discount Rate	2.8%
	\$ 16,205	Monte Carlo Simulation	Revenues for the period July 1, 2015—December 31, 2018 volatility	12.2%
			Discount Rate	2.8%

As of April 2, 2017, the significant unobservable inputs used in the Monte Carlo simulation to fair value the Universal Robots contingent consideration include forecasted revenue, revenue volatility and discount rate. Increases or decreases in the inputs would result in a higher or lower fair value measurement. The maximum payment for each of the two Universal Robots revenue earn-outs is \$25.0 million.

The carrying amounts and fair values of Teradyne's financial instruments at April 2, 2017 and December 31, 2016 were as follows:

	April 2, 2017		December 31, 2016	
	Carrying Value	Fair Value	Carrying Value	Fair Value
	(in thousands)			
<b>Assets</b>				
Cash and cash equivalents	\$ 324,746	\$ 324,746	\$ 307,884	\$ 307,884
Marketable securities	1,157,639	1,157,639	1,304,867	1,304,867
Derivative assets	145	145	1	1
<b>Liabilities</b>				
Contingent consideration	37,916	37,916	38,332	38,332
Derivative liabilities	107	107	131	131
Convertible debt (1)	355,937	534,750	352,669	486,754

- (1) The carrying value represents the bifurcated debt component only, while the fair value is based on quoted market prices for the convertible note which includes the equity conversion features.

The fair values of accounts receivable, net and accounts payable approximate the carrying value due to the short-term nature of these instruments.

	<u>\$1,304,711</u>	<u>\$ 2,977</u>	<u>\$ (2,821)</u>	<u>\$1,304,867</u>	<u>\$ 732,979</u>

Reported as follows:

	Cost	Unrealized Gain	Unrealized (Loss)	Fair Market Value	Fair Market Value of Investments with Unrealized Losses
	(in thousands)				
Marketable securities	\$ 871,321	\$ 134	\$ (431)	\$ 871,024	\$ 423,128
Long-term marketable securities	433,390	2,843	(2,390)	433,843	309,851
	<u>\$1,304,711</u>	<u>\$ 2,977</u>	<u>\$ (2,821)</u>	<u>\$1,304,867</u>	<u>\$ 732,979</u>

As of April 2, 2017, the fair market value of investments with unrealized losses totaled \$990.5 million. Of this value, \$2.2 million had unrealized losses of \$0.2 million for greater than one year and \$988.3 million had unrealized losses of \$2.6 million for less than one year.

As of December 31, 2016, the fair market value of investments with unrealized losses totaled \$733.0 million. Of this value, \$2.9 million had unrealized losses of \$0.3 million for greater than one year and \$730.1 million had unrealized losses of \$2.5 million for less than one year.

Teradyne reviews its investments to identify and evaluate investments that have an indication of possible impairment. Based on this review, Teradyne determined that the unrealized losses related to these investments at April 2, 2017 and December 31, 2016, were temporary.

The contractual maturities of investments held at April 2, 2017 were as follows:

	April 2, 2017	
	Cost	Fair Market Value
	(in thousands)	
Due within one year	\$ 896,345	\$ 895,578
Due after 1 year through 5 years	190,557	190,252
Due after 5 years through 10 years	12,270	11,812
Due after 10 years	40,072	40,011
Total	<u>\$1,139,244</u>	<u>\$1,137,653</u>

Contractual maturities of investments held at April 2, 2017 exclude equity and debt mutual funds as they do not have contractual maturity dates.

**Derivatives**

Teradyne conducts business in a number of foreign countries, with certain transactions denominated in local currencies. The purpose of Teradyne’s foreign currency management is to minimize the effect of exchange rate fluctuations on certain foreign currency denominated monetary assets and liabilities. Teradyne does not use derivative financial instruments for trading or speculative purposes.

To minimize the effect of exchange rate fluctuations associated with the remeasurement of monetary assets and liabilities denominated in foreign currencies, Teradyne enters into foreign currency forward contracts. The change in fair value of these derivatives is recorded directly in earnings, and is used to offset the change in value of monetary assets and liabilities denominated in foreign currencies.

The notional amount of foreign currency forward contracts at April 2, 2017 and December 31, 2016 was \$89.2 million and \$83.9 million, respectively. The fair value of the outstanding contracts was \$0.0 million at April 2, 2017 and a loss of \$0.1 million at December 31, 2016.

For the three months ended April 2, 2017 and April 3, 2016, Teradyne recorded net realized losses related to foreign currency forward contracts hedging net monetary assets and liabilities of \$1.0 million and \$3.3 million, respectively.

Gains and losses on foreign currency forward contracts and foreign currency remeasurement gains and losses on monetary assets and liabilities are included in other (income) expense, net.

The following table summarizes the fair value of derivative instruments at April 2, 2017 and December 31, 2016:

	<u>Balance Sheet Location</u>	<u>April 2, 2017</u>	<u>December 31, 2016</u>
(in thousands)			
<b>Derivatives not designated as hedging instruments:</b>			
Foreign exchange contracts assets	Prepayments	\$ 145	\$ 1
Foreign exchange contracts liabilities	Other current liabilities	(107)	(131)
<b>Total derivatives</b>		<u>\$ 38</u>	<u>\$ (130)</u>

The following table summarizes the effect of derivative instruments recognized in the statement of operations during the three months ended April 2, 2017 and April 3, 2016.

	<u>Location of Losses Recognized in Statements of Operations</u>	<u>For the Three Months Ended</u>	
		<u>April 2, 2017</u>	<u>April 3, 2016</u>
(in thousands)			
<b>Derivatives not designated as hedging instruments:</b>			
Foreign exchange contracts	Other (income) expense, net	\$ 1,011	\$ 3,298
<b>Total Derivatives</b>		<u>\$ 1,011</u>	<u>\$ 3,298</u>

The table does not reflect the corresponding gains and losses from the remeasurement of monetary assets and liabilities denominated in foreign currencies. For the three months ended April 2, 2017 and April 3, 2016, net gains from the remeasurement of monetary assets and liabilities denominated in foreign currencies were \$1.5 million and \$3.4 million, respectively.

## F. DEBT

### Convertible Senior Notes

On December 12, 2016, Teradyne completed a private offering of \$460.0 million convertible senior unsecured notes (the “Notes”). The Notes will mature on December 15, 2023, unless earlier repurchased or converted. The Notes bear interest from December 12, 2016 at a rate of 1.25% per year payable semi-annually in arrears on June 15 and December 15 of each year, beginning on June 15, 2017.

Notes will be convertible at the option of the noteholders at any time prior to the close of business on the business day immediately preceding September 15, 2023, under the following circumstances: (1) during any calendar quarter beginning after March 31, 2017 (and only during such calendar quarter), if the closing sale price of the Teradyne’s common stock, for at least 20 trading days (whether or not consecutive) during a period of 30 consecutive trading days ending on the last trading day of the immediately preceding calendar quarter is greater than 130% of the conversion price on each applicable trading day; (2) during the five business day period after any five consecutive trading day period (the “measurement period”) in which the trading price (as defined in the Indenture) per \$1,000 principal amount of Notes for each trading day of the measurement period was less than 98% of the product of the closing sale price of the Teradyne’s common stock and the conversion rate on each such trading day; and (3) upon the occurrence of specified corporate events. On or after September 15, 2023 until the close of business on the second scheduled trading day immediately preceding the maturity date, holders may convert their Notes at any time, regardless of the foregoing circumstances. Teradyne may satisfy its conversion obligation by paying or delivering cash, shares of its common stock or a combination of cash and shares of its common stock, at Teradyne’s election. The conversion rate for the Notes will initially be 31.4102 shares per \$1,000 principal amount, which is equivalent to an initial conversion price of approximately \$31.84 per share of Teradyne’s common stock. The conversion rate is subject to adjustment under certain circumstances.

Concurrent with the offering of the Notes, Teradyne entered into convertible note hedge transactions (the “Note Hedge Transactions”) with the initial purchasers or their affiliates (the “Option Counterparties”). The Note Hedge Transactions cover, subject to customary anti-dilution adjustments, the number of shares of the common stock that underlie the Notes, with a strike price equal to the initial conversion price of the Notes of \$31.84. The Note Hedge Transactions cover, subject to customary anti-dilution adjustments, approximately 14.4 million shares of Teradyne’s common stock.

The convertible note hedge is considered indexed to Teradyne’s stock as the terms of the Note Hedge Transactions do not contain an exercise contingency and the settlement amount equals the difference between the fair value of a fixed number of Teradyne’s shares and a fixed strike price. Because the only variable that can affect the settlement amount is Teradyne’s stock price, which is an input to the fair value of a fixed-for-fixed option contract, the convertible note hedge is considered indexed to Teradyne’s stock.

Separately and concurrent with the pricing of the Notes, Teradyne entered into warrant transactions with the Option Counterparties (the “Warrant Transactions”) in which it sold net-share-settled (or, at its election subject to certain conditions, cash-settled) warrants to the Option Counterparties. The Warrant Transactions cover, subject to customary anti-dilution adjustments, approximately 14.4 million shares of common stock. The strike price of the warrants will initially be \$39.95 per share (subject to adjustment). The Warrant Transactions could have a dilutive effect to Teradyne’s common stock to the extent that the market price per share of Teradyne’s common stock, as measured under the terms of the Warrant Transactions, exceeds the applicable strike price of the warrants.

The Note Hedge Transactions are expected to reduce the potential dilution to Teradyne’s common stock upon any conversion of the Notes. However, the Warrant Transactions could separately have a dilutive effect to the extent that the market value per share of Teradyne’s common stock exceeds the applicable strike price of the warrant.

In connection with establishing their initial hedge of these convertible note hedge and warrant transactions, the Option Counterparties have entered into various derivative transactions with respect to Teradyne’s common stock and/or purchased shares of Teradyne’s common stock or other securities, including the Notes, concurrent with, or shortly after, the pricing of the Notes. In addition, the Option Counterparties may modify their hedge positions by entering into or unwinding various derivative transactions with respect to Teradyne’s common stock or by selling Teradyne’s common stock or other securities, including the Notes, in secondary market transactions (and may do so during any observation period related to the conversion of the Notes). These activities could adversely affect the value of Teradyne’s common stock and the Notes.

Teradyne’s effective annual interest rate on the Notes is 5.0%. The Notes are classified as long-term debt in the balance sheet based on their December 15, 2023 maturity date. Debt issuance costs of approximately \$7.2 million are being amortized to interest expense over the seven year term of the Notes. As of April 2, 2017, unamortized debt issuance costs were \$6.9 million.

[Table of Contents](#)

The notes are classified as long-term debt in the consolidated balance sheets at April 2, 2017 and December 31, 2016. The below tables represent the key components of Teradyne's convertible senior notes:

	April 2, 2017	December 31, 2016
	(in thousands)	
Debt Principal	\$460,000	\$ 460,000
Unamortized discount	104,063	107,331
Net Carrying amount of convertible debt	<u>\$355,937</u>	<u>\$ 352,669</u>

	For the Three Months Ended April 2, 2017	
	(in thousands)	
Contractual interest expense on the coupon	\$	1,438
Amortization of the discount component and debt issue fees recognized as interest expense		3,268
Total interest expense on the convertible debt	<u>\$</u>	<u>4,706</u>

As of April 2, 2017, the remaining unamortized discount was \$104.1 million, which will be amortized over 6.8 years using the effective interest rate method. The carrying amount of the equity component was \$100.8 million. As of April 2, 2017, the conversion rate was equal to the initial conversion price of approximately \$31.84 per share and the if-converted value of the Notes was \$449.3 million.

### Revolving Credit Facility

On April 27, 2015, Teradyne entered into a Credit Agreement (the "Credit Agreement") with Barclays Bank PLC, as administrative agent and collateral agent, and the lenders party thereto. The Credit Agreement provides for a five-year, senior secured revolving credit facility of up to \$350 million (the "Credit Facility"). The Credit Agreement further provides that, subject to customary conditions, Teradyne may seek to obtain from existing or new lenders incremental commitments under the Credit Facility in an aggregate principal amount not to exceed \$150 million.

Proceeds from the Credit Facility may be used for general corporate purposes and working capital. Teradyne incurred \$2.3 million in costs related to the revolving credit facility. These costs are being amortized over the five-year term of the revolving credit facility and are included in interest expense in the statement of operations. As of May 12, 2017, Teradyne has not borrowed any funds under the Credit Facility.

The interest rates applicable to loans under the Credit Facility are, at Teradyne's option, equal to either a base rate plus a margin ranging from 0.00% to 1.00% per annum or LIBOR plus a margin ranging from 1.00% to 2.00% per annum, based on the Consolidated Leverage Ratio of Teradyne and its Restricted Subsidiaries. In addition, Teradyne will pay a commitment fee on the unused portion of the commitments under the Credit Facility ranging from 0.125% to 0.350% per annum, based on the then applicable Consolidated Leverage Ratio.

Teradyne is not required to repay any loans under the Credit Facility prior to maturity, subject to certain customary exceptions. Teradyne is permitted to prepay all or any portion of the loans under the Credit Facility prior to maturity without premium or penalty, other than customary LIBOR breakage costs.

The Credit Agreement contains customary events of default, representations, warranties and affirmative and negative covenants that, among other things, limit Teradyne's and its Restricted Subsidiaries' ability to sell assets, grant liens on assets, incur other secured indebtedness and make certain investments and restricted payments, all subject to exceptions set forth in the Credit Agreement. The Credit Agreement also requires Teradyne to satisfy two financial ratios measured as of the end of each fiscal quarter: a consolidated leverage ratio and an interest coverage ratio. As of May 12, 2017, Teradyne was in compliance with all covenants.

The Credit Facility is guaranteed by certain of Teradyne's domestic subsidiaries and collateralized by assets of Teradyne and such subsidiaries, including a pledge of 65% of the capital stock of certain foreign subsidiaries.

**G. PREPAYMENTS**

Prepayments consist of the following and are included in prepayments on the balance sheet:

	April 2, 2017	December 31, 2016
	(in thousands)	
Contract manufacturer and supplier prepayments	\$ 83,398	\$ 84,473
Prepaid maintenance and other services	7,210	7,676
Prepaid taxes	3,326	4,664
Other prepayments	13,053	11,641
Total prepayments	<u>\$ 106,987</u>	<u>\$ 108,454</u>

**H. DEFERRED REVENUE AND CUSTOMER ADVANCES**

Deferred revenue and customer advances consist of the following and are included in short and long-term deferred revenue and customer advances on the balance sheet:

	April 2, 2017	December 31, 2016
	(in thousands)	
Extended warranty	\$ 44,053	\$ 46,753
Equipment maintenance and training	41,995	39,037
Customer advances, undelivered elements and other	18,729	22,151
Total deferred revenue and customer advances	<u>\$ 104,777</u>	<u>\$ 107,941</u>

**I. PRODUCT WARRANTY**

Teradyne generally provides a one-year warranty on its products, commencing upon installation, acceptance, delivery or shipment. A provision is recorded upon revenue recognition to cost of revenues for estimated warranty expense based on historical experience. Related costs are charged to the warranty accrual as incurred. The warranty balance below is included in other accrued liabilities on the balance sheet.

	For the Three Months Ended	
	April 2, 2017	April 3, 2016
	(in thousands)	
Balance at beginning of period	\$ 7,203	\$ 6,925
Accruals for warranties issued during the period	3,021	3,490
Adjustments related to pre-existing warranties	(471)	243
Settlements made during the period	(2,699)	(3,162)
Balance at end of period	<u>\$ 7,054</u>	<u>\$ 7,496</u>

When Teradyne receives revenue for extended warranties beyond one year, it is deferred and recognized on a straight-line basis over the contract period. Related costs are expensed as incurred. The extended warranty balance below is included in short and long-term deferred revenue and customer advances on the balance sheet.

	For the Three Months Ended	
	April 2, 2017	April 3, 2016
	(in thousands)	
Balance at beginning of period	\$46,753	\$46,499
Deferral of new extended warranty revenue	6,125	6,827
Recognition of extended warranty deferred revenue	(8,825)	(7,211)
Balance at end of period	<u>\$44,053</u>	<u>\$46,115</u>

## J. STOCK-BASED COMPENSATION

Under Teradyne's stock compensation plans, Teradyne grants stock options, restricted stock units and performance-based restricted stock units, and employees are eligible to purchase Teradyne's common stock through its Employee Stock Purchase Plan ("ESPP").

Stock options to purchase Teradyne's common stock at 100% of the fair market value on the grant date vest in equal annual installments over four years from the grant date and have a maximum term of seven years.

Time-based restricted stock unit awards granted to employees vest in equal annual installments over four years. Restricted stock unit awards granted to non-employee directors vest after a one year period, with 100% of the award vesting on the first anniversary of the grant date. Teradyne expenses the cost of the restricted stock unit awards subject to time-based vesting, which is determined to be the fair market value of the shares at the date of grant, ratably over the period during which the restrictions lapse.

Commencing in January 2014, Teradyne granted performance-based restricted stock units ("PRSUs") to its executive officers with a performance metric based on relative total shareholder return ("TSR"). For TSR grants issued in 2014 and 2015, Teradyne's three-year TSR performance is measured against the Philadelphia Semiconductor Index. For TSR grants issued in 2016 and 2017, Teradyne's three-year TSR performance is measured against the New York Stock Exchange ("NYSE") Composite Index. The final number of TSR PRSUs that vest will vary based upon the level of performance achieved from 200% to 0% of the target shares. The TSR PRSUs will vest upon the three-year anniversary of the grant date. The TSR PRSUs are valued using a Monte Carlo simulation model. The number of units expected to be earned, based upon the achievement of the TSR market condition, is factored into the grant date Monte Carlo valuation. Compensation expense is recognized on a straight-line basis over the three-year service period. Compensation expense is recognized regardless of the eventual number of units that are earned based upon the market condition, provided the executive officer remains an employee at the end of the three-year period. Compensation expense is reversed if at any time during the three-year service period the executive officer is no longer an employee, subject to the retirement and termination eligibility provisions noted below.

In January 2017 and 2016, Teradyne granted PRSUs to its executive officers with a performance metric based on three-year cumulative non-GAAP profit before interest and tax ("PBIT") as a percent of Teradyne's revenue. Non-GAAP PBIT is a financial measure equal to GAAP income from operations less restructuring and other, net; amortization of acquired intangible assets; acquisition and divestiture related charges or credits; pension actuarial gains and losses; non-cash convertible debt interest expense; and other non-recurring gains and charges. The final number of PBIT PRSUs that vest will vary based upon the level of performance achieved from 200% to 0% of the target shares. The PBIT PRSUs will vest upon the three-year anniversary of the grant date. Compensation expense is recognized on a straight-line basis over the three-year service period. Compensation expense is recognized based on the number of units that are earned based upon the three-year Teradyne PBIT as a percent of Teradyne's revenue, provided the executive officer remains an employee at the end of the three-year period subject to the retirement and termination eligibility provisions noted below.

Beginning with PRSUs granted in January 2014, if the recipient's employment ends prior to the determination of the performance percentage due to (1) permanent disability or death or (2) retirement or termination other than for cause, after attaining both at least age sixty and at least ten years of service, then all or a portion of the recipient's PRSUs (based on the actual performance percentage achieved on the determination date) will vest on the date the performance percentage is determined. Except as set forth in the preceding sentence, no PRSUs will vest if the executive officer is no longer an employee at the end of the three-year period.

[Table of Contents](#)

During the three months ended April 2, 2017 and April 3, 2016, Teradyne granted 0.1 million and 0.1 million TSR PRSUs, respectively, with a grant date fair value of \$35.66 and \$20.29, respectively. The fair value was estimated using the Monte Carlo simulation model with the following assumptions:

	For the Three Months Ended	
	April 2, 2017	April 3, 2016
Risk-free interest rate	1.5%	1.0%
Teradyne volatility-historical	26.6%	27.0%
NYSE Composite Index volatility-historical	13.4%	13.1%
Dividend yield	1.0%	1.2%

Expected volatility was based on the historical volatility of Teradyne's stock and the NYSE Composite Index for the 2017 and 2016 grant over the most recent three year period. The risk-free interest rate was determined using the U.S. Treasury yield curve in effect at the time of grant. Dividend yield was based upon an estimated annual dividend amount of \$0.28 per share for 2017 grants and \$0.24 per share for 2016 grants, divided by Teradyne's stock price on the grant date of \$28.56 for the 2017 grant and \$19.43 for the 2016 grant.

During the three months ended April 2, 2017 and April 3, 2016, Teradyne granted 0.1 million and 0.1 million, respectively of PBIT PRSUs with a grant date fair value of \$27.72 and \$18.71, respectively.

During the three months ended April 2, 2017, Teradyne granted 0.8 million of service-based restricted stock unit awards to employees at a weighted average grant date fair value of \$27.86 and 0.1 million of service-based stock options to executive officers at a weighted average grant date fair value of \$7.13.

During the three months ended April 3, 2016, Teradyne granted 1.2 million of service-based restricted stock unit awards to employees at a weighted average grant date fair value of \$18.83 and 0.1 million of service-based stock options to executive officers at a weighted average grant date fair value of \$5.30.

Restricted stock unit awards granted to employees vest in equal annual installments over four years. Stock options vest in equal annual installments over four years and have a term of seven years from the date of grant.

The fair value of stock options was estimated using the Black-Scholes option-pricing model with the following assumptions:

	For the Three Months Ended	
	April 2, 2017	April 3, 2016
Expected life (years)	5.0	5.0
Risk-free interest rate	2.0%	1.4%
Volatility-historical	27.8%	32.9%
Dividend yield	1.0%	1.2%

Teradyne determined the stock options' expected life based upon historical exercise data for executive officers, the age of the executive officers and the terms of the stock option grant. Volatility was determined using historical volatility for a period equal to the expected life. The risk-free interest rate was determined using the U.S. Treasury yield curve in effect at the time of grant. Dividend yield was based upon an estimated annual dividend amount of \$0.28 per share for 2017 grants and \$0.24 per share for 2016 grants, divided by Teradyne's stock price on the grant date, of \$28.56 for the 2017 grant and \$19.43 for the 2016 grant.

**K. ACCUMULATED OTHER COMPREHENSIVE (LOSS) INCOME**

Changes in accumulated other comprehensive (loss) income, which is presented net of tax, consist of the following:

	<b>Foreign Currency Translation Adjustment</b>	<b>Unrealized Gains (Losses) on Marketable Securities</b>	<b>Retirement Plans Prior Service Credit</b>	<b>Total</b>
	(in thousands)			
<b>Three Months Ended April 2, 2017</b>				
Balance at December 31, 2016, net of tax of \$0, \$209, \$(778)	\$ (21,921)	\$ (60)	\$ 1,767	\$(20,214)
Other comprehensive income before reclassifications, net of tax of \$0, \$420, \$0	8,963	513	—	9,476
Amounts reclassified from accumulated other comprehensive income, net of tax of \$0, \$(64), \$(38)	—	(95)	(68)	(163)
Net current period other comprehensive income (loss), net of tax of \$0, \$356, \$(38)	8,963	418	(68)	9,313
Balance at April 2, 2017, net of tax of \$0, \$565, \$(816)	<u>\$ (12,958)</u>	<u>\$ 358</u>	<u>\$ 1,699</u>	<u>\$(10,901)</u>

	(in thousands)			
<b>Three Months Ended April 3, 2016</b>				
Balance at December 31, 2015, net of tax of \$0, \$(459), \$(622)	\$ (8,759)	\$ (1,414)	\$ 2,029	\$ (8,144)
Other comprehensive income before reclassifications, net of tax of \$0, \$1,253, \$0	10,271	3,071	—	13,342
Amounts reclassified from accumulated other comprehensive income, net of tax of \$0, \$11, \$(46)	—	(83)	(80)	(163)
Net current period other comprehensive income (loss), net of tax of \$0, \$1,264, \$(46)	10,271	2,988	(80)	13,179
Balance as April 3, 2016, net of tax of \$0, \$805, \$(668)	<u>\$ 1,512</u>	<u>\$ 1,574</u>	<u>\$ 1,949</u>	<u>\$ 5,035</u>

Reclassifications out of accumulated other comprehensive (loss) income to the statement of operations for the three months ended April 2, 2017 and April 3, 2016 were as follows:

<b>Details about Accumulated Other Comprehensive (Loss) Income Components</b>	<b>For the Three Months Ended</b>		<b>Affected Line Item in the Statements of Operations</b>
	<b>April 2, 2017</b>	<b>April 3, 2016</b>	
	(in thousands)		
Available-for-sale marketable securities:			
Unrealized gains, net of tax of \$64, \$(11)	\$ 95	\$ 83	Interest income
Defined benefit pension and postretirement plans:			
Amortization of prior service benefit, net of tax of \$38, \$46	68	80	(a)
Total reclassifications, net of tax of \$102, \$35	<u>\$ 163</u>	<u>\$ 163</u>	Net income

(a) The amortization of prior service credit is included in the computation of net periodic pension cost and postretirement benefit; see Note O: "Retirement Plans."

**L. GOODWILL AND INTANGIBLE ASSETS**

*Goodwill*

Teradyne performs its annual goodwill impairment test as required under the provisions of ASC 350-10, “Intangibles—Goodwill and Other” on December 31 of each fiscal year unless interim indicators of impairment exist. Goodwill is considered impaired when the net book value of a reporting unit exceeds its estimated fair value.

The changes in the carrying amount of goodwill by reportable segments for the three months ended April 2, 2017, were as follows:

	<u>Industrial Automation</u>	<u>System Test</u>	<u>Wireless Test</u>	<u>Semiconductor Test</u>	<u>Total</u>
	(in thousands)				
Balance at December 31, 2016					
Goodwill	\$ 204,851	\$ 158,699	\$ 361,819	\$ 260,540	\$ 985,909
Accumulated impairment losses	—	(148,183)	(353,843)	(260,540)	(762,566)
	<u>204,851</u>	<u>10,516</u>	<u>7,976</u>	<u>—</u>	<u>223,343</u>
Foreign currency translation adjustment	6,722	—	—	—	6,722
Balance at April 2, 2017					
Goodwill	211,573	158,699	361,819	260,540	992,631
Accumulated impairment losses	—	(148,183)	(353,843)	(260,540)	(762,566)
	<u>\$ 211,573</u>	<u>\$ 10,516</u>	<u>\$ 7,976</u>	<u>\$ —</u>	<u>\$ 230,065</u>

*Intangible Assets*

Teradyne reviews long-lived assets for impairment whenever events or changes in business circumstances indicate that the carrying amount of the assets may not be fully recoverable or that the useful lives of these assets are no longer appropriate.

Amortizable intangible assets consist of the following and are included in intangible assets, net on the balance sheet:

	<u>April 2, 2017</u>			
	<u>Gross Carrying Amount</u>	<u>Accumulated Amortization</u>	<u>Cumulative Foreign Currency Translation Adjustment</u>	<u>Net Carrying Amount</u>
	(in thousands)			
Developed technology	\$270,877	\$ (211,065)	\$ (3,292)	\$56,520
Customer relationships	92,741	(79,114)	(348)	13,279
Tradenames and trademarks	50,100	(24,331)	(845)	24,924
Non-compete agreement	320	(200)	—	120
Customer backlog	170	(170)	—	—
Total intangible assets	<u>\$414,208</u>	<u>\$ (314,880)</u>	<u>\$ (4,485)</u>	<u>\$94,843</u>

	December 31, 2016			
	Gross Carrying Amount	Accumulated Amortization	Cumulative Foreign Currency Translation Adjustment	Net Carrying Amount
	(in thousands)			
Developed technology	\$270,877	\$ (206,376)	\$ (5,093)	\$ 59,408
Customer relationships	92,741	(76,707)	(538)	15,496
Tradenames and trademarks	50,100	(23,435)	(1,308)	25,357
Non-compete agreement	320	(180)	—	140
Customer backlog	170	(170)	—	—
Total intangible assets	<u>\$414,208</u>	<u>\$ (306,868)</u>	<u>\$ (6,939)</u>	<u>\$ 100,401</u>

Aggregate intangible asset amortization expense was \$8.0 million and \$20.0 million, respectively, for the three months ended April 2, 2017 and April 3, 2016.

Estimated intangible asset amortization expense for each of the five succeeding fiscal years is as follows:

Year	Amortization Expense (in thousands)
2017 (remainder)	21,621
2018	27,475
2019	23,622
2020	10,325
2021	3,504
Thereafter	8,296

#### M. NET INCOME PER COMMON SHARE

The following table sets forth the computation of basic and diluted net income per common share:

	For the Three Months Ended	
	April 2, 2017	April 3, 2016
	(in thousands, except per share amounts)	
Net income for basic and diluted net income per share	\$ 85,221	\$ 49,986
Weighted average common shares-basic	200,005	204,271
Effect of dilutive potential common shares:		
Restricted stock units	1,533	965
Stock options	390	487
Employee stock purchase plan	8	9
Dilutive potential common shares	<u>1,931</u>	<u>1,461</u>
Weighted average common shares-diluted	201,936	205,732
Net income per common share-basic	<u>\$ 0.43</u>	<u>\$ 0.24</u>
Net income per common share-diluted	<u>\$ 0.42</u>	<u>\$ 0.24</u>

The computation of diluted net income per common share for the three months ended April 2, 2017 excludes the effect of the potential exercise of stock options to purchase approximately 0.1 million shares because the effect would have been anti-dilutive.

The computation of diluted net income per common share for the three months ended April 3, 2016 excludes the effect of the potential exercise of stock options to purchase approximately 0.3 million shares because the effect would have been anti-dilutive.

**N. RESTRUCTURING AND OTHER**

During the three months ended April 2, 2017, Teradyne recorded \$1.9 million of restructuring charges of which \$1.3 million was for a lease impairment of a Wireless Test facility in Sunnyvale, CA and \$0.6 million was for employee severance charges. The Sunnyvale, CA lease expires in 2020. The accrual for the future lease payments liability is reflected in other accrued liabilities and is expected to be paid over the term of the lease.

During the three months ended April 2, 2017 and April 3, 2016, Teradyne recorded \$0.6 million and \$1.2 million, respectively, of other charges for the increase in the fair value of the Universal Robots contingent consideration liability.

During the three months ended April 3, 2016, Teradyne recorded \$0.4 million of employee severance charges.

**O. RETIREMENT PLANS**

ASC 715, “*Compensation—Retirement Benefits*” requires an employer with defined benefit plans or other postretirement benefit plans to recognize an asset or a liability on its balance sheet for the overfunded or underfunded status of the plans. The pension asset or liability represents a difference between the fair value of the pension plan’s assets and the projected benefit obligation.

***Defined Benefit Pension Plans***

Teradyne has defined benefit pension plans covering a portion of domestic employees and employees of certain non-U.S. subsidiaries. Benefits under these plans are based on employees’ years of service and compensation. Teradyne’s funding policy is to make contributions to these plans in accordance with local laws and to the extent that such contributions are tax deductible. The assets of these plans consist primarily of fixed income and equity securities. In addition, Teradyne has an unfunded supplemental executive defined benefit plan in the United States to provide retirement benefits in excess of levels allowed by the Employment Retirement Income Security Act (“ERISA”) and the Internal Revenue Code (“IRC”), as well as unfunded qualified foreign plans.

In the three months ended April 2, 2017, Teradyne contributed \$0.6 million to the U.S. supplemental executive defined benefit pension plan and \$0.2 million to certain qualified plans for non-U.S. subsidiaries.

For the three months ended April 2, 2017 and April 3, 2016, Teradyne’s net periodic pension cost (income) was comprised of the following:

	For the Three Months Ended			
	April 2, 2017		April 3, 2016	
	United States	Foreign	United States	Foreign
	(in thousands)			
Service cost	\$ 560	\$ 185	\$ 576	\$ 207
Interest cost	3,312	163	3,414	206
Expected return on plan assets	(3,000)	(6)	(3,443)	(5)
Amortization of prior service cost	18	—	24	—
Net actuarial gain	—	—	(1,193)	—
Settlement	—	—	—	(239)
<b>Total net periodic pension cost (income)</b>	<b><u>\$ 890</u></b>	<b><u>\$ 342</u></b>	<b><u>\$ (622)</u></b>	<b><u>\$ 169</u></b>

***Postretirement Benefit Plan***

In addition to receiving pension benefits, U.S. Teradyne employees who meet early retirement eligibility requirements as of their termination dates may participate in Teradyne’s Welfare Plan, which includes medical and dental benefits up to age 65. Death benefits provide a fixed sum to retirees’ survivors and are available to all retirees. Substantially all of Teradyne’s current U.S. employees could become eligible for these benefits, and the existing benefit obligation relates primarily to those employees.

[Table of Contents](#)

For the three months ended April 2, 2017 and April 3, 2016, Teradyne's net periodic postretirement income was comprised of the following:

	For the Three Months Ended	
	April 2, 2017	April 3, 2016
	(in thousands)	
Service cost	\$ 10	\$ 10
Interest cost	50	56
Amortization of prior service benefit	(124)	(150)
Total net periodic post-retirement benefit	<u>\$ (64)</u>	<u>\$ (84)</u>

## P. COMMITMENTS AND CONTINGENCIES

### *Purchase Commitments*

As of April 2, 2017, Teradyne had entered into purchase commitments for certain components and materials. The purchase commitments covered by the agreements aggregate to approximately \$292.0 million, of which \$281.7 million is for less than one year.

### *Legal Claims*

Teradyne is subject to various legal proceedings and claims which have arisen in the ordinary course of business. In the opinion of management, the ultimate disposition of these matters will not have a material adverse effect on Teradyne's results of operations, financial condition or cash flows.

## Q. INCOME TAXES

The effective tax rate for the three months ended April 2, 2017 and April 3, 2016 was 7.4% and 12.6%, respectively.

The decrease in the effective tax rate from the three months ended April 3, 2016 to the three months ended April 2, 2017 resulted from an increase in the discrete benefit from stock based compensation, a projected shift in the geographic distribution of income which decreased income subject to taxation in the U.S. relative to lower tax rate jurisdictions and a decrease in the discrete benefit from non-taxable foreign exchange gains.

The effective tax rates for the three months ended April 2, 2017 and April 3, 2016 differed from the expected federal statutory rate of 35% primarily because of the favorable effect of statutory rates applicable to income earned outside the United States.

The tax rate for the three months ended April 2, 2017 and April 3, 2016 was also reduced by the benefit from U.S. research and development tax credits, partially offset by additions to the uncertain tax positions for transfer pricing, both of which are included in the projected annual effective tax rate.

Discrete tax benefits recorded in the three months ended April 2, 2017 amounted to \$7.0 million of which \$5.5 million resulted from stock based compensation, \$0.7 million related to U.S. research and development tax credits and \$0.8 million from other discrete tax benefits. The \$5.5 million of discrete benefit from stock based compensation included \$5.2 million of excess tax benefits recognized pursuant to ASU No. 2016-09 "Improvements to Employee Share-Based Payment Accounting."

Discrete tax benefits recorded in the three months ended April 3, 2016 amounted to \$2.5 million of which \$1.2 million resulted from non-taxable foreign exchange gains, \$0.9 million related to marketable securities and \$0.4 million from other discrete tax benefits.

On a quarterly basis, Teradyne evaluates the realizability of the deferred tax assets by jurisdiction and assesses the need for a valuation allowance. As of April 2, 2017, Teradyne believes that it will ultimately realize the deferred tax assets recorded on the condensed consolidated balance sheet. However, should Teradyne believe that it is more-likely-than-not that the deferred tax assets would not be realized, the tax provision would increase in the period in which Teradyne determined that the realizability was not likely. Teradyne considers the probability of future taxable income and historical profitability, among other factors, in assessing the realizability of the deferred tax assets.

[Table of Contents](#)

As of April 2, 2017 and December 31, 2016, Teradyne had \$40.7 million and \$39.0 million, respectively, of reserves for uncertain tax positions. The \$1.7 million net increase in reserves for uncertain tax positions is primarily composed of additions related to transfer pricing exposures and U.S. research and development tax credits.

As of April 2, 2017, Teradyne estimates that it is reasonably possible that the balance of uncertain tax positions may decrease approximately \$0.8 million in the next twelve months, as a result of a lapse of statutes of limitation. The estimated decrease is comprised primarily of reserves relating to U.S. research and development credits.

Teradyne recognizes interest and penalties related to income tax matters in income tax expense. As of April 2, 2017 and December 31, 2016, \$0.3 million and \$0.4 million, respectively, of interest and penalties were accrued for uncertain tax positions. For the three months ended April 2, 2017, a benefit of \$0.1 million was recorded for interest and penalties related to income tax items. For the three months ended April 3, 2016, an expense of \$0.3 million was recorded for interest and penalties related to income tax items.

Teradyne qualifies for a tax holiday in Singapore by fulfilling the requirements of an agreement with the Singapore Economic Development Board under which certain headcount and spending requirements must be met. The tax savings due to the tax holiday for the three months ended April 2, 2017 was \$4.7 million, or \$0.02 per diluted share. The tax savings due to the tax holiday for the three months ended April 3, 2016 was \$2.6 million, or \$0.01 per diluted share. The tax holiday is scheduled to expire on December 31, 2020.

## R. SEGMENT INFORMATION

Teradyne has four operating segments (Semiconductor Test, System Test, Industrial Automation and Wireless Test), which are its reportable segments. The Semiconductor Test segment includes operations related to the design, manufacturing and marketing of semiconductor test products and services. The System Test segment includes operations related to the design, manufacturing and marketing of products and services for defense/aerospace instrumentation test, storage test and circuit-board test. The Industrial Automation segment includes operations related to the design, manufacturing and marketing of collaborative robots. The Wireless Test segment includes operations related to the design, manufacturing and marketing of wireless test products and services. Each operating segment has a segment manager who is directly accountable to and maintains regular contact with Teradyne's chief operating decision maker (Teradyne's chief executive officer) to discuss operating activities, financial results, forecasts, and plans for the segment.

Teradyne evaluates performance based on several factors, of which the primary financial measure is business segment income (loss) before income taxes. The accounting policies of the business segments in effect are described in Note B: "Accounting Policies" in Teradyne's Annual Report on Form 10-K for the year ended December 31, 2016.

Segment information for the three months ended April 2, 2017 and April 3, 2016 is as follows:

	Semiconductor Test	System Test	Industrial Automation	Wireless Test	Corporate and Eliminations	Consolidated
	(in thousands)					
<b>Three Months Ended April 2, 2017</b>						
Revenues	\$ 355,528	\$ 39,845	\$ 36,272	\$ 25,268	\$ —	\$ 456,913
Income (loss) before income taxes (1)(2)	97,966	(2,759)	(2,571)	1,532	(2,152)	92,016
Total assets (3)	740,334	106,754	331,016	61,356	1,602,820	2,842,280
<b>Three Months Ended April 3, 2016</b>						
Revenues	\$ 340,264	\$ 53,670	\$ 16,746	\$ 20,314	\$ —	\$ 430,994
Income (loss) before income taxes (1)(2)	73,254	9,492	(7,168)	(20,140)	1,754	57,192
Total assets (3)	664,555	90,695	350,589	408,466	1,034,669	2,548,974

- (1) Interest income, interest expense, contingent consideration adjustments, pension and post retirement plans actuarial gains and other income (expense) are included in Corporate and Eliminations.
- (2) Included in the income (loss) before income taxes for each of the segments are charges and credits related to inventory and other.
- (3) Total business assets are directly attributable to each business. Corporate assets consist of cash and cash equivalents, marketable securities and certain other assets.

[Table of Contents](#)

Included in the Semiconductor Test segment are charges and credits in the following line items in the statements of operations:

	For the Three Months Ended	
	April 2, 2017	April 3, 2016
	(in thousands)	
Cost of revenues—inventory charge	\$ 1,319	\$ 3,685
Restructuring and other	(265)	414

Included in the System Test segment are charges in the following line item in the statements of operations:

	For the Three Months Ended	
	April 2, 2017	April 3, 2016
	(in thousands)	
Cost of revenues—inventory charge	\$ 885	\$ —

Included in the Industrial Automation segment are charges in the following line item in the statements of operations:

	For the Three Months Ended	
	April 2, 2017	April 3, 2016
	(in thousands)	
Restructuring and other	\$ 624	\$ —

Included in the Wireless Test segment are charges in the following line items in the statements of operations:

	For the Three Months Ended	
	April 2, 2017	April 3, 2016
	(in thousands)	
Restructuring and other—lease impairment	\$ 1,313	\$ —
Cost of revenues—inventory charge	522	605

Included in Corporate and Eliminations are charges in the following line items in the statements of operations:

	For the Three Months Ended	
	April 2, 2017	April 3, 2016
	(in thousands)	
Restructuring and other—Universal Robots contingent consideration adjustment	\$ 634	\$ 1,173
Restructuring and other	205	—

## S. SHAREHOLDERS' EQUITY

### *Stock Repurchase Program*

In December 2016, the Board of Directors approved a \$500 million share repurchase authorization which commenced on January 1, 2017. Teradyne intends to repurchase at least \$200 million in 2017. During the three months ended April 2, 2017, Teradyne repurchased 1.3 million shares of common stock for \$37.7 million at an average price of \$29.38 per share.

---

[Table of Contents](#)

During the three months ended April 3, 2016, Teradyne repurchased 1.5 million shares of common stock for \$28.0 million at an average price of \$18.81 per share.

The total price includes commissions and is recorded as a reduction to retained earnings.

***Dividend***

Holders of Teradyne's common stock are entitled to receive dividends when they are declared by Teradyne's Board of Directors.

In January 2017, Teradyne's Board of Directors declared a quarterly cash dividend of \$0.07 per share. Dividend payments for the three months ended April 2, 2017 were \$14.0 million.

In January 2016, Teradyne's Board of Directors declared a quarterly cash dividend of \$0.06 per share. Dividend payments for the three months ended April 3, 2016 were \$12.3 million.

While Teradyne declared a quarterly cash dividend and authorized a share repurchase program, it may reduce or eliminate the cash dividend or share repurchase program in the future. Future cash dividends and stock repurchases are subject to the discretion of Teradyne's Board of Directors which will consider, among other things, Teradyne's earnings, capital requirements and financial condition.

## **Item 2: Management’s Discussion and Analysis of Financial Condition and Results of Operations**

Statements in this Quarterly Report on Form 10-Q which are not historical facts, so called “forward-looking statements,” are made pursuant to the safe harbor provisions of Section 21E of the Securities Exchange Act of 1934, as amended. Investors are cautioned that all forward-looking statements involve risks and uncertainties, including those detailed in our filings with the Securities and Exchange Commission. See also Part II, Item 1A of this Quarterly Report on Form 10-Q and Part I, Item 1A “Risk Factors” in our Annual Report on Form 10-K for the year ended December 31, 2016. Readers are cautioned not to place undue reliance on these forward-looking statements which reflect management’s analysis only as of the date hereof. We assume no obligation to update these forward-looking statements to reflect actual results or changes in factors or assumptions affecting forward-looking statements, except as may be required by law.

### **Overview**

We are a leading global supplier of automation equipment for test and industrial applications. We design, develop, manufacture and sell automatic test systems used to test semiconductors, wireless products, data storage and complex electronics systems in the consumer electronics, wireless, automotive, industrial, computing, communications, and aerospace and defense industries. Our industrial automation products include collaborative robots used by global manufacturing and light industrial customers to improve quality, increase manufacturing efficiency and decrease manufacturing costs. Our automatic test equipment and industrial automation products and services include:

- semiconductor test (“Semiconductor Test”) systems;
- defense/aerospace (“Defense/Aerospace”) test instrumentation and systems, storage test (“Storage Test”) systems, and circuit-board test and inspection (“Production Board Test”) systems (collectively these products represent “System Test”);
- industrial automation (“Industrial Automation”) products; and
- wireless test (“Wireless Test”) systems.

We have a broad customer base which includes integrated device manufacturers (“IDMs”), outsourced semiconductor assembly and test providers (“OSATs”), original equipment manufacturers (“OEMs”), wafer foundries, fabless companies that design, but contract with others for the manufacture of integrated circuits (“ICs”), developers of wireless devices and consumer electronics, manufacturers of circuit boards, automotive suppliers, wireless product manufacturers, storage device manufacturers, aerospace and military contractors, and distributors that sell collaborative robots.

The market for our test products is concentrated with a limited number of significant customers accounting for a substantial portion of the purchases of test equipment. One customer drives significant demand for our products both through direct sales and sales to the customer’s supply partners. We expect that sales of our test products will continue to be concentrated with a limited number of significant customers for the foreseeable future.

In 2015, we acquired Universal Robots A/S (“Universal Robots”), the leading supplier of collaborative robots which are low-cost, easy-to-deploy and simple-to-program robots that work side by side with production workers to improve quality, increase manufacturing efficiency and decrease manufacturing costs. Universal Robots is a separate operating and reportable segment, Industrial Automation. The acquisition of Universal Robots provides a growth engine to our business and complements our existing System Test and Wireless Test segments. The total purchase price for Universal Robots was approximately \$315 million, which included cash paid of approximately \$284 million and \$32 million in fair value of contingent consideration payable upon achievement of revenue and earnings targets through 2018. Contingent consideration paid for 2015 was \$15 million. The remaining maximum contingent consideration that could be paid is \$50 million.

We believe our recent acquisitions have enhanced our opportunities for growth. We intend to continue to invest in our business, grow market share in our markets and expand further our addressable markets while tightly managing our costs.

The sales of our products and services are dependent, to a large degree, on customers who are subject to cyclical trends in the demand for their products. These cyclical periods have had, and will continue to have, a significant effect on our business because our customers often delay or accelerate purchases in reaction to changes in their businesses and to demand fluctuations in the semiconductor and electronics industries. Historically, these demand fluctuations have resulted in significant variations in our results of operations. The sharp swings in the semiconductor and electronics industries have generally affected the semiconductor and electronics test equipment and services industries more significantly than the overall capital equipment sector.

---

[Table of Contents](#)

For several years, this cyclical demand became an even/odd year trend where demand increased in even years and decreased in odd years due principally to demand swings in the mobility market of our Semiconductor Test business. We expect the even/odd year demand trend in the mobility market to lessen in 2017 and future years due to slower smart phone unit growth, along with rising device complexity and the reduced impact of parallel test in our Semiconductor Test business.

**Critical Accounting Policies and Estimates**

We have identified the policies which are critical to understanding our business and our results of operations. There have been no significant changes during the three months ended April 2, 2017 to the items disclosed as our critical accounting policies and estimates in Management's Discussion and Analysis of Financial Condition and Results of Operations in our Annual Report on Form 10-K for the fiscal year ended December 31, 2016.

**SELECTED RELATIONSHIPS WITHIN THE CONDENSED CONSOLIDATED  
STATEMENTS OF OPERATIONS**

	For the Three Months Ended	
	April 2, 2017	April 3, 2016
Percentage of revenues:		
Revenues:		
Products	82%	83%
Services	18	17
Total revenues	<u>100</u>	<u>100</u>
Cost of revenues:		
Cost of products	34	39
Cost of services	8	8
Total cost of revenues (exclusive of acquired intangible assets amortization shown separately below)	<u>42</u>	<u>47</u>
Gross profit	58	53
Operating expenses:		
Engineering and development	17	17
Selling and administrative	19	18
Acquired intangible assets amortization	2	5
Restructuring and other	1	—
Total operating expenses	<u>38</u>	<u>40</u>
Income from operations	20	13
Non-operating (income) expense:		
Interest income	(1)	—
Interest expense	1	—
Other (income) expense, net	—	—
Income before income taxes	20	13
Income tax provision	1	2
Net income	<u>19%</u>	<u>12%</u>

**Results of Operations**

*First Quarter 2017 Compared to First Quarter 2016*

*Book to Bill Ratio*

Book to bill ratio is calculated as net bookings divided by net sales. Book to bill ratio by reportable segment was as follows:

	For the Three Months Ended	
	April 2, 2017	April 3, 2016
Semiconductor Test	1.3	0.9
System Test	1.2	0.9
Industrial Automation	1.2	1.1
Wireless Test	1.1	1.0
Total Company	1.3	0.9

[Table of Contents](#)*Revenues*

Revenues by our four reportable segments were as follows:

	For the Three Months Ended		Dollar Change
	April 2, 2017	April 3, 2016	
	(in millions)		
Semiconductor Test	\$ 355.5	\$ 340.3	\$ 15.2
System Test	39.8	53.7	(13.9)
Industrial Automation	36.3	16.7	19.6
Wireless Test	25.3	20.3	5.0
	<u>\$ 456.9</u>	<u>\$ 431.0</u>	<u>\$ 25.9</u>

The increase in Semiconductor Test revenues of \$15.2 million, or 4.5%, was driven primarily by increased sales in the microcontroller, power management, automotive safety and flash memory test segments. The decrease in System Test revenues of \$13.9 million, or 25.9%, was primarily due to lower sales in Storage Test of 3.5" hard disk drive testers for cloud storage. The increase in Industrial Automation revenues of \$19.6 million, or 117.4%, was due to higher demand for collaborative robots. The increase in Wireless Test revenues of \$5.0 million, or 24.6%, was primarily due to higher demand for connectivity and cellular test systems and increased service revenue.

Revenues by country as a percentage of total revenues were as follows (1):

	For the Three Months Ended	
	April 2, 2017	April 3, 2016
Taiwan	25%	42%
China	12	9
United States	12	12
Japan	12	11
Malaysia	9	3
Europe	8	7
Korea	7	6
Philippines	6	2
Singapore	5	4
Thailand	2	3
Rest of World	2	1
	<u>100%</u>	<u>100%</u>

(1) Revenues attributable to a country are based on location of customer site.

[Table of Contents](#)*Gross Profit*

Our gross profit was as follows:

	For the Three Months Ended		Dollar/Point Change
	April 2, 2017	April 3, 2016	
Gross profit	\$ 264.9	\$ 230.3	\$ 34.6
Percent of total revenues	58.0%	53.4%	4.6

Gross profit as a percent of revenue increased by 4.6 points, as a result of a 3.6 point increase related to favorable product mix in Semiconductor Test, 0.5 points due to higher sales primarily in Industrial Automation and Semiconductor Test and 0.5 points from lower inventory provisions.

We assess the carrying value of our inventory on a quarterly basis by estimating future demand and comparing that demand against on-hand and on-order inventory positions. Forecasted revenue information is obtained from sales and marketing groups and incorporates factors such as backlog and future revenue demand. This quarterly process identifies obsolete and excess inventory. Obsolete inventory, which represents items for which there is no demand, is fully reserved. Excess inventory, which represents inventory items that are not expected to be consumed during the next twelve quarters for our Semiconductor Test, System Test and Industrial Automation segments and the next four quarters for our Wireless Test segment, is written-down to estimated net realizable value.

During the three months ended April 2, 2017, we recorded an inventory provision of \$2.7 million included in cost of revenues primarily due to downward revisions to previously forecasted demand levels. Of the \$2.7 million of total excess and obsolete provisions, \$1.3 million was related to Semiconductor Test, \$0.9 million was related to System Test, and \$0.5 million was related to Wireless Test.

During the three months ended April 3, 2016, we recorded an inventory provision of \$4.3 million included in cost of revenues primarily due to downward revisions to previously forecasted demand levels. Of the \$4.3 million of total excess and obsolete provisions, \$3.7 million was related to Semiconductor Test, \$0.6 million was related to Wireless Test, and \$0.1 million was related to System Test.

During the three months ended April 2, 2017 and April 3, 2016, we scrapped \$1.8 million and \$0.7 million of inventory, respectively. During the three months ended April 2, 2017 and April 3, 2016, we sold \$0.8 million and \$1.1 million of previously written-down or written-off inventory, respectively. As of April 2, 2017, we had inventory related reserves for inventory which had been written-down or written-off totaling \$115.2 million. We have no pre-determined timeline to scrap the remaining inventory.

*Engineering and Development*

Engineering and development expenses were as follows:

	For the Three Months Ended		Dollar Change
	April 2, 2017	April 3, 2016	
Engineering and development	\$ 76.2	\$ 73.5	\$ 2.7
Percent of total revenues	16.7%	17.0%	

The increase of \$2.7 million in engineering and development expenses was primarily due to higher variable compensation and additional spending in System Test and Industrial Automation, partially offset by lower spending in Wireless Test.

[Table of Contents](#)

*Selling and Administrative*

Selling and administrative expenses were as follows:

	For the Three Months Ended		Dollar Change
	April 2, 2017	April 3, 2016	
	(in millions)		
Selling and administrative	\$ 84.9	\$ 79.2	\$ 5.7
Percent of total revenues	18.6%	18.4%	

The increase of \$5.7 million in selling and administrative expenses was due primarily to higher variable compensation and higher spending in Industrial Automation, partially offset by lower spending in Wireless Test.

*Acquired Intangible Assets Amortization*

Acquired intangible assets amortization expense was as follows:

	For the Three Months Ended		Dollar Change
	April 2, 2017	April 3, 2016	
	(in millions)		
Acquired intangible assets amortization	\$ 8.0	\$ 20.0	\$ (12.0)
Percent of total revenues	1.7%	4.6%	

Acquired intangible assets amortization expense decreased primarily in the Wireless Test segment due to the impairment of intangible assets in the second quarter of 2016.

*Restructuring and Other*

During the three months ended April 2, 2017, we recorded \$1.9 million of restructuring charges of which \$1.3 million was for a lease impairment of a Wireless Test facility in Sunnyvale, CA and \$0.6 million was for employee severance charges. The Sunnyvale, CA lease expires in 2020. The accrual for the future lease payments liability is reflected in other accrued liabilities and is expected to be paid over the term of the lease.

During the three months ended April 2, 2017 and April 3, 2016, we recorded \$0.6 million and \$1.2 million, respectively, of other charges for the increase in the fair value of the Universal Robots contingent consideration liability.

During the three months ended April 3, 2016, we recorded \$0.4 million of employee severance charges.

[Table of Contents](#)*Interest and Other*

	For the Three Months Ended		Dollar Change
	April 2, 2017	April 3, 2016	
	(in millions)		
Interest income	\$ (3.5)	\$ (1.6)	\$ (1.9)
Interest expense	5.4	0.7	4.7
Other (income) expense, net	(0.5)	(0.1)	(0.4)

Interest income increased by \$1.9 million due primarily to higher cash and marketable securities balances in 2017 and higher interest rates in 2017. Interest expense increased by \$4.7 million due primarily to interest expense related to our convertible senior notes. Other (income) expense, net included net foreign exchange gains.

*Income Before Income Taxes*

	For the Three Months Ended		Dollar Change
	April 2, 2017	April 3, 2016	
	(in millions)		
Semiconductor Test	\$ 98.0	\$ 73.3	\$ 24.7
System Test	(2.8)	9.5	(12.3)
Industrial Automation	(2.6)	(7.2)	4.6
Wireless Test	1.5	(20.1)	21.7
Corporate (1)	(2.2)	1.8	(4.0)
	<u>\$ 92.0</u>	<u>\$ 57.2</u>	<u>\$ 34.8</u>

- (1) Included in Corporate are: Interest income, interest expense, contingent consideration adjustments, pension and post retirement plans actuarial gains and other income (expense).

The increase in income before income taxes in Semiconductor Test was driven primarily by increased sales and higher gross margin due to favorable product mix. The decrease in income before income taxes in System Test was primarily due to lower sales in Storage Test of 3.5" hard disk drive testers for cloud storage. The increase in income before income taxes in Industrial Automation was due to higher demand for collaborative robots. The increase in income before income taxes in Wireless Test was primarily due to lower intangible assets amortization, lower operating expenses and higher demand for connectivity and cellular test systems.

*Income Taxes*

The effective tax rate for the three months ended April 2, 2017 and April 3, 2016 was 7.4% and 12.6%, respectively.

The decrease in the effective tax rate from the three months ended April 3, 2016 to three months ended April 2, 2017 resulted from an increase in the discrete benefit from stock based compensation, a projected shift in the geographic distribution of income which decreased income subject to taxation in the U.S. relative to lower tax rate jurisdictions and a decrease in the discrete benefit from non-taxable foreign exchange gains.

## Contractual Obligations

The following table reflects our contractual obligations as of April 2, 2017:

	Payments Due by Period					Other
	Total	Less than 1 year	1-3 years	3-5 years	More than 5 years	
	(in thousands)					
Convertible debt	\$ 460,000	\$ —	\$ —	\$ —	\$460,000	\$ —
Purchase obligations	292,037	281,708	10,329	—	—	—
Retirement plans contributions	114,029	5,407	7,884	9,325	91,413	—
Operating lease obligations	69,676	17,300	28,489	15,475	8,412	—
Interest on long-term debt	40,314	5,814	11,500	11,500	11,500	—
Fair value of contingent consideration	37,916	21,711	16,205	—	—	—
Other long-term liabilities reflected on the balance sheet under GAAP (1)	47,159	—	25,983	—	—	21,176
Total	<u>\$1,061,131</u>	<u>\$331,940</u>	<u>\$100,390</u>	<u>\$36,300</u>	<u>\$571,325</u>	<u>\$21,176</u>

- (1) Included in Other Long-Term Liabilities are liabilities for customer advances, extended warranty, uncertain tax positions, deferred tax liabilities and other obligations. For certain long-term obligations, we are unable to provide a reasonably reliable estimate of the timing of future payments relating to these obligations and therefore we included these amounts in the column marked "Other."

## Liquidity and Capital Resources

Our cash, cash equivalents and marketable securities balances decreased by \$130.4 million in the three months ended April 2, 2017 to \$1,482 million.

In the three months ended April 2, 2017, changes in operating assets and liabilities used cash of \$182.4 million. This was due to a \$184.9 million increase in operating assets and a \$2.5 million increase in operating liabilities.

The increase in operating assets was primarily due to a \$123.8 million increase in accounts receivable due to the delivery profile of first quarter shipments and a \$62.2 million increase in inventories to support increased shipments in the second quarter.

The decrease in operating liabilities was due to a \$31.0 million decrease in accrued employee compensation due primarily to first quarter payments related to variable compensation, a \$3.3 million decrease in deferred revenue and customer advance payments, a \$0.9 million decrease in other accrued liabilities and \$0.9 million of retirement plan contributions, partially offset by a \$24.3 million increase in accounts payable and a \$14.3 million increase in income taxes.

Investing activities during the three months ended April 2, 2017 provided cash of \$126.4 million, due to \$213.6 million and \$88.2 million in proceeds from sales and maturities of marketable securities, respectively, partially offset by \$153.3 used for purchases of marketable securities and \$22.1 million used for purchases of property, plant and equipment.

Financing activities during the three months ended April 2, 2017 used cash of \$50.0 million, due to \$37.7 million used for the repurchase of 1.3 million shares of common stock at an average price of \$29.38 per share, \$14.0 million used for dividend payments, \$12.3 million used for payment related to net settlement of employee stock compensation awards and \$1.1 million used for a payment related to AIT contingent consideration, partially offset by \$15.1 million from the issuance of common stock under employee stock purchase and stock option plans.

In the three months ended April 3, 2016, changes in operating assets and liabilities used cash of \$58.2 million. This was due to a \$44.4 million increase in operating assets and a \$13.8 million decrease in operating liabilities.

The increase in operating assets was primarily due to a \$42.6 million increase in accounts receivable due to higher sales.

The decrease in operating liabilities was due to a \$42.1 million decrease in accrued employee compensation due primarily to variable compensation, a \$13.8 million decrease in customer advance payments and deferred revenue, an \$8.3 million decrease in accounts payable and \$1.3 million of retirement plan contributions, partially offset by a \$51.8 million increase in other accrued liabilities.

---

[Table of Contents](#)

Investing activities during the three months ended April 3, 2016 provided cash of \$70.7 million, due to \$239.4 million and \$73.5 million in proceeds from sales and maturities of marketable securities, respectively, partially offset by \$221.8 million used for purchases of marketable securities and \$20.3 million used for purchases of property, plant and equipment.

Financing activities during the three months ended April 3, 2016 used cash of \$51.8 million, due to \$28.0 million used for the repurchase of 1.5 million shares of common stock at an average price of \$18.81 per share, \$12.3 million used for dividend payments, \$11.7 million used for payment related to Universal Robots acquisition contingent consideration and \$9.0 million payments related to net settlement of employee stock compensation awards, partially offset by \$9.1 million from the issuance of common stock under employee stock purchase and stock option plans.

In January 2017, Teradyne's Board of Directors declared a quarterly cash dividend of \$0.07 per share that was paid on March 20, 2017 to shareholders of record as of February 24, 2017. Dividend payments for the three months ended April 2, 2017 were \$14.0 million.

In January 2016, Teradyne's Board of Directors declared a quarterly cash dividend of \$0.06 per share that was paid on March 21, 2016 to shareholders of record as of February 26, 2016. Dividend payments for the three months ended April 3, 2016 were \$12.3 million.

In December 2016, the Board of Directors approved a \$500 million share repurchase authorization which commenced on January 1, 2017. We intend to repurchase at least \$200 million in 2017. During the three months ended April 2, 2017, we repurchased 1.3 million shares of common stock for \$37.7 million at an average price of \$29.38 per share. The total price includes commissions and is recorded as a reduction to retained earnings.

During the three months ended April 3, 2016, we repurchased 1.5 million shares of common stock for \$28.0 million at an average price of \$18.81 per share.

While we declared a quarterly cash dividend and authorized a share repurchase program, we may reduce or eliminate the cash dividend or share repurchase program in the future. Future cash dividends and stock repurchases are subject to the discretion of our Board of Directors which will consider, among other things, our earnings, capital requirements and financial condition.

We believe our cash, cash equivalents and marketable securities balance will be sufficient to pay our quarterly dividend, execute our authorized share repurchase program and meet our working capital and expenditure needs for at least the next twelve months. The amount of cash, cash equivalents and marketable securities in the U.S. and our operations in the U.S. provide sufficient liquidity to fund our business activities in the U.S. We have \$704 million of cash, cash equivalents and marketable securities outside the U.S. that if repatriated would incur additional taxes. Determination of the additional taxes that would be incurred is not practicable due to uncertainty regarding the remittance structure, the mix of earnings and earnings and profit pools in the year of remittance, and overall complexity of the calculation. Inflation has not had a significant long-term impact on earnings.

### **Equity Compensation Plans**

As discussed in Note O: "Stock Based Compensation" in our 2016 Form 10-K, we have a 1996 Employee Stock Purchase Plan and a 2006 Equity and Cash Compensation Incentive Plan (the "2006 Equity Plan").

The purpose of the 1996 Employee Stock Purchase Plan is to encourage stock ownership by all eligible employees of Teradyne. The purpose of the 2006 Equity Plan is to provide equity ownership and compensation opportunities in Teradyne to our employees, officers, directors, consultants and/or advisors. Both plans were approved by our shareholders.

### **Recently Issued Accounting Pronouncements**

On March 10, 2017, the FASB issued ASU 2017-07, " *Compensation—Retirement Benefits (Topic 715): Improving the Presentation of Net Periodic Pension Cost and Net Periodic Postretirement Benefit Cost* ." This ASU provides guidance on presentation of net periodic pension cost and net periodic postretirement benefit cost. The new standard requires the service cost component to be presented in the same line item as other employee compensation costs arising from services rendered during the period. The other components of net benefit cost such as interest cost, amortization of prior service cost, and actuarial gains or losses, are required to be presented separately outside of income or loss from operations. The presentation of service cost should be applied retrospectively. The guidance is effective for fiscal years beginning after December 15, 2017. Early adoption is permitted. This guidance will impact the presentation of our consolidated financial statements. Current presentation of service cost components is consistent with the requirements of the new standard. Upon adoption of the new standard, we will present interest cost, amortization of prior service cost, and actuarial gains or losses within other (income) expense, net.

---

## [Table of Contents](#)

On January 26, 2017, the FASB issued ASU 2017-04, “*Intangibles – Goodwill and Other (Topic 350): Simplifying the Accounting for Goodwill Impairment*.” The new guidance removes Step 2 of the goodwill impairment test, which requires a hypothetical purchase price allocation. Goodwill impairment will now be the amount by which a reporting unit’s carrying value exceeds its fair value, not to exceed the carrying amount of goodwill. All other goodwill impairment guidance will remain largely unchanged. Entities will continue to have the option to perform a qualitative assessment to determine if a quantitative impairment test is necessary. The same one-step impairment test will be applied to goodwill at all reporting units, even those with zero or negative carrying amounts. Entities will be required to disclose the amount of goodwill at reporting units with zero or negative carrying amounts. The revised guidance will be applied prospectively, and is effective in 2020. Early adoption is permitted for any impairment tests performed after January 1, 2017. We are currently evaluating the impact of this ASU on our financial position, results of operations and statements of cash flows.

In October 2016, the FASB issued ASU 2016-16, “*Accounting for Income Taxes: Intra-Entity Asset Transfers of Assets Other than Inventory*.” Under current Generally Accepted Accounting Principles (“GAAP”), the tax effects of intra-entity asset transfers are deferred until the transferred asset is sold to a third party or otherwise recovered through use. The new guidance requires recognition of the tax expense from the sale of the asset in the seller’s tax jurisdiction when the transfer occurs, even though the pre-tax effects of that transaction are eliminated in consolidation. Any deferred tax asset that arises in the buyer’s jurisdiction would also be recognized at the time of the transfer. The new guidance does not apply to intra-entity transfers of inventory. The income tax consequences from the sale of inventory from one member of a consolidated entity to another will continue to be deferred until the inventory is sold to a third party. The new guidance will be effective in fiscal years beginning after December 15, 2017. Early adoption is permitted. The modified retrospective approach will be required for transition to the new guidance, with a cumulative-effect adjustment recorded in retained earnings as of the beginning of the period of adoption. We do not expect this ASU to have a material impact on our financial position, results of operations and statements of cash flows.

In February 2016, the FASB issued ASU 2016-02, “*Leases (Topic 842)*.” The guidance in this ASU supersedes the lease recognition requirements in Accounting Standards Codification (“ASC”) Topic 840, “*Leases*.” The new standard establishes a right-of-use (“ROU”) model that requires a lessee to record an ROU asset and a lease liability on the balance sheet for all leases with terms longer than twelve months. Leases will be classified as either finance or operating, with classification affecting the pattern of expense recognition in the statements of operation. The new standard is effective for annual periods beginning after December 15, 2018 with early adoption permitted. A modified retrospective transition approach is required for lessees for capital and operating leases existing at, or entered into after, the beginning of the earliest comparative period presented in the financial statements. We are currently evaluating the impact of this ASU on our financial position and results of operations.

In January 2016, the FASB issued ASU 2016-01, “*Financial Instruments—Overall (Subtopic 825-10): Recognition and Measurement of Financial Assets and Financial Liabilities*.” This ASU provides guidance for the recognition, measurement, presentation, and disclosure of financial instruments. The new pronouncement revises accounting related to equity investments and the presentation of certain fair value changes for financial liabilities measured at fair value. Among other things, it amends the presentation and disclosure requirements of equity securities that do not result in consolidation and are not accounted for under the equity method. Changes in the fair value of these equity securities will be recognized directly in net income. This pronouncement is effective for fiscal years beginning after December 15, 2017. We are currently evaluating the impact of this ASU on our financial position and results of operations.

In May 2014, the FASB issued ASU 2014-09, “*Revenue from Contracts with Customers (Topic 606)*,” which will replace numerous requirements in U.S. GAAP, including industry-specific requirements, and provide companies with a single revenue recognition model for recognizing revenue from contracts with customers. The core principle of the new standard is that a company should recognize revenue to show the transfer of promised goods or services to customers in an amount that reflects the consideration to which the company expects to be entitled to in exchange for those goods or services. In August 2015, FASB issued ASU 2015-14, which deferred the effective date of the new revenue standard by one year. For Teradyne, the standard will be effective in the first quarter of 2018. The two permitted transition methods under the new standard are the full retrospective method, in which case the standard would be applied to each prior reporting period presented, or the modified retrospective method, in which case the cumulative effect of applying the standard would be recognized at the date of initial application. We are in the process of assessing the impact of this ASU, including identification of changes to policies, processes and controls and the presentation necessary to meet the additional disclosure requirements. We have selected the modified retrospective transition method. We are still conducting our assessment and will continue to evaluate the impact of this ASU on our financial position and results of operations.

### **Item 3: Quantitative and Qualitative Disclosures about Market Risks**

For “Quantitative and Qualitative Disclosures about Market Risk” affecting Teradyne, see Part 2 Item 7a, “Quantitative and Qualitative Disclosures about Market Risks,” in our Annual Report on Form 10-K filed with the SEC on March 1, 2017. There were no material changes in our exposure to market risk from those set forth in our Annual Report for the fiscal year ended December 31, 2016.

[Table of Contents](#)

In addition to market risks described in our Annual Report on Form 10-K, we have an equity price risk related to the fair value of our convertible senior unsecured notes issued in December 2016. In December 2016, Teradyne issued \$460 million aggregate principal amount of 1.25% convertible senior unsecured notes (the “Notes”) due December 15, 2023. As of April 2, 2017, the Notes had a fair value of \$534.8 million. The table below provides a sensitivity analysis of hypothetical 10% changes of Teradyne’s stock price as of the end of the first quarter of 2017 and the estimated impact on the fair value of the Notes. The selected scenarios are not predictions of future events, but rather are intended to illustrate the effect such event may have on the fair value of the Notes. The fair value of the Notes is subject to equity price risk due to the convertible feature. The fair value of the Notes will generally increase as Teradyne’s common stock price increases and will generally decrease as the common stock price declines in value. The change in stock price affects the fair value of the convertible senior notes, but does not impact Teradyne’s financial position, cash flows or results of operations due to the fixed nature of the debt obligation. Additionally, we carry the Notes at face value less unamortized discount on our balance sheet, and we present the fair value for required disclosure purposes only. In connection with the offering of the Notes we also sold warrants to the option counterparties. These transactions have been accounted for as an adjustment to our shareholders’ equity. The convertible note hedge transactions are expected to reduce the potential equity dilution upon conversion of the Notes. The warrants along with any shares issuable upon conversion of the Notes will have a dilutive effect on our earnings per share to the extent that the average market price of our common stock for a given reporting period exceeds the applicable strike price or conversion price of the warrants or Notes, respectively.

<u>Hypothetical Change in Teradyne Stock Price</u>	<u>Fair Value</u>	<u>Estimated change in fair value</u>	<u>Hypothetical percentage increase (decrease) in fair value</u>
10% increase	\$ 568,928	\$ 34,178	6.4%
No change	534,750	—	—
10% decrease	504,850	(29,900)	(5.6)

See Note F: “Debt” for further information.

**Item 4: Controls and Procedures**

As of the end of the period covered by this report, our management, with the participation of our Chief Executive Officer and Chief Financial Officer, evaluated the effectiveness of our disclosure controls and procedures pursuant to Rule 13a-15(b) or Rule 15d-15(f) promulgated under the Exchange Act. Based upon that evaluation, our Chief Executive Officer and Chief Financial Officer concluded that, as of the end of the period covered by this report, our disclosure controls and procedures were effective in ensuring that material information required to be disclosed in the reports that we file or submit under the Exchange Act is recorded, processed, summarized and reported within the time periods specified in the SEC’s rules and forms, including ensuring that such material information is accumulated and communicated to our management, including our Chief Executive Officer and Chief Financial Officer, as appropriate to allow timely decisions regarding required disclosure.

**PART II. OTHER INFORMATION****Item 1: Legal Proceedings**

We are subject to various legal proceedings and claims, which have arisen, in the ordinary course of business. In the opinion of management, the ultimate disposition of these matters will not have a material adverse effect on our results of operations, financial condition or cash flows.

**Item 1A: Risk Factors**

In addition to other information set forth in this Form 10-Q, you should carefully consider the factors discussed in Part I, “Item 1A: Risk Factors” in our Annual Report on Form 10-K for the year ended December 31, 2016, which could materially affect our business, financial condition or future results. The risk factors described in our Annual Report on Form 10-K remain applicable to our business.

The risks described in our Annual Report on Form 10-K are not the only risks that we face. Additional risks and uncertainties not currently known to us or that we currently deem to be immaterial also may materially adversely affect our business, financial condition and/or operating results.

**Item 2: Unregistered Sales of Equity Securities and Use of Proceeds**

In December 2016, the Board of Directors approved a \$500 million share repurchase authorization which commenced on January 1, 2017. We intend to repurchase at least \$200 million in 2017. During the three months ended April 2, 2017, we repurchased 1.3 million shares of common stock for \$37.7 million at an average price of \$29.38 per share. The total price includes commissions and is recorded as a reduction to retained earnings.

During the three months ended April 3, 2016, we repurchased 1.5 million shares of common stock for \$28.0 million at an average price of \$18.81 per share.

The following table includes information with respect to repurchases we made of our common stock during the three months ended April 2, 2017 (in thousands except per share price):

Period	(a) Total Number of Shares (or Units) Purchased	(b) Average Price Paid per Share (or Unit)	(c) Total Number of Shares (or Units) Purchased as Part of Publicly Announced Plans or Programs	(d) Maximum Number (or Approximate Dollar Value) of Shares (or Units) that may Yet Be Purchased Under the Plans or Programs
January 1, 2017 – January 29, 2017	249	\$ 26.90	—	\$ 500,000
January 30, 2017 – February 26, 2017	723	\$ 28.79	531	\$ 484,727
February 27, 2017 – April 2, 2017	756	\$ 29.72	754	\$ 462,270
	<u>1,728 (1)</u>	<u>\$ 28.93 (1)</u>	<u>1,285</u>	

(1) Includes 0.4 million shares at an average price of \$27.73 withheld from employees for the payment of taxes.

We satisfy U.S. federal and state minimum withholding tax obligations due upon the vesting and the conversion of restricted stock units into shares of our common stock, by automatically withholding from the shares being issued, a number of shares with an aggregate fair market value on the date of such vesting and conversion that would satisfy the minimum withholding amount due.

## CERTIFICATIONS

I, Mark E. Jagiela, certify that:

1. I have reviewed this quarterly report on Form 10-Q of Teradyne, Inc.;

2. Based on my knowledge, this report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report;

3. Based on my knowledge, the financial statements, and other financial information included in this report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in this report;

4. The registrant's other certifying officer and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) and internal control over financial reporting (as defined in Exchange Act Rules 13a-15(f) and 15d-15(f)) for the registrant and have:

a) Designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this report is being prepared;

b) Designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;

c) Evaluated the effectiveness of the registrant's disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such evaluation; and

d) Disclosed in this report any change in the registrant's internal control over financial reporting that occurred during the registrant's most recent fiscal quarter (the registrant's fourth fiscal quarter in the case of an annual report) that has materially affected, or is reasonably likely to materially affect, the registrant's internal control over financial reporting; and

5. The registrant's other certifying officer and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the registrant's auditors and the audit committee of the registrant's board of directors (or persons performing the equivalent function):

a) All significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrant's ability to record, process, summarize and report financial information; and

b) Any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal control over financial reporting.
