

Concert Pharmaceuticals Announces Upcoming Poster Presentation at North American Cystic Fibrosis Conference

LEXINGTON, Mass.--(BUSINESS WIRE)-- [Concert Pharmaceuticals, Inc.](#) (NASDAQ: CNCE) today announced that the Company will present a poster at the 30th Annual North American Cystic Fibrosis Conference being held October 27-29, 2016, in Orlando, Florida. Data describing the relative bioavailability of CTP-656 under fasted and fed conditions along with results from the Phase 1 multiple ascending dose study will be presented. Details on the upcoming poster presentation follow below.

- | [Abstract Title](#): CTP-656 Multiple Dose Pharmacokinetic Profile Continues to Support a Once-Daily Potentiator for Cystic Fibrosis Patients with Gating Mutations
- | Poster Session I: Thursday, October 27, 11:15 a.m.-1:45 p.m.
- | Poster Number: 224

About CTP-656 and Cystic Fibrosis

CTP-656 is a novel CFTR potentiator that may offer next generation, once-daily dosing and was developed by Concert's application of its novel deuterium chemistry to modify ivacaftor. Concert is initially developing CTP-656 as a potential monotherapy treatment for cystic fibrosis due to gating mutations of the gene that encodes for cystic fibrosis transmembrane conductance regulator (CFTR), a protein, which regulates components of sweat, mucus clearance and digestion. Cystic fibrosis is a life-threatening, hereditary genetic disease that has systemic effects and can cause significantly reduced lung and digestive system function. According to the Cystic Fibrosis Foundation, an estimated 70,000 people worldwide have cystic fibrosis.

About Concert

[Concert Pharmaceuticals](#) is a clinical stage biopharmaceutical company focused on applying its [DCE Platform®](#) (deuterated chemical entity platform) to create novel medicines designed to address unmet patient needs. The Company's approach starts with approved drugs in which deuterium substitution has the potential to enhance clinical safety, tolerability or efficacy. Concert has a [broad pipeline](#) of innovative medicines targeting pulmonary diseases, including cystic fibrosis, central nervous systems (CNS) disorders, as well as autoimmune and inflammatory diseases.
