

Briefing Call on Q3 2016 Financial Results

Sydney, Australia and San Diego, California (Thursday, 3 November 2016 AEDT) – REVA Medical, Inc. (ASX: RVA) (“REVA” or the “Company”) will hold its quarterly briefing call to discuss the Company’s financial results through 30 September 2016 and its business outlook. Directly following the quarterly briefing, the Company will provide an extended discussion of the clinical data results released at the Transcatheter Cardiovascular Therapeutics (“TCT”) conference held this week in Washington, D.C. Ms. Reggie Groves, the Company’s Chief Executive Officer, will host the call.

The call is scheduled for 9:00 a.m. AEDT on Thursday, 10 November 2016 (which is 2:00 p.m. US PST on Wednesday, November 9, 2016) and may be accessed toll-free within Australia by dialing 1800 005 989 five minutes prior to the scheduled start time. Callers in the United States and Canada may access the call by dialing 1-877-312-5413. If you are asked to provide an access code, please spell out the word “REVA” to the operator and you will be connected promptly.

If you reside outside of Australia, the United States, or Canada, or if you prefer to access the audiocast through our website, please visit “Events & Presentations” under the “Investors” section of our website at www.revamedical.com, and click on the “listen to webcast” link. A replay of the audiocast will be available on our website after the call.

About REVA

REVA is a clinical stage medical device company located in San Diego, California, USA, that is working to commercialize its proprietary bioresorbable scaffolds, as an alternative to metal stents, to treat coronary artery disease. Scaffolds provide restoration of blood flow, support the artery through the healing process, then disappear (or “resorb”) from the body over a period of time. This resorption allows the return of natural movement and function of the artery, a result not attainable with permanent metal stents. The Company’s *Fantom*[®] scaffold has been designed to offer an ideal balance of thinness and strength, with distinct ease-of-use features including complete scaffold visibility under x-ray, expansion with one continuous inflation, and no procedural time limitations. REVA will require regulatory approval before it can commercialize *Fantom* or any other product.
