## EXHIBIT INDEX

<u>Exhibit Number</u>	<u>Description</u>
1.01	Conflict Minerals Report of ARI

**American Railcar Industries, Inc.**  
**Conflict Minerals Report**

**INTRODUCTION**

This Conflict Minerals Report (“CMR”) of American Railcar Industries, Inc. (“ARI” or “the Company”) has been prepared pursuant to Rule 13p-1 and Form SD promulgated under the Securities Exchange Act of 1934 (the “Exchange Act”) for the reporting period from January 1, 2016 to December 31, 2016 (“the Reporting Period”).

Rule 13p-1 under the Exchange Act requires the disclosure of certain information when a company manufactures or contracts to manufacture products for which “Conflict Minerals” are necessary to the functionality or production of those products. “Conflict Minerals” for the purposes of Rule 13p-1 are gold, columbite-tantalite (coltan), cassiterite, and wolframite (including their derivatives, tantalum, tin and tungsten, and other minerals or derivatives the U.S. Secretary of State may designate in the future). The “Covered Countries” for the purposes of Rule 13p-1 are the Democratic Republic of the Congo (“the DRC”), the Republic of the Congo, the Central African Republic, South Sudan, Uganda, Rwanda, Burundi, Tanzania, Zambia, and Angola.

In accordance with Securities and Exchange Commission (“SEC”) guidance, this CMR is not audited.

As required by Rule 13p-1, this CMR relates to products: (i) for which Conflict Minerals are necessary to the functionality or production of those products; (ii) that were manufactured, or contracted to be manufactured, by the Company; and (iii) for which the manufacture was completed during the Reporting Period. These products, which are collectively referred to in this report as the “Covered Products”, include railcars and certain railcar components manufactured or sourced by ARI's Manufacturing segment. The Company believes that only a small portion of the materials content of the Covered Products constitute Conflict Minerals necessary to their functionality and/or production.

*Reasonable Country of Origin Inquiry (“RCOI”)*

ARI conducted a good faith RCOI regarding the necessary Conflict Minerals used in its products. This good faith RCOI was designed to reasonably determine whether any of the necessary Conflict Minerals originated in the Covered Countries or came from recycled or scrap sources.

The Company’s primary means of determining the country of origin of such Conflict Minerals was by conducting a supply chain survey. The “Conflict Minerals Committee” (as defined below), having direct knowledge and expertise with respect to ARI's supply chain composition, first reviewed the listing of materials for Covered Products received during 2016 to identify those materials reasonably likely to contain Conflict Minerals. After cross-referencing the Conflict Minerals Committee's findings against prior-year RCOI and due diligence results, ARI identified fewer than 5% of the Company's direct suppliers as supplying such materials (“Potential CM Suppliers”). Potential CM Suppliers were asked to complete the Electronic Industry Citizenship Coalition/Global e-Sustainability Initiative Conflict Minerals Reporting Template (“the Template”) to identify smelters and refiners. Where applicable, the Company also inquired and/or obtained supplier policies on Conflict Minerals and made follow-up inquiries with appropriate supplier personnel.

**DUE DILIGENCE PROCESS***Design of Due Diligence*

Based on the Company’s RCOI, the Company was also required to exercise due diligence on the source and chain of custody of the Conflict Minerals in its products. The design of the due diligence measures described below is intended to comply in all material respects with the *Organization for Economic Co-operation and Development (“OECD”) Due Diligence Guidance for Responsible Supply Chains of Minerals from Conflict-Affected and High Risk Areas: Third Edition*, including the related supplements on gold, tin, tantalum and tungsten (collectively, “the OECD Guidance”). The OECD Guidance is an internationally recognized due diligence framework for identifying the source of Conflict Minerals, which includes the following steps:

- Step 1: Establish strong company management systems
- Step 2: Identify and assess risks in the supply chain
- Step 3: Design and implement a strategy to respond to identified risks
- Step 4: Carry out independent third-party audit of smelter(s)/refiner(s) due diligence practices
- Step 5: Report annually on supply chain due diligence

The OECD Guidance is written for the entire mineral supply chain and therefore ARI’s due diligence measures were tailored to include steps appropriate for “downstream” companies such as the Company.

---

### *Due Diligence Measures Performed*

The Company's supply chain is complex. Numerous third-parties are involved in the network that exists between ARI's suppliers and the original sources of any Conflict Minerals. Because the Company does not purchase Conflict Minerals directly from mines, smelters or refiners, it must rely on its suppliers to provide information regarding the origin of the Conflict Minerals in ARI's products. Given this context, the Company undertook the following measures to exercise due diligence on the source and chain of custody of the Conflict Minerals in its products for the Reporting Period:

- (i) ARI has established a management system to support its supply chain due diligence.
    - a. ARI maintains an organizational structure and communication process that is intended to establish a system of transparency over its supply chain. This system is meant to help ARI obtain critical information regarding the supply chain of Conflict Minerals used in its products.
    - b. ARI has a company policy regarding Conflict Minerals. This policy is publicly available on the Company's website: [americanrailcar.com](http://americanrailcar.com). Employees, suppliers and other interested parties can contact ARI regarding its Conflict Minerals policy either in writing or by phone.
    - c. Authority and responsibility are assigned to a multi-disciplinary team comprised of ARI's Director of Purchasing, Manager of Financial Reporting, and Manager of Internal Audit (collectively, the "Conflict Minerals Committee"). The Conflict Minerals Committee receives periodic support from ARI's General Counsel and reports all Conflict Minerals matters directly to ARI's Chief Financial Officer.
    - d. ARI has distributed communications to its suppliers making them aware of Rule 13p-1 and ARI's related policies. Conflict Minerals provisions have been incorporated into supplier contracts and purchase orders through the Company's updated standard terms and conditions as published on its website.
    - e. ARI maintains business records relating to Conflict Minerals due diligence in accordance with the Company's existing policies and/or processes.
  - (ii) ARI has taken steps to identify and assess risk in its supply chain.
    - a. As described above, ARI identified Potential CM Suppliers in its supply chain during the Reporting Period and sent those suppliers a copy of the Template (a "Survey").
    - b. Of the Potential CM Suppliers surveyed, 100% provided a Survey response, however 11% of these responses were incomplete or provided inconsistent information. Follow-up reminders and inquiries were sent to suppliers who provided incomplete responses.
    - c. Of the Potential CM Suppliers who provided complete Survey responses, all indicated that their products contained Conflict Minerals, of which 37.5% indicated that the Conflict Minerals did not originate from the Covered Countries and 25% indicated that their products were made from recycled or scrap products. The remaining 37.5% indicated that their products contained Conflict Minerals that may have originated from the Covered Countries. Some of these responses also indicated that some or all of the smelters or refiners used are "compliant" under the Conflict Free Sourcing Initiative (CFSI) Conflict Free Smelter Program.
  - (iii) ARI has designed and implemented a strategy to respond to identified risks.
    - a. ARI's Conflict Minerals Committee monitors internal accountability with respect to the implementation of the supply chain due diligence process and reports its findings of the supply chain risk assessment to upper level management and the Audit Committee of ARI's Board of Directors.
    - b. ARI has designed and implemented a risk management plan that includes, but is not limited to, requests for Potential CM Suppliers to complete surveys and engaging in follow-up discussions with suppliers about the composition of their products and materials. In addition, the Company has incorporated Conflict Minerals language into its supplier contracts. If a supplier identifies that it has Conflict Minerals in the products or materials it supplies, it is added to the list of Potential CM Suppliers and ARI actively engages with that supplier to identify the locations of the smelter(s)/refiner(s) of those Conflict Minerals and to obtain a copy of their Conflict Mineral policies.
    - c. For certain Survey responses that identified smelters or refiners in ARI's supply chain that are providing Conflict Minerals, ARI reviewed the CFSI Conflict-Free Smelter Program lists to determine if those smelters or refiners are compliant with the CFSI Conflict-Free Smelter Program.
  - (iv) ARI has determined that reliance upon independent third-party audits of smelter/refiner due diligence practices by the CFSI is appropriate.
    - a. ARI is a downstream company and is many steps removed from the smelters and refiners that produce the necessary Conflict Minerals contained in its products. ARI does not purchase raw minerals or ores, and does not, to the best
-

of its knowledge, directly purchase Conflict Minerals from any of the Covered Countries. Accordingly, ARI does not perform or direct Conflict Mineral audits of these entities' supply chains. However, ARI supports industry-wide efforts and the development and implementation of independent third-party audits of smelters and refiners, such as the CFSI's Conflict-Free Smelter Program.

- (v) ARI complies with Step 5 of the OECD Guidance through its filing of this report (and the related Form SD) with the SEC and by making these materials publicly available on its website at [americanrailcar.com](http://americanrailcar.com).

## **DUE DILIGENCE RESULTS AND RISK MITIGATION**

Based on the information provided by the suppliers that ARI surveyed and otherwise obtained through the due diligence process, ARI believes that, to the extent reasonably determinable by ARI, the facilities that were used to process the Conflict Minerals contained in the Covered Products included the 325 smelters or refiners listed in Annex I.

Annex I includes only facilities that are listed in the Template as "Known Smelters or Refineries". Of these 325 Known Smelters or Refineries, 244 received a "conflict-free" designation from an independent third party audit program as of May 17, 2017.

Despite repeated efforts to obtain completed Surveys, one supplier provided responses that indicated the origin of Conflict Minerals could not currently be determined. Despite its due diligence efforts, because the Company is several levels removed from the source of the Conflict Minerals, it was unable to identify or further investigate the source of any Conflict Minerals supplied by certain suppliers who were either non-responsive or uncertain about where the Conflict Minerals used in products they supplied to the Company originated. Therefore, the Company does not have sufficient information to determine the facilities used to process, the country of origin, or mine or location of origin of every Conflict Mineral in the Covered Products.

The Company expects to continue taking the following steps, among others, to improve its due diligence measures and to further mitigate the risk that the necessary Conflict Minerals contained in the Company's supply chain benefit armed groups in the Covered Countries:

- (i.) Engage with suppliers to obtain current, accurate, and complete information about the supply chain;
- (ii.) Encourage suppliers to implement responsible sourcing;
- (iii.) Review "conflict-free" smelter lists from independent "conflict-free" smelter validation programs, such as CFSI's Conflict-Free Smelter Program; and
- (iv.) Monitor regulatory or legislative changes to the Conflict Minerals rules.

ARI has provided information as of the date of this report. Subsequent events, such as the inability or unwillingness of suppliers, smelters or refiners to comply with ARI's Conflict Minerals Policy, may affect ARI's future determinations under Rule 13p-1.

The Company also completed a Survey for each of its requesting customers for the Reporting Period. ARI supports its customers' reporting obligations as required by Rule 13p-1.

Website addresses are included in this report for reference only. Any information contained on ARI's website is not incorporated by reference into this report.

## **FORWARD-LOOKING STATEMENTS**

Certain statements in this report may be "forward-looking" within the meaning of the Private Securities Litigation Reform Act of 1995. Words such as "intends," "expects," "plans," "believes," "estimates," "anticipates," and similar expressions are used to identify these forward-looking statements. Examples of forward-looking statements include statements relating to the Company's future plans, and any other statement that does not directly relate to any historical or current fact. Forward-looking statements are based on the Company's current expectations and assumptions, which may not prove to be accurate. These statements are not guarantees and are subject to risks, uncertainties and changes in circumstances that are difficult to predict. Actual outcomes and results may differ materially from these forward-looking statements. As a result, these statements speak only as of the date they are made and the Company undertakes no obligation to update or revise any forward-looking statement, except as required by federal securities laws.
