About Endocyte

Endocyte is a biopharmaceutical company and leader in developing targeted therapies for the treatment of cancer. Endocyte uses drug conjugation technology to create novel therapeutics and companion imaging agents for personalized targeted therapies. The company's agents actively target receptors that are over-expressed on diseased cells relative to healthy cells, such as prostate specific membrane antigen (PSMA) in prostate cancer. This targeted approach is designed to safely enable the delivery of highly potent drug payloads. The companion imaging agents are designed to identify patients whose disease over-expresses the target of the therapy and who are therefore more likely to benefit from treatment. For additional information, please visit Endocyte's website at www.endocyte.com.
