This document is in two parts. The first part is this prospectus supplement, including the documents incorporated by reference herein, which describes the specific terms of this offering and also adds to and updates information contained in the accompanying prospectus and the documents incorporated by reference into this prospectus supplement and the accompanying prospectus. The second part, the accompanying prospectus, including the documents incorporated by reference therein, gives more general information, some of which may not apply to this offering. The prospectus and prospectus supplement are part of a registration statement that we filed with the Securities and Exchange Commission (“SEC”) utilizing a “shelf” registration process. Under this shelf registration process, we may from time to time sell shares of our Class C capital stock and our convertible senior notes under the accompanying prospectus on terms to be determined by market conditions at the time of the offering.

You should read this prospectus supplement and the accompanying prospectus, including the information incorporated by reference herein and therein and any free writing prospectus we have authorized for use in connection with this offering, in their entirety before making an investment decision. You should assume that the information in this prospectus supplement, the accompanying prospectus, any document incorporated by reference herein or therein and any free writing prospectus we have authorized for use in connection with this offering and filed with the SEC are accurate or complete only as of their respective dates, regardless of the time of delivery of this prospectus supplement, the accompanying prospectus and any authorized free writing prospectus. Our business, financial condition, results of operations and prospects may have changed since those dates.

In this prospectus supplement, as permitted by law, we “incorporate by reference” information from other documents that we file with the SEC. This means that we can disclose important information to you by referring you to those documents. The information incorporated by reference is considered to be a part of this prospectus supplement and the accompanying prospectus and should be read with the same care. When we update the information contained in documents that have been incorporated by reference by making future filings with the SEC, the information included or incorporated by reference in this prospectus supplement is considered to be automatically updated and superseded. In other words, in case of a conflict or inconsistency between information contained in this prospectus supplement and information in the accompanying prospectus or incorporated by reference into this prospectus supplement, you should rely on the information contained in the document that was filed later. See “Incorporation of Certain Documents by Reference” in this prospectus supplement.

We are not, and the underwriters are not, making an offer to sell the securities in any jurisdiction where the offer or sale is not permitted or in which the person making such offer or solicitation is not qualified to do so or to any person to whom it is unlawful to make such offer or solicitation.

You should not consider any information included or incorporated by reference in this prospectus supplement or the accompanying prospectus to be investment, legal or tax advice. You should consult your own counsel, accountants and other advisers for legal, tax, business, financial and related advice regarding the purchase of shares of our Class C capital stock offered by this prospectus supplement.

Moreover, we operate in a very competitive and rapidly changing environment. New risks emerge from time to time. It is not possible for our management to predict all risks, nor can we assess the effect of all factors on our business or the extent to which any factor, or combination of factors, may cause actual results to differ materially from those contained in any forward-looking statements we may make. This activity could also cause or avoid an increase or a decrease in the market price of our Class C capital stock.

For a discussion of the potential impact of any market or other activity by the option counterparties or their respective affiliates in connection with the capped call transactions, see “Risk Factors—Risks Related to Our Concurrent Convertible Notes Offering—The capped call transactions to be entered into in connection with the concurrent Convertible Notes Offering may affect the value of the our Class C capital stock” and “Underwriting—Concurrent Convertible Notes Offering; Capped Call Transactions.”

**Adjusted EBITDA**

To provide investors with additional information regarding our financial results, we have disclosed Adjusted EBITDA, a non-GAAP financial measure, within this prospectus supplement. We have provided a reconciliation below of Adjusted EBITDA to net loss, the most directly comparable GAAP financial measure.

We have included Adjusted EBITDA in this prospectus supplement because it is a key metric used by our management and board of directors to measure operating performance and trends and to prepare and approve our annual budget. In particular, the exclusion of certain expenses in calculating Adjusted EBITDA facilitates operating performance comparisons on a period-to-period basis.

Our use of Adjusted EBITDA has limitations as an analytical tool, and you should not consider it in isolation or as a substitute for analysis of our results as reported under GAAP. Some of these limitations are:

- Adjusted EBITDA does not reflect our cash expenditures or future requirements for capital expenditures or contractual commitments;

- Adjusted EBITDA does not reflect changes in, or cash requirements for, our working capital needs;
- Adjusted EBITDA does not consider the potentially dilutive impact of share-based compensation;
- Although depreciation and amortization are non-cash charges, the assets being depreciated and amortized may have to be replaced in the future, and Adjusted EBITDA does not reflect cash capital expenditure requirements for such replacements or for new capital expenditure requirements;
- Adjusted EBITDA does not reflect impairment and restructuring costs;
- Adjusted EBITDA does not reflect acquisition-related costs;
- Adjusted EBITDA does not reflect the loss (gain) on divestiture of businesses;
- Adjusted EBITDA does not reflect interest expense or other income;
- Adjusted EBITDA does not reflect the loss on debt extinguishment
- Adjusted EBITDA does not reflect income tax benefit (expense); and
- Other companies, including companies in our own industry, may calculate Adjusted EBITDA differently than we do, limiting its usefulness as a comparative measure.

Because of these limitations, you should consider Adjusted EBITDA alongside other financial performance measures, including various cash flow metrics, net loss and our other GAAP results.

The following table presents a reconciliation of Adjusted EBITDA to net loss for each of the periods presented:

## RISK FACTORS

*An investment in our Class C capital stock involves significant risks. Prior to making a decision about investing in our Class C capital stock, and in consultation with your own financial and legal advisors, you should carefully consider, among other matters, the following risk factors, as well as those incorporated by reference in this prospectus supplement and the accompanying prospectus from our Quarterly Report on Form 10-Q for the three months ended March 31, 2018 and our Annual Report on Form 10-K for the year ended December 31, 2017 under the headings “Risk Factors” and “Management’s Discussion and Analysis of Financial Condition and Results of Operations” and other filings we may make from time to time with SEC.*

### **Risks Related to Our Class C Capital Stock**

***Our Class C capital stock prices may be volatile, and the value of an investment in our Class C capital stock may decline.***

An active, liquid and orderly market for our Class C capital stock may not be sustained, which could depress the trading price of our Class C capital stock. The trading price of our Class C capital stock has at times experienced price volatility and may continue to be volatile. For example, since January 1, 2016, the closing price of our Class C capital stock has ranged from \$16.01 per share to \$65.57 per share through June 28, 2018. The market price of our Class C capital stock could be subject to wide fluctuations in response to many of the risk factors discussed in our Quarterly Report on Form 10-Q for the three months ended March 31, 2018 and our Annual Report on Form 10-K for the year ended December 31, 2017 and others beyond our control, including:

- actual or anticipated fluctuations in our financial condition and results of operations;
- changes in projected operational and financial results;
- addition or loss of significant customers;
- actual or anticipated changes in our growth rate relative to that of our competitors;
- announcements by us or our competitors of significant acquisitions, strategic partnerships, joint ventures or capital-raising activities or commitments;
- announcements of technological innovations or new offerings by us or our competitors;
- additions or departures of key personnel;
- changes in laws or regulations applicable to our services;
- fluctuations in the valuation of companies perceived by investors to be comparable to us;
- issuance of new or updated research or reports by securities analysts;
- sales of our Class C capital stock or Class A common stock by us or our shareholders;
- issuances of our Class A common stock upon conversion of Trulia, LLC’s convertible senior notes due in 2020 and issuances of our Class C capital stock upon conversion of our convertible senior notes due in 2021;
- stock price and volume fluctuations attributable to inconsistent trading volume levels of our shares; and
- general economic and market conditions.

Furthermore, the stock markets in recent years have experienced extreme price and volume fluctuations that have affected and continue to affect the market prices of the equity securities of many companies. These fluctuations often have been unrelated or disproportionate to the operating performance of those companies.

These broad market and industry fluctuations, as well as general economic, political and market conditions such as recessions, interest rate changes or international currency fluctuations, may negatively impact the market

price of our Class C capital stock. In the past, companies that have experienced volatility in the market price of their stock have been subject to securities class action and other similar litigation. We have in the past been and are currently the target of this type of litigation, and we may continue to be the target of this type of litigation in the future. Past, current and future securities litigation against us could result in substantial costs and divert management's attention from other business concerns, which could harm our business, results of operations or financial condition.

***Future sales of our stock in the public market could cause our stock price to decline.***

Our Class A common stock began trading on The Nasdaq Global Select Market on February 18, 2015, and our Class C capital stock began trading on The Nasdaq Global Select Market on August 17, 2015. We cannot predict the effect, if any, that market sales of shares of Class A common stock or Class C capital stock or the availability of shares for sale will have on the prevailing trading price of our Class C capital stock from time to time. There is currently no contractual restriction on our ability to issue additional shares except as described under "Underwriting—No Sale of Similar Securities," and all of our outstanding shares are generally freely tradable, except for shares held by our "affiliates" as defined in Rule 144 under the Securities Act of 1933, as amended (the "Securities Act"), which may be sold in compliance with the volume restrictions of Rule 144. Sales of a substantial number of shares of our Class A common stock and Class C capital stock could cause the price of our Class C capital stock to decline. In addition, we may in the future issue shares of Class C capital stock for financings, acquisitions or equity incentives. If we issue additional shares of Class C capital stock in the future, such issuances would have a dilutive effect on the economic interest of Class C capital stock and our Class A common stock.

***The structure of our capital stock as contained in our charter documents has the effect of concentrating voting control with our founders, and limits the ability of holders of our Class C capital stock to influence corporate matters.***

Our capital structure includes authorized Class A common stock, authorized Class B common stock and authorized Class C capital stock. Our Class A common stock entitles its holders to one vote per share, our Class B common stock entitles its holders to 10 votes per share and our Class C capital stock carries no voting rights (except as required by applicable law or as expressly provided in our amended and restated articles of incorporation). All shares of Class B common stock have been and are held or controlled by our founders, Richard Barton and Lloyd Frink. As of June 26, 2018, Mr. Barton's holdings and Mr. Frink's holdings represented approximately 31.5% and 20.5%, respectively, of the voting power of our outstanding capital stock.

For the foreseeable future, Mr. Barton and Mr. Frink will therefore have significant control over our management and affairs and will be able to control most matters requiring shareholder approval, including the election or removal (with or without cause) of directors and the approval of any significant corporate transaction, such as a merger or other sale of us or our assets. In addition, because our Class C capital stock carries no voting rights (except as required by applicable law or as expressly provided in our amended and restated articles of incorporation), the issuance of Class C capital stock (instead of Class A common stock) could prolong the duration of Mr. Barton's and Mr. Frink's voting power. This concentrated control could delay, defer or prevent a change of control, merger, consolidation, takeover, or other business combination involving us that shareholders other than Mr. Barton and Mr. Frink may otherwise support. This concentrated control could also discourage a potential investor from acquiring our Class A common stock or Class C capital stock due to the limited voting power of such stock relative to the Class B common stock and might harm the market price of our Class C capital stock.

***Anti-takeover provisions in our charter documents and under Washington law could make an acquisition of us more difficult, limit attempts by shareholders to replace or remove our management and affect the market price of our Class C capital stock.***

Provisions in our articles of incorporation and bylaws, as amended and restated, may have the effect of delaying or preventing a change of control or changes in our management. Our amended and restated articles of

---

[Table of Contents](#)

incorporation and amended and restated bylaws include provisions, some of which will become effective only after the date, which we refer to as the threshold date, on which the Class B common stock controlled by our founders represents less than 7% of the aggregate number of shares of our outstanding Class A common stock and Class B common stock, that:

- set forth the structure of our capital stock, which concentrates voting control of matters submitted to a vote of our shareholders with the holders of our Class B common stock, which is currently held or controlled by our founders;
- authorize our board of directors to issue, without further action by our shareholders, up to 30,000,000 shares of undesignated preferred stock, subject, prior to the threshold date, to the approval rights of the holders of our Class B common stock;
- establish that our board of directors will be divided into three classes, Class I, Class II and Class III, with each class serving three-year staggered terms;
- prohibit cumulative voting in the election of directors;
- provide that, after the threshold date, our directors may be removed only for cause;
- provide that, after the threshold date, vacancies on our board of directors may be filled only by the affirmative vote of a majority of directors then in office or by the sole remaining director;
- provide that only our board of directors may change the board's size;
- specify that special meetings of our shareholders can be called only by the chair of our board of directors, our board of directors, our chief executive officer, our president or, prior to the threshold date, holders of at least 25% of all the votes entitled to be cast on any issue proposed to be considered at any such special meeting;
- establish an advance notice procedure for shareholder proposals to be brought before a meeting of shareholders, including proposed nominations of persons for election to our board of directors;
- require the approval of our board of directors or the holders of at least two-thirds of all the votes entitled to be cast by shareholders generally in the election of directors, voting together as a single group, to amend or repeal our bylaws; and
- require the approval of not less than two-thirds of all the votes entitled to be cast on a proposed amendment, voting together as a single group, to amend certain provisions of our articles of incorporation.

Prior to the threshold date, our directors can be removed with or without cause by holders of our Class A common stock and Class B common stock, voting together as a single group, and vacancies on the board of directors may be filled by such shareholders, voting together as a single group. Given the structure of our capital stock, our founders, Richard Barton and Lloyd Frink, who hold or control our Class B common stock, will have the ability for the foreseeable future to control these shareholder actions. See the risk factor above titled "The structure of our capital stock as contained in our charter documents has the effect of concentrating voting control with our founders, and limits the ability of holders of our Class C capital stock to influence corporate matters."

The provisions described above, including those which take effect after the threshold date, may frustrate or prevent any attempts by our shareholders to replace or remove our current management by making it more difficult for shareholders to replace members of our board of directors, which board is responsible for appointing our management. In addition, because we are incorporated in the State of Washington, we are governed by the provisions of Chapter 23B.19 of the Washington Business Corporation Act, which prohibits certain significant business transactions between us and certain significant shareholders unless specified conditions are met. These provisions may also have the effect of delaying or preventing a change of control of our company, even if this change of control would benefit our shareholders.

***Our management will have broad discretion over the use of the proceeds we receive in this offering and our concurrent Convertible Notes Offering and may not apply the proceeds in ways that increase the value of your investment.***

Our management generally will have broad discretion to use the net proceeds to us from this offering and our concurrent Convertible Notes Offering, and you will be relying on the judgment of our management regarding the application of these proceeds. Our management might not apply the net proceeds from this offering and our concurrent Convertible Notes Offering in ways that increase the value of your investment. Other than the payments in respect of the capped call transactions, we have not allocated the net proceeds from this offering or our concurrent Convertible Notes Offering for any specific purposes. Until we use the net proceeds to us from this offering and our concurrent Convertible Notes Offering, we plan to invest them, and these investments may not yield a favorable rate of return. If we do not invest or apply the net proceeds from this offering or our concurrent Convertible Notes Offering in ways that enhance shareholder value, we may fail to achieve expected financial results, which could cause our stock price to decline.

***This offering is not conditioned on the consummation of any other financing, including the concurrent Convertible Notes Offering.***

We intend to use the net proceeds of this offering, together with the proceeds from the concurrent Convertible Notes Offering, as described in “Use of Proceeds” herein and in the prospectus supplement that pertains to the concurrent Convertible Notes Offering. However, neither the completion of this offering nor of the concurrent Convertible Notes Offering is contingent on the completion of the other, so it is possible that this offering occurs and the Convertible Notes Offering does not occur, and vice versa. We cannot assure you that the concurrent Convertible Notes Offering will be completed on the terms described herein, or at all.

#### **Risks Related to Our Concurrent Convertible Notes Offering**

***The capped call transactions to be entered into in connection with the concurrent Convertible Notes Offering may affect the value of our Class C capital stock.***

In connection with the pricing of the notes, we entered into capped call transactions with the option counterparties. The capped call transactions are expected generally to reduce the potential dilution upon conversion of the notes and/or offset any cash payments we are required to make in excess of the principal amount of converted notes, as the case may be. If the underwriters of the Convertible Notes Offering exercise their option to purchase additional notes with respect to the concurrent Convertible Notes Offering, we expect to enter into additional capped call transactions with the option counterparties.

In connection with establishing their initial hedges of the capped call transactions, the option counterparties or their respective affiliates expect to enter into various derivative transactions with respect to our Class C capital stock concurrently with, or shortly after, the pricing of the notes in the concurrent Convertible Notes Offering. This activity could increase (or reduce the size of any decrease in) the market price of our Class C capital stock or the notes at that time.

In addition, the option counterparties or their respective affiliates may modify their hedge positions by entering into or unwinding various derivative transactions with respect to our Class C capital stock and/or purchasing or selling our Class C capital stock or other securities of ours in secondary market transactions following the pricing of the notes in the concurrent Convertible Notes Offering and prior to the maturity of the notes (and are likely to do so during any observation period related to a conversion of notes or in connection with any repurchase of notes by us). This activity could also cause or avoid an increase or a decrease in the market price of our Class C capital stock or the notes, which could affect your ability to convert the notes and, to the extent the activity occurs during any observation period related to a conversion of notes, it could affect the number of shares and value of the consideration that you will receive upon conversion of the notes.

---

[Table of Contents](#)

In addition, if any such capped call transactions fail to become effective, whether or not the concurrent Convertible Notes Offering is completed, the option counterparties or their respective affiliates may unwind their hedge position with respect to our Class C capital stock, which could adversely affect the value of our Class C capital stock and, if the notes have been issued, the value of the notes.

***Conversion of the notes will dilute the ownership interest of our existing shareholders or may otherwise depress the price of our Class C capital stock.***

The conversion of some or all of the notes will dilute the ownership interests of existing shareholders. Any sales in the public market of our Class C capital stock issuable upon such conversion could adversely affect prevailing market prices of our Class C capital stock. In addition, the existence of the notes may encourage short selling by market participants because the conversion of the notes could be used to satisfy short positions, or anticipated conversion of the notes into shares of our Class C capital stock could depress the price of our Class C capital stock.

## USE OF PROCEEDS

We estimate that the net proceeds from this offering will be approximately \$313.3 million (or \$360.3 million if the underwriters exercise their option to purchase additional shares in full), after deducting underwriting discounts and commissions and estimated expenses payable by us. In addition, concurrently with this offering, we are offering 1.50% Convertible Senior Notes due 2023 in the aggregate principal amount of \$325,000,000 (or \$373,750,000 if the underwriters in that offering exercise in full their option to purchase additional notes) pursuant to a separate prospectus supplement in the concurrent Convertible Notes Offering. The net proceeds of the concurrent Convertible Notes Offering, after deducting underwriting discounts and commissions and estimated expenses payable by us, are expected to be approximately \$316.5 million (or approximately \$364.0 million if the underwriters in the Convertible Notes Offering exercise in full their option to purchase additional notes).

In connection with the pricing of the notes in the concurrent Convertible Notes Offering (as described under “Concurrent Convertible Notes Offering”), we entered into capped call transactions with one or more of the underwriters of the Convertible Notes Offering or their respective affiliates and other financial institutions, which we refer to herein as the “option counterparties.” We intend to use approximately \$25.6 million of the net proceeds from the concurrent Convertible Notes Offering to pay the cost of the capped call transactions. We intend to use the remainder of the net proceeds from this offering and the concurrent Convertible Notes Offering for general corporate purposes, which may include general and administrative matters and capital expenditures. Additionally, we may choose to expand our current business through acquisitions of, or investments in, other businesses, products or technologies, using cash or shares of our common stock or capital stock. However, we have no definitive agreements or commitments with respect to any such acquisitions or investments at this time.

Pending the application of the net proceeds as described above, we expect to invest the proceeds in short-term, interest-bearing, investment-grade securities. Our management will have broad discretion in the application of the net proceeds from this offering and investors will be relying on the judgment of our management regarding the application of the proceeds.

## CAPITALIZATION

The following table sets forth our cash and cash equivalents and short-term investments and total capitalization as of March 31, 2018:

- on an actual basis;
- on an as adjusted basis to give effect to the completion of this offering of Class C capital stock (assuming the underwriters' option to purchase additional shares is not exercised), based on the public offering price of \$57.00 per share, after deducting underwriting discounts and commissions and estimated offering expenses payable by us, and assuming such net proceeds are held as cash or cash equivalents; and
- on an as further adjusted basis to give effect to the sale of the notes in the concurrent Convertible Notes Offering (assuming the underwriters in the concurrent Convertible Notes Offering do not exercise their option to purchase additional notes), after deducting underwriting discounts and commissions and estimated offering expenses payable by us.

You should read this table in conjunction with our unaudited condensed consolidated financial statements and the related notes included in our Quarterly Report on Form 10-Q for the three months ended March 31, 2018 filed with the SEC on May 8, 2018 and incorporated by reference herein.

- (1) Does not reflect our entry into the capped call transactions, including our payment of approximately \$25.6 million to the option counterparties, as described under “Use of Proceeds,” which will result in a reduction to our cash and cash equivalents, additional paid-in capital and total capitalization.
- (2) In accordance with ASC 470-20, “Accounting for Convertible Debt Instruments,” convertible debt that may be wholly or partially settled in cash at the option of the issuer is required to be separated into a liability and an equity component, such that interest expense reflects the issuer’s nonconvertible debt interest rate. Upon issuance, a debt discount is recognized as a decrease in debt and an increase in equity. The debt component accretes up to the principal amount over the expected term of the debt. The amount shown in the table above for the notes is the carrying value of the notes determined based on the outstanding principal amount of the notes of \$460.0 million net of unamortized debt discount and debt issuance costs.
- (3) The amount shown in the table above for the notes is the aggregate principal amount of the notes and does not reflect the debt discount, fees and expenses that we will be required to recognize in accordance with ASC 470-20.

The Class A common stock, Class B common stock and Class C capital stock shown as issued and outstanding in the table above is based on the 57,288,985 shares of Class A common stock, 6,217,447 shares of Class B common stock and 129,437,894 shares of Class C capital stock outstanding as of March 31, 2018, and excludes (i) shares of Class A common stock reserved for issuance upon conversion of our Class B common stock, (ii) shares of Class A common stock reserved for issuance upon conversion of Trulia, LLC’s convertible senior notes due 2020, (iii) shares of Class C capital stock reserved for issuance upon conversion of our convertible senior notes due 2021, and (iv) shares of Class C capital stock reserved for issuance upon conversion of the notes offered hereby. The table above also excludes, as of March 31, 2018, (i) 4,104,408 shares of Class A common stock and 24,379,540 shares of Class C capital stock issuable upon exercise of outstanding stock options, (ii) 49,139 shares of Class A common stock and 5,297,261 shares of Class C capital stock underlying settlement of outstanding restricted stock units, (iii) shares of Class A common stock or Class C capital stock that may become issuable upon settlement of outstanding restricted units, and (iv) 6,833,199 shares of Class A common stock and/or Class C capital stock reserved for issuance under our Amended and Restated 2011 Incentive Plan.

Concurrently with this offering of our Class C capital stock, we are offering \$325,000,000 aggregate principal amount of 1.50% Convertible Senior Notes due 2023 (\$373,750,000 aggregate principal amount if the underwriters exercise in full their option to purchase additional notes) pursuant to a separate prospectus supplement in an underwritten public offering. However, amounts sold in each offering may increase or decrease based on market conditions relating to a particular security. This offering is not contingent upon our concurrent Convertible Notes Offering and our concurrent Convertible Notes Offering is not contingent upon this Class C capital stock offering. We cannot assure you that our concurrent Convertible Notes Offering will be completed.

The notes will mature on July 1, 2023 unless repurchased, redeemed or converted. Subject to satisfaction of certain conditions and during certain periods, the notes may be converted at an initial conversion rate of 12.7592 shares of Class C capital stock per \$1,000 principal amount of notes (equivalent to an initial conversion price of approximately \$78.37 per share of Class C capital stock). The conversion rate is subject to adjustment if certain events occur.

See “Use of Proceeds” for additional information regarding the use of proceeds from our concurrent Convertible Notes Offering.

## MATERIAL U.S. FEDERAL INCOME TAX CONSIDERATIONS

The following is a summary of certain material U.S. federal income tax consequences to non-U.S. holders (as defined below) of the ownership and disposition of shares of our Class C capital stock, but does not purport to be a complete analysis of all the potential tax considerations relating thereto. This summary is based upon provisions of the Internal Revenue Code of 1986, as amended (the “Code”), applicable regulations, administrative rulings and judicial decisions, all as in effect as of the date of this prospectus supplement, any of which may subsequently be changed, possibly retroactively, or interpreted differently by the Internal Revenue Service (the “IRS”), so as to result in U.S. federal income tax consequences different from those discussed below.

This summary is limited to investors who will hold shares of our Class C capital stock as a capital asset (generally property held for investment). This summary does not address all aspects of U.S. federal income taxation related to the ownership and disposition of the shares of our Class C capital stock and does not deal with all tax consequences that may be relevant to investors in light of their personal circumstances or particular situations, such as:

- investors who may be subject to special tax treatment, including dealers in securities or currencies, financial institutions, regulated investment companies, real estate investment trusts, tax exempt entities, insurance companies and traders in securities that elect to use a mark-to-market method of tax accounting for their securities;
- persons holding shares of our Class C capital stock as a part of a hedging, integrated, conversion or constructive sale transaction or a straddle;
- U.S. Holders (as defined below) of shares of our Class C capital stock whose “functional currency” is not the U.S. dollar;
- investors in pass-through entities holding shares of our Class C capital stock;
- certain former citizens or residents of the United States;
- persons subject to the alternative minimum tax;
- persons that own, or are deemed to own, more than 5% of our capital stock;
- persons deemed to sell our Class C capital stock under the constructive sale provisions of the Code; and
- persons subject to the potential application of the Medicare tax on net investment income.

If a partnership (or any entity or arrangement treated as a partnership for U.S. federal income tax purposes) holds shares of our Class C capital stock, the tax treatment of a partner generally will depend upon the status of the partner and the activities of the partnership. Partnerships holding shares of Class C capital stock and partners in such partnerships should consult their tax advisors.

This discussion does not address any U.S. estate tax considerations or tax considerations arising under the laws of any state, local or non-U.S. jurisdiction.

Investors considering the purchase of shares of our Class C capital stock should consult their tax advisors concerning the U.S. federal income tax consequences to them in light of their own specific situation, as well as consequences arising under the laws of any other taxing jurisdiction.

### **Non-U.S. Holder Defined**

For purposes of this discussion, a non-U.S. holder is any holder (other than a partnership, including any entity or arrangement classified as a partnership for U.S. federal income tax purposes) that is not (a) a U.S.

citizen or U.S. resident, (b) a corporation or other entity taxable as a corporation for U.S. federal income tax purposes, that was created or organized in or under the laws of the United States, any state thereof or the District of Columbia, (c) an estate whose income is subject to U.S. federal income taxation regardless of its source, or (d) a trust that either is subject to the supervision of a court within the United States and has one or more U.S. persons with authority to control all of its substantial decisions or has a valid election in effect under applicable Treasury Regulations to be treated as a U.S. person.

### **Distributions on our Class C Capital Stock**

Distributions made on our Class C capital stock generally will constitute dividends for U.S. tax purposes to the extent of our current and accumulated earnings and profits. Distributions in excess of our current and accumulated earnings and profits will be treated as a return of capital to the extent of the Non-U.S. Holder's adjusted tax basis in the Class C capital stock and thereafter as capital gain from the sale or exchange of such Class C capital stock.

Any dividends paid to a Non-U.S. Holder with respect to the shares of our Class C capital stock will be subject to withholding tax at a 30% rate or such lower rate as may be specified by an applicable income tax treaty. However, dividends that are effectively connected with the conduct of a trade or business within the United States and, where required by an applicable income tax treaty, are attributable to a U.S. permanent establishment or fixed base are not subject to the withholding tax, but instead are subject to U.S. federal income tax on a net income basis in the same manner as if the Non-U.S. Holder were a U.S. Holder. In addition, any such effectively connected income received by a foreign corporation may, under certain circumstances, be subject to an additional branch profits tax at a 30% rate or such lower rate as may be specified by an applicable income tax treaty.

In order to claim the benefit of an applicable treaty rate or for effectively connected income to be exempt from withholding, a Non-U.S. Holder must provide a properly executed (i) IRS Form W-8BEN or IRS Form W-8BEN-E (or other applicable form) claiming an exemption from or reduction in withholding under the benefit of an applicable income tax treaty or (ii) IRS Form W-8ECI (or other applicable form) stating that a dividend paid on our Class C Capital Stock is not subject to withholding tax because it is effectively connected with the Non-U.S. Holder's conduct of a trade or business in the United States.

### **Sale, Exchange or Other Taxable Disposition of Shares of our Class C Capital Stock**

Subject to the discussions below concerning backup withholding and FATCA, gain realized by a Non-U.S. Holder on the sale, exchange or other taxable disposition of our Class C capital stock generally will not be subject to U.S. federal income tax unless:

- that gain is effectively connected with the Non-U.S. Holder's conduct of a trade or business in the United States (and, if required by an applicable income tax treaty, is attributable to a U.S. permanent establishment or fixed base);
- the Non-U.S. Holder is an individual who is present in the United States for 183 days or more in the taxable year of that disposition and certain other conditions are met; or
- we are or have been a "U.S. real property holding corporation" for U.S. federal income tax purposes during the shorter of the Non-U.S. Holder's holding period or the 5-year period ending on the date of disposition of Class C capital stock. Although there can be no assurance, we believe that we are not, and we do not anticipate becoming in the near term, a U.S. real property holding corporation for U.S. federal income tax purposes.

If a Non-U.S. Holder is described in the first bullet point above, such Non-U.S. Holder will be subject to tax on the net gain derived from the sale, exchange or other taxable disposition under regular graduated U.S. federal

income tax rates and in the same manner as if the Non-U.S. Holder were a U.S. Holder. In addition, if a Non-U.S. Holder is a foreign corporation, it may be subject to an additional branch profits tax at a rate of 30% of its effectively connected earnings and profits for that taxable year, or at such lower rate as may be specified by an applicable income tax treaty. If a Non-U.S. Holder is an individual described in the second bullet point above, such Non-U.S. Holder will be subject to a flat 30% tax (or such lower rate as may be specified by an applicable income tax treaty) on the gain derived from the sale, exchange or other taxable disposition, which may be offset by U.S. source capital losses, even though such Non-U.S. Holder is not considered a resident of the United States.

### **Backup Withholding and Information Reporting**

Generally, we must report annually to the IRS the amount of dividends paid to Non-U.S. Holders and the amount of tax withheld, if any, with respect to such payment. Copies of the information returns reporting such dividends and withholding may also be made available to the tax authorities in the country in which a Non-U.S. Holder resides under the provisions of an applicable income tax treaty.

A Non-U.S. Holder may be subject to information reporting and backup withholding with respect to payments of dividends on or the gross proceeds of disposition of our Class C capital stock unless the certification described above in “—Distributions on our Class C Capital Stock” has been received and we (or another applicable withholding agent) do not have actual knowledge or reason to know that the holder is a U.S. person, as defined under the Code, who is not an exempt recipient.

Any amounts withheld under the backup withholding rules will be allowed as a refund or a credit against a Non-U.S. Holder’s U.S. federal income tax liability provided the required information is furnished timely to the IRS.

### **FATCA**

Provisions of the Code commonly known as the Foreign Account Tax Compliance Act, or FATCA, generally impose a 30% withholding tax on payments of dividends on our Class C capital stock, and, after December 31, 2018, gross proceeds from the sale or other disposition of our Class C capital stock if paid to a foreign entity unless (i) if the foreign entity is a “foreign financial institution,” the foreign entity undertakes certain due diligence, reporting, withholding, and certification obligations, (ii) if the foreign entity is not a “foreign financial institution,” the foreign entity identifies certain of its U.S. investors, or (iii) the foreign entity is otherwise exempt from FATCA. An intergovernmental agreement between the United States and an applicable foreign country may modify this regime.

If withholding under FATCA is required on any payment related to our Class C capital stock, investors not otherwise subject to withholding (or that otherwise would be entitled to a reduced rate of withholding) on such payment may be required to seek a refund or credit from the IRS.

Investors are encouraged to consult their own tax advisors regarding the possible implications of FATCA on their investment in our Class C Capital Stock.

**UNDERWRITING**

We and Goldman Sachs & Co. LLC and Citigroup Global Markets Inc., as representatives of the several underwriters named below, have entered into an underwriting agreement with respect to our Class C capital stock. Subject to certain conditions, each underwriter has severally agreed to purchase the number of shares of our Class C capital stock indicated in the following table.

<b>Underwriters</b>	<b>Number of Shares</b>
Goldman Sachs & Co. LLC	3,078,948
Citigroup Global Markets Inc.	2,052,632
Canaccord Genuity LLC	190,058
JMP Securities LLC	190,058
Macquarie Capital (USA) Inc.	190,058
Total	<u>5,701,754</u>

Subject to the terms and conditions set forth in the underwriting agreement, the underwriters are committed to purchase all of the shares of Class C capital stock being offered by us in the public offering if they purchase any shares. The underwriting agreement also provides that if an underwriter defaults, the purchase commitments of nondefaulting underwriters may also be increased or the offering may be terminated. The offering of the shares by the underwriters is subject to receipt and acceptance and subject to the underwriters' right to reject any order in whole or in part.

The underwriters propose to offer the Class C capital stock directly to the public at the public offering price set forth on the cover page of this prospectus supplement and to certain dealers at the price less a concession not in excess of \$1.197 per share. After the public offering of the shares, the offering price and other selling terms may be changed by the underwriters.

Our Class C capital stock is listed on The Nasdaq Global Select Market under the symbol "Z."

The underwriters have an option to buy up to 855,263 additional shares of Class C capital stock from us to cover sales by the underwriters of a greater number of shares than the total number set forth in the table above. They may exercise that option for 30 days. If any shares are purchased pursuant to this option, the underwriters will severally purchase shares in approximately the same proportion as set forth in the table above. If any additional shares of Class C capital stock are purchased, the underwriters will offer the additional shares on the same terms as those on which the shares are being offered. The underwriting fee for the shares sold in the public offering is equal to the public offering price per share of Class C capital stock less the amount paid by the underwriters to us per share of Class C capital stock. The underwriting fee is \$1.995 per share. The following table shows the per share and total underwriting discounts and commissions to be paid to the underwriters by us. Such amounts are shown assuming both no exercise and full exercise of the underwriters' option to purchase up to an additional 855,263 additional shares of Class C capital stock.

We have agreed to indemnify the several underwriters against certain liabilities in connection with this offering, including liabilities under the Securities Act, or to contribute to payments the underwriters may be required to make in respect of those liabilities.

**Paid by Us**

	<b>No Exercise</b>	<b>Full Exercise</b>
Per Share	\$ 1.995	\$ 1.995
Total	\$ 11,374,999	\$ 13,081,249

We estimate that the total expenses of this offering, including registration, filing fees, printing fees and legal and accounting expenses, but excluding the underwriting discounts and commissions, will be approximately \$340,000.

A prospectus in electronic format may be made available on the web sites maintained by one or more underwriters, or selling group members, if any, participating in the offering. The underwriters may agree to allocate a number of shares to underwriters and selling group members for sale to their online brokerage account holders. Internet distributions will be allocated by the representatives to underwriters and selling group members that may make Internet distributions on the same basis as other allocations.

#### **No Sale of Similar Securities**

We and our directors and our executive officers have agreed with the underwriters, subject to certain exceptions, not to offer, sell, contract to sell, pledge or otherwise dispose of any shares of our capital stock or securities convertible into, or exercisable or exchangeable for such shares of capital stock during the period from the date of this prospectus supplement continuing through the date 60 days after the date of this prospectus supplement, except with the prior written consent of the representatives.

With respect to issuances or sales by us, this agreement does not apply to (i) the offer and sale of shares of Class C capital stock in this offering; (ii) the offer and sale of the notes or shares of Class C capital stock upon conversion thereof pursuant to the concurrent Convertible Notes Offering; (iii) the entry into, or the consummation of the transactions contemplated by, the capped call transactions pursuant to the concurrent Convertible Notes Offering; (iv) any securities convertible into, or exercisable for, shares of our capital stock issued pursuant to any employee stock option plan or incentive plan, stock ownership plan or dividend reinvestment plan in place at the time of this prospectus supplement; (v) any securities issuable upon the exercise or conversion of securities or the exercise of warrants outstanding at the time of this prospectus supplement; (vi) issuance of shares of stock representing up to 10% of the outstanding shares of capital stock as of the date hereof in connection with one or more acquisitions by us of the assets or capital stock of another person or entity, whether through merger, asset acquisition, stock purchase or otherwise, provided, however, that in the case of this clause (vi), the issuance of such shares of capital stock by us shall be subject to the condition that each recipient of such shares has previously signed (or will enter into prior to or concurrently with such issuance) an agreement having substantially the same lock-up terms; or (vii) the entry into arrangements relating to transactions described in this prospectus supplement under the heading "Use of Proceeds."

With respect to issuances or sales by our directors and executive officers, this agreement contains customary exceptions for certain transfers by or on behalf of such directors and executive officers.

#### **Concurrent Convertible Notes Offering; Capped Call Transactions**

Concurrently with this offering, pursuant to a separate prospectus supplement, we are offering \$325,000,000 aggregate principal amount of the notes (or \$373,750,000 principal amount of notes if the underwriters in that offering exercise their option to purchase additional notes in full). Any such sales of the notes or any sales of our Class C capital stock issued upon conversion of the notes in the public market may affect the price of our Class C capital stock. Neither the completion of this offering nor the concurrent Convertible Notes Offering is contingent on the completion of the other, so it is possible that this offering occurs and the Convertible Notes Offering does not occur, and vice versa. We cannot assure you that the concurrent Convertible Notes Offering will be completed on the terms described above, or at all.

In connection with the pricing of the notes, we entered into capped call transactions with the underwriters of the Convertible Notes Offering or their respective affiliates and other financial institutions, which we refer to as the "option counterparties." The capped call transactions are expected generally to reduce the potential dilution to our Class C capital stock upon any conversion of the notes and/or offset any cash payments we are required to make in excess of the principal amount of converted notes, as the case may be, with such reduction and/or offset subject to a cap.

If the underwriters of the Convertible Notes Offering exercise their option to purchase additional notes, we expect to enter into additional capped call transactions with the option counterparties.

In connection with establishing their initial hedges of the capped call transactions, the option counterparties or their respective affiliates expect to enter into derivative transactions with respect to our Class C capital stock concurrently with or shortly after the pricing of the notes. This activity could increase (or reduce the size of any decrease in) the market price of our Class C capital stock or the notes at that time.

In addition, the option counterparties or their respective affiliates may modify their hedge positions by entering into or unwinding derivatives with respect to our Class C capital stock and/or purchasing or selling our Class C capital stock or other securities of ours in secondary market transactions following the pricing of the notes and prior to the maturity of the notes (and are likely to do so during any observation period related to a conversion of notes). This activity could also cause or avoid an increase or a decrease in the market price of our Class C capital stock.

For a discussion of the potential impact of any market or other activity by the option counterparties or their respective affiliates in connection with the capped call transactions, see “Risk Factors—Risks Related to Our Concurrent Convertible Notes Offering—The capped call transactions to be entered into in connection with the concurrent Convertible Notes Offering may affect the value of our Class C capital stock.”

### **Price Stabilization and Short Positions**

In connection with this offering, the underwriters may purchase and sell shares of Class C capital stock in the open market. These transactions may include short sales, stabilizing transactions and purchases to cover positions created by short sales. Short sales involve the sale by the underwriters of a greater number of shares than they are required to purchase in the offering, and a short position represents the amount of such sales that have not been covered by subsequent purchases. A “covered short position” is a short position that is not greater than the amount of additional shares for which the underwriters’ option described above may be exercised. The underwriters may cover any covered short position by either exercising their option to purchase additional shares or purchasing shares in the open market. In determining the source of shares to cover the covered short position, the underwriters will consider, among other things, the price of shares available for purchase in the open market as compared to the price at which they may purchase additional shares pursuant to the option described above. “Naked” short sales are any short sales that create a short position greater than the amount of additional shares for which the option described above may be exercised. The underwriters must cover any such naked short position by purchasing shares in the open market. A naked short position is more likely to be created if the underwriters are concerned that there may be downward pressure on the price of the Class C capital stock in the open market after pricing that could adversely affect investors who purchase in the offering. Stabilizing transactions consist of various bids for or purchases of Class C capital stock made by the underwriters in the open market prior to the completion of the offering.

The underwriters may also impose a penalty bid. This occurs when a particular underwriter repays to the underwriters a portion of the underwriting discount received by it because the representatives have repurchased shares sold by or for the account of such underwriter in stabilizing or short covering transactions.

Purchases to cover a short position and stabilizing transactions, as well as other purchases by the underwriters for their own accounts, may have the effect of preventing or retarding a decline in the market price of our stock, and together with the imposition of the penalty bid, may stabilize, maintain or otherwise affect the market price of the Class C capital stock. As a result, the price of the Class C capital stock may be higher than the price that otherwise might exist in the open market. The underwriters are not required to engage in these activities and may end any of these activities at any time. These transactions may be effected on The Nasdaq Global Select Market, in the over-the-counter market or otherwise.

### **Other Relationships**

The underwriters and their respective affiliates are full service financial institutions engaged in various activities, which may include sales and trading, commercial and investment banking, advisory, investment management, investment research, principal investment, hedging, market making, brokerage and other financial and non-financial activities and services. Certain of the underwriters and their respective affiliates have provided, and may in the future provide, a variety of these services to us and to persons and entities with relationships with us, for which they received or will receive customary fees and expenses. The underwriters are also acting as underwriters in our concurrent Convertible Notes Offering for which they will receive customary underwriting discounts and commissions and such underwriters or their affiliates may be option counterparties to our capped call transactions.

In the ordinary course of their various business activities, the underwriters and their respective affiliates, officers, directors and employees may purchase, sell or hold a broad array of investments and actively traded securities, derivatives, loans, commodities, currencies, credit default swaps and other financial instruments for their own account and for the accounts of their customers, and such investment and trading activities may involve or relate to assets, securities and/or instruments of ours (directly, as collateral securing other obligations or otherwise) and/or persons and entities with relationships with us. The underwriters and their respective affiliates may also communicate independent investment recommendations, market color or trading ideas and/or publish or express independent research views in respect of such assets, securities or instruments and may at any time hold, or recommend to clients that they should acquire, long and/or short positions in such assets, securities and instruments.

### DESCRIPTION OF CAPITAL STOCK

As of the date of this prospectus, authorized capital stock is 1,890,000,000 shares, each with a par value of \$0.0001 per share, consisting of the following four classes of stock:

- 1,245,000,000 shares designated as Class A common stock;
- 15,000,000 shares designated as Class B common stock;
- 600,000,000 shares designated as Class C capital stock; and
- 30,000,000 shares designated as preferred stock.

Class A common stock and Class B common stock are sometimes referred to collectively as our common stock. The following summarizes important provisions of our capital stock and describes important provisions of our amended and restated articles of incorporation and amended and restated bylaws. This summary may not, however, describe all provisions of our amended and restated articles of incorporation and amended and restated bylaws that are important to you. This summary is qualified by our amended and restated articles of incorporation and amended and restated bylaws, which have been filed and incorporated by reference as exhibits to documents incorporated or deemed to be incorporated by reference in this prospectus, and by the provisions of applicable law.

## **Class A Common Stock and Class B Common Stock**

### ***Voting Rights***

The Class A common stock has one vote per share, and the Class B common stock has ten votes per share. On any matter that is submitted to a vote of shareholders, the holders of Class A common stock are entitled to one vote per share of Class A common stock and the holders of the Class B common stock are entitled to ten votes per share of Class B common stock. Holders of Class A common stock and Class B common stock will vote together as a single group on all matters (including the election of directors) submitted to a vote of shareholders, unless otherwise required by law or our amended and restated articles of incorporation.

Under Washington law and our amended and restated articles of incorporation, holders of Class A common stock and holders of Class B common stock may each be entitled to vote as a separate voting group, or as a separate voting group with other classes that are affected in the same or a substantially similar way, on a proposed amendment to our amended and restated articles of incorporation that would:

- effect an exchange or reclassification of all or part of the issued and outstanding shares of the class into shares of another class that would adversely affect the holders of the exchanged or reclassified class;
- change the rights, preferences or limitations of all or part of the issued and outstanding shares of the class that would adversely affect the holders of shares of the class;
- change all or part of the issued and outstanding shares of the class into a different number of shares of the same class, which would adversely affect the holders of the class;
- limit or deny an existing preemptive right of all or part of the shares of the class;
- cancel or otherwise adversely affect rights to distributions or dividends that have accumulated but have not yet been declared on all or part of the shares of the class; or
- effect a redemption or cancellation of all or part of the shares of the class in exchange for cash or any other form of consideration other than shares of capital stock.

Holders of Class A common stock and Class B common stock are not entitled to cumulative voting in the election of directors, which means that the holders of a majority of the voting power of Class A common stock and Class B common stock, voting together as a single voting group, will be entitled to elect all of the directors standing for election, if they so choose.

### ***Dividends***

Subject to preferences that may apply to any shares of preferred stock outstanding at the time, the holders of Class A common stock and Class B common stock are entitled to share equally in any dividends that our board of directors may declare from time to time unless different treatment is approved by the affirmative vote of the holders of a majority of the outstanding shares of Class A common stock and the holders of a majority of the outstanding shares of Class B common stock, each voting as a separate voting group. If a dividend is paid in the form of Class A common stock or Class B common stock, then holders of Class A common stock will receive Class A common stock and holders of Class B common stock will receive Class B common stock.

### ***Liquidation Rights***

Upon our liquidation, dissolution or winding up, the holders of Class A common stock and Class B common stock are entitled to share ratably in proportion to the number of shares of Class A common stock then held by each (assuming the conversion of all shares of Class B common stock into shares of Class A common stock) in our assets available for distribution to the shareholders after the payment of any liabilities and the liquidation preferences on any outstanding preferred stock.

***Redemption***

Neither the Class A common stock nor the Class B common stock is redeemable.

***Preemptive Rights***

Our amended and restated articles of incorporation provide that no preemptive rights shall exist with respect to shares of stock or securities convertible into shares of stock, except to the extent provided by written agreement.

***Conversion***

All of the Class B common stock is held or controlled by Richard Barton or Lloyd Frink, each of whom are referred to as a “founder.” Each share of Class B common stock is convertible at any time at the option of the holder into one share of Class A common stock. In addition, each share of Class B common stock will convert automatically into one share of Class A common stock upon any transfer, whether or not for value, except for (1) certain transfers described in our amended and restated articles of incorporation, so long as the founder who transfers the Class B common stock continues to hold exclusive voting and dispositive power with respect to the shares transferred and the transferee agrees to be bound the terms of a Transfer Restriction Agreement (as defined below) or (2) transfers between the founders or entities through which a founder holds exclusive voting and dispositive power with respect to Class B common stock, subject to the requirements of the Transfer Restriction Agreements.

In the event of the death or mental disability of a founder, each share of such founder’s Class B common stock will convert into one share of Class A common stock, except as set forth below. If a founder (who is referred to as the “transferring founder”), or an entity that holds Class B common stock with respect to which such founder holds exclusive voting and dispositive power, transfers voting control of shares of Class B common stock to the other founder contingent or effective upon the transferring founder’s death or mental disability, then the transferring founder’s death or mental disability will not immediately trigger a conversion to Class A common stock, provided that the shares of Class B common stock as to which voting control was transferred shall convert to Class A common stock no later than nine months after the death or mental disability of the transferring founder. Further, if one founder dies or becomes mentally disabled simultaneously with the other founder dying or becoming mentally disabled, the founders’ death or mental disability will not immediately trigger a conversion to Class A common stock if voting control of the founders’ shares of Class B common stock is transferred to a trustee designated by the founders and approved by our board of directors, provided that the shares of Class B common stock as to which voting control was transferred shall convert to Class A common stock no later than nine months after the death or mental disability of the founders.

Once converted into Class A common stock, the Class B common stock may not be reissued.

Except for the issuance of Class B common stock in connection with dividends or distributions in accordance with our amended and restated articles of incorporation, we will not issue additional shares of Class B common stock unless the issuance is approved by holders of a majority of the outstanding shares of Class A common stock and holders of a majority of the outstanding shares of Class B common stock, each voting as a separate voting group.

***Equal Status***

Except as otherwise expressly provided in our amended and restated articles of incorporation or required by applicable law, shares of Class A common stock and shares of Class B common stock have the same rights and privileges and rank equally, share ratably, and are identical in all respects as to all matters. Without limiting the generality of the foregoing sentence, in connection with a Change of Control Transaction (as defined in our

amended and restated articles of incorporation), shares of Class A common stock and Class B common stock will be treated equally, identically, and ratably, on a per share basis, with respect to any consideration into which such shares are converted or any consideration paid or otherwise distributed in respect of such shares to our shareholders, unless different treatment of the shares of each such class is approved by the affirmative vote of the holders of a majority of the outstanding shares of Class A common stock and the holders of a majority of the outstanding shares of Class B common stock, each voting separately as a separate voting group.

## **Class C Capital Stock**

### ***Voting Rights***

Except with respect to the separate voting group rights under the circumstances described in Section 2.5 of our amended and restated articles of incorporation, or except as required by applicable law, shares of Class C capital stock have no voting power.

### ***Dividends***

Subject to the preferences that may apply to any series of preferred stock outstanding at any time, the holders of Class C capital stock are entitled to share equally in any dividends that our board of directors may declare from time to time with respect to shares of our common stock, unless different treatment is approved by the affirmative vote of the holders of a majority of the outstanding shares of Class C capital stock, the holders of a majority of the outstanding shares of Class A common stock and the holders of a majority of the outstanding shares of Class B common stock, each voting separately as a separate voting group. If a dividend declared with respect to our common stock is paid in the form of common stock, then holders of Class C capital stock will receive Class C capital stock. Except for a dividend declared in accordance with the provisions described above, our amended and restated articles of incorporation provide that we will not declare a dividend with respect to the Class C capital stock, unless it is approved by the affirmative vote of the holders of a majority of the outstanding shares of Class A common stock and the holders of a majority of the outstanding shares of Class B common stock, each voting separately as a separate voting group.

### ***Conversion Upon Dissolution***

Immediately prior to the earlier of (1) our dissolution under Washington law or (2) any record date established to determine the holders of our capital stock entitled to receive our net assets in a dissolution under Washington law, each outstanding share of Class C capital stock will automatically, without any further action, convert into and become one fully paid and nonassessable share of Class A common stock. We will reserve and keep available out of authorized but unissued shares of Class A common stock the number of shares sufficient to effect the conversion of all outstanding shares of Class C capital stock into shares of Class A common stock.

### ***Redemption***

The Class C capital stock is not redeemable.

### ***Preemptive Rights***

Our amended and restated articles of incorporation provide that no preemptive rights will exist with respect to shares of stock or securities convertible into shares of stock, except to the extent provided by written agreement.

### ***Equal Status***

Except as expressly provided in our amended and restated articles of incorporation or required by applicable law, shares of Class C capital stock have the same rights and privileges and rank equally, share ratably, and are identical to the shares of Class A common stock and Class B common stock in all respects as to all matters.

Without limiting the generality of the foregoing sentence, in connection with a Change of Control Transaction (as defined in our amended and restated articles of incorporation), shares of Class C capital stock will be treated equally, identically, and ratably, on a per share basis, with shares of Class A common stock with respect to any consideration into which such shares are converted or any consideration paid or otherwise distributed in respect of such shares to our shareholders, unless different treatment of the shares of each such class is approved by the affirmative vote of the holders of a majority of the outstanding shares of Class C capital stock, the holders of a majority of the outstanding shares of Class A common stock, and the holders of a majority of the outstanding shares of Class B common stock, each voting separately as a separate voting group.

### **Transfer Restriction Agreements**

On July 20, 2015, we entered into a transfer restriction agreement with each of our founders, Messrs. Barton and Frink, and certain of their respective affiliates (collectively, the “Transfer Restriction Agreements”). The Transfer Restriction Agreements were entered into in connection with the declaration by our board of directors of the issuance of shares of Class C capital stock by means of a dividend to holders of our Class A common stock and Class B common stock. Pursuant to the Transfer Restriction Agreements, beginning on the date on which Messrs. Barton or Frink, as applicable, no longer serves on our board of directors (each such date, Messrs. Barton’s or Frink’s “Trigger Date,” respectively), Messrs. Barton or Frink and certain of their respective affiliates that are or become party to the agreements (generally, trusts and other estate planning vehicles through which Messrs. Barton or Frink hold all or a portion of their shares of Class B common stock) must transfer or convert to Class A common stock at least one share of Class B common stock for each two shares of Class C capital stock transferred. The required ratio of shares of Class B common stock to shares of Class C capital stock owned by Messrs. Barton and Frink is subject to adjustment in connection with certain dividends, stock splits, distributions or recapitalizations. These provisions are intended to limit, after the applicable Trigger Date, the ability of Messrs. Barton and Frink to sell or otherwise transfer the non-voting Class C capital stock issued to them in the initial dividend of Class C capital stock to holders of Class A common stock and Class B common stock in respect of their shares of Class B common stock in a manner that does not proportionately reduce their ownership of the Class B common stock.

The Transfer Restriction Agreements also include an equal status provision, which provides that neither Mr. Barton nor Mr. Frink, nor their affiliates that are or become a party to the Transfer Restriction Agreements, may sell any of their shares of Zillow Group capital stock in connection with a change of control transaction, including a tender or exchange offer, for (1) with respect to their shares of Class A common stock, an amount per share greater than, or a form of consideration different from, that which the holders of shares of Class A common stock receive in the transaction; (2) with respect to their shares of Class B common stock, an amount per share greater than, or a form of consideration different from, that which the holders of shares of Class A common stock receive in the transaction, unless different treatment of the shares of Class A common stock and Class B common stock is approved by the affirmative vote of the holders of a majority of the outstanding shares of Class A common stock and the holders of a majority of the Class B common stock, each voting separately as a separate group; or (3) with respect to their shares of Class C capital stock, an amount per share greater than, or a form of consideration different from, that which the holders of shares of Class C capital stock receive in the transaction.

### **Preferred Stock**

Our board of directors has the authority to issue up to 30,000,000 shares of preferred stock from time to time in one or more series, including preferred stock with voting, conversion or other rights that could adversely affect the voting power and other rights of the holders of other shares of capital stock, without further action by shareholders, other than approval by or written agreement of holders of a majority of outstanding Class B common stock, which is held by our founders, Messrs. Barton and Frink (which is referred to as the “approval right”), or in lieu of such approval or written agreement, approval by our board of directors including a founder in his capacity as a member of our board of directors. The approval right will terminate when the Class B common stock represents less than 7% of the aggregate number of shares of the outstanding Class A common

stock and Class B common stock. Subject to this approval right, our board of directors also has the authority to fix the voting rights, limitations, and relative rights of any series of preferred stock, including dividend rights, liquidation rights, redemption rights, conversion rights, and voting rights. The issuance of preferred stock may decrease the market price of the Class A common stock and Class C capital stock.

#### **Anti-Takeover Effects of Certain Provisions of Our Amended and Restated Articles of Incorporation, Amended and Restated Bylaws, and Washington Law**

Provisions of our amended and restated articles of incorporation, our amended and restated bylaws, and Washington law could have the effect of delaying or preventing a third party from acquiring us, even if the acquisition would benefit our shareholders. These provisions, which are summarized below, may delay, defer or prevent a tender offer or takeover attempt of Zillow Group that a shareholder might consider in the shareholder's best interest, including those attempts that might result in a premium over the market price for the shares held by our shareholders. These provisions are intended to enhance the likelihood of continuity and stability in the composition of our board of directors and in the policies formulated by our board of directors and to reduce our vulnerability to an unsolicited proposal for a takeover that does not contemplate the acquisition of all of our outstanding shares, or an unsolicited proposal for the restructuring or sale of all or part of our business. Some of these provisions will become effective only after the date (the "threshold date") on which the Class B common stock held by our founders, Messrs. Barton and Frink, represents less than 7% of the aggregate number of shares of the outstanding Class A common stock and Class B common stock.

#### ***Three Class Structure***

As discussed above, our Class B common stock has ten votes per share, while our Class A common stock has one vote per share and our Class C capital stock is nonvoting (except in limited circumstances provided under Washington law or in our amended and restated articles of incorporation). All of the Class B common stock is controlled by our founders, Messrs. Barton and Frink, and, as of the date of this prospectus, represents more than a majority of the voting power of our outstanding capital stock. As a result, for the foreseeable future our founders will continue to be able to control all matters submitted to our shareholders for approval, including the election and removal of directors and significant corporate transactions such as a merger or other sale of Zillow Group or of its assets. In addition, until the threshold date, our founders will be able to call meetings of shareholders and fill vacancies on our board of directors, and directors may be removed with or without cause. The concentrated control described above could also delay, defer or prevent a change of control, merger, consolidation, takeover or other business combination involving Zillow Group that other shareholders may support, and could discourage a potential acquiror from initiating such a transaction.

Because the Class C capital stock has no voting rights (except in limited circumstances provided under Washington law or in our amended and restated articles of incorporation), the issuance of Class C capital stock will not result in voting dilution to the holders of shares Class A common stock or Class B common stock. As a result, the issuance of Class C capital stock could prolong the duration of our founders' current relative ownership of voting power and their ability to control all matters submitted to our shareholders for approval, including the election and removal of directors and significant corporate transactions such as a merger or other sale of Zillow Group or of its assets.

#### ***Authorized but Unissued Shares of Our Class A Common Stock, Class C Capital Stock, and Preferred Stock***

Our authorized but unissued shares of Class A common stock, Class C capital stock, and preferred stock are available for our board of directors to issue without shareholder approval (except to the extent described above under "—Preferred Stock"). To the extent described above in "—Preferred Stock," our board of directors has the authority under our amended and restated articles of incorporation to issue preferred stock with rights superior to the rights of Class A common stock and Class C capital stock. As a result, preferred stock could be issued quickly, could adversely affect the rights of holders of Class A common stock and Class C capital stock and

could be issued with terms calculated to delay or prevent a change of control or make removal of management more difficult. We may use the additional authorized shares of Class A common stock, Class C capital stock, or preferred stock for a variety of corporate purposes, including future public offerings to raise additional capital, corporate acquisitions, and employee benefit and incentive plans. The existence of our authorized but unissued shares of Class A common stock, Class C capital stock, and preferred stock could render more difficult or discourage an attempt to obtain control of Zillow Group by means of a proxy contest, tender offer, merger or other transaction.

***Classified Board of Directors; Election and Removal of Directors***

Our amended and restated articles of incorporation provide for the division of our board of directors into three classes, as nearly equal in number as practicable, with the directors in each class serving for three-year terms, and one class being elected annually by our shareholders. Prior to the threshold date, our directors can be removed with or without cause by holders of Class A common stock and Class B common stock, voting together as a single group. After the threshold date, our directors can be removed only for cause. Because this system of electing, appointing, and removing directors generally makes it more difficult for shareholders to replace a majority of our board of directors, it may discourage a third party from initiating a tender offer or otherwise attempting to gain control of Zillow Group, and may maintain the incumbency of our board of directors.

***Limits on Ability of Shareholders to Act by Written Consent or Call Special Meetings of Shareholders***

Washington law limits the ability of shareholders of public companies from acting by written consent by requiring unanimous written consent for a shareholder action to be effective. This limit on the ability of our shareholders to act by less than unanimous written consent may lengthen the amount of time required to take shareholder action. In addition, our amended and restated articles of incorporation provide that special meetings of our shareholders may be called only by the chairman of our board of directors, the board of directors, chief executive officer, president or, prior to the threshold date, holders of at least 25% of the combined voting power of outstanding Class A common stock and Class B common stock. After the threshold date, only the chairman of our board of directors, the board of directors, chief executive officer or president may call a special meeting of shareholders.

***Advance Notice Requirements for Shareholder Proposals and Director Nominations***

Our amended and restated bylaws provide that shareholders seeking to bring business before a meeting of shareholders, or to nominate candidates for election as directors at a meeting of shareholders, must provide us with timely written notice of their proposal. Our amended and restated bylaws also specify requirements as to the form and content of a shareholder's notice. These provisions may preclude shareholders from bringing matters before an annual meeting of shareholders or from making nominations for directors at an annual meeting of shareholders.

***Amendment to Our Amended and Restated Bylaws and Amended and Restated Articles of Incorporation***

Our amended and restated articles of incorporation and amended and restated bylaws provide that shareholders can amend or repeal the bylaws only by the affirmative vote of the holders of at least two-thirds of the outstanding voting power of Class A common stock and Class B common stock, voting together as a single group.

Unless approved by a majority of “continuing directors,” as that term is defined in our amended and restated articles of incorporation, specified provisions of the articles of incorporation may not be amended or repealed without the affirmative vote of the holders of at least two-thirds of the outstanding voting power of capital stock entitled to vote on the action, including the following provisions:

- those requiring the affirmative vote of at least two-thirds of the voting power of outstanding Class A common stock and Class B common stock, voting together as a single group, in order for shareholders to amend or repeal our bylaws;
- those dividing our board of directors into three classes;
- those providing that, after the threshold date, directors are removable only for cause;
- those permitting, after the threshold date, only a majority of the members of our board of directors or the sole remaining director to fill vacancies on our board of directors;
- those providing that only our board of directors may change the size of our board of directors;
- those requiring the affirmative vote of the holders of at least two-thirds of the voting power of outstanding Class A common stock and Class B common stock, voting together as a single group, to amend specified provisions of the amended and restated articles of incorporation; and
- those providing that special meetings of shareholders may be called only by the chairman of our board of directors, chief executive officer, president or, prior to the threshold date, holders of at least 25% of the combined voting power of outstanding Class A common stock and Class B common stock.

### ***Washington Law***

Chapter 23B.19 of the Washington Business Corporation Act, with limited exceptions, prohibits a “target corporation” from engaging in specified “significant business transactions” for a period of five years after the share acquisition by an acquiring person, unless (1) the transaction is exempted by RCW 23B.19.030, (2) the significant business transaction or the acquiring person’s purchase of shares was approved by a majority of the members of the target corporation’s board of directors prior to the acquiring person’s share acquisition, or (3) the significant business transaction was both approved by a majority of the members of the target corporation’s board of directors and approved at a shareholder meeting by at least two-thirds of the outstanding voting shares of the target corporation (excluding the acquiring person’s shares or shares over which the acquiring person has voting control) at or subsequent to the acquiring person’s share acquisition. An “acquiring person” is defined as a person or group of persons that beneficially owns voting shares entitled to cast votes comprising 10% or more of the voting power of the target corporation. “Significant business transactions” include, among other transactions:

- mergers, share exchanges or consolidations with, dispositions of assets to, or issuances of stock to or redemptions of stock from, the acquiring person;
- termination of 5% or more of the employees of the target corporation employed in Washington whether at one time or over the five-year period following the share acquisition, while the corporation has an acquiring person and as a result of the acquiring person’s acquisition of 10% or more of the shares;
- allowing the acquiring person to receive any disproportionate benefit as a shareholder; and
- liquidating or dissolving the target corporation.

After the five-year period, certain “significant business transactions” must comply with the “fair price” provisions of the statute or must be approved by a majority of the votes entitled to be counted within each voting group entitled to vote separately on the transaction, other than those of which the acquiring person has beneficial ownership or voting control. A corporation may not “opt out” of this statute.
