Allot Selected by a Leading Satellite Network Operator in Russia

With this additional win, Allot solutions will be deployed by several top Russian satellite service providers, representing approximately 70% of the Russian VSAT market

HOD HASHARON, Israel, June 27, 2017 /PRNewswire/ --

[Allot Communications Ltd.](#) (NASDAQ, TASE: ALLT), a leading provider of security and monetization solutions that enable service providers and enterprises to protect and personalize the digital experience, announced today it was selected by one of Russia's top satellite service providers to optimize network traffic, protect against distributed denial of service (DDoS) attacks, increase revenues, and support regulatory compliance efforts. With this additional deployment of the [Allot Service Gateway](#) multi-service platform, which includes Allot ServiceProtector for DDoS Mitigation, Quota Management and Allot ContentProtector, Allot's customers in Russia represent approximately 70% of the Russian VSAT market in terms of stations.

With Allot Service Gateway, the Satellite communications providers can expect to improve QoE, optimize network infrastructure, increase their revenues and comply with government regulation through:

- 1 **Traffic Management** to optimize TCP connections on each satellite hub, limiting heavy-bandwidth services like P2P and file transfer.
- 1 **Bot Containment** to enable endpoint monitoring for anomalous behavior and the isolation of infected botnets that congested the network through outbound attacks and jeopardized satellite equipment.
- 1 **Quota Management** to facilitate the delivery of an improved subscriber QoE for certain services, even when subscribers are out-of-quota.
- 1 **Content Protection** to allow compliance with government regulations for dynamic filtering of hundreds of thousands of suspected or malicious URLs.
- 1 **DDoS Protection** to detect and mitigate zero day attacks whilst keeping critical network elements and the Satellite network services up and running

"Allot has significant proven experience in enabling communications service providers to extract more value from their networks and in helping them serve their customers better," said Ran Fridman, EVP Global Sales at Allot Communications. "With Allot's multiservice platform, CSPs get a plethora of capabilities vital to achieving the high level of service quality their customers demand and can benefit from improvement in QoE, as well as protection against widespread DDoS attacks."

About Allot Communications

Allot Communications Ltd. (NASDAQ, TASE: ALLT) is a leading provider of security and monetization solutions that enable service providers and enterprises to protect and personalize the digital experience. Allot's flexible and highly scalable service delivery framework leverages the intelligence in data networks enabling enterprises and service providers to get closer to their customers; to safeguard network assets and users; and to accelerate time-to-revenue for value-added services. We employ innovative technology, proven know-how and a collaborative approach to provide the right solution for every network environment. Allot solutions are currently deployed at 5 of the top 10 global mobile operators and in thousands of CSP and enterprise networks worldwide. For more information, please visit <http://www.allot.com>

Safe Harbor Statement

This release contains forward-looking statements, which express the current beliefs and expectations of Company management. Such statements involve a number of known and unknown risks and uncertainties that could cause our future results, performance or achievements to differ significantly from the results, performance or achievements set forth in such forward-looking statements. Important factors that could cause or contribute to such differences include risks relating to: our ability to compete successfully with other companies offering competing technologies; the loss of one or more significant customers; consolidation of, and strategic alliances by, our competitors, government regulation; the timing of completion of key project milestones which impact the timing of our revenue recognition; lower demand for key value-added services; our ability to keep pace with advances in technology and to add new features and value-added services; managing lengthy sales cycles; operational risks associated with large projects; our dependence on third party channel partners for a material

portion of our revenues; and other factors discussed under the heading "Risk Factors" in the Company's annual report on Form 20-F filed with the Securities and Exchange Commission. Forward-looking statements in this release are made pursuant to the safe harbor provisions contained in the Private Securities Litigation Reform Act of 1995. These forward-looking statements are made only as of the date hereof, and the company undertakes no obligation to update or revise the forward-looking statements, whether as a result of new information, future events or otherwise.
