Analogic Receives Esteemed Recognition from Toshiba Medical Systems for Contributions in CT Innovation

Toshiba Honors Analogic for Helping to Achieve 30,000 CT Scanners

PEABODY, Mass., April 15, 2014 (GLOBE NEWSWIRE) -- [Analogic Corporation](#) (Nasdaq:ALOG), enabling the world's medical imaging and aviation security technology, today announced that it has been recognized by Toshiba Medical Systems for its advanced computed tomography (CT) technology used in Toshiba scanners over the past 35 years. Toshiba recently announced that it produced its 30,000th CT system in November 2013.

"We congratulate Toshiba on this significant milestone achievement," said Jim Green, president and CEO of Analogic. "Analogic is proud to provide its advanced CT technology for Toshiba's scanners, as the company continues to improve the quality of life for patients worldwide. We value our partnership and successful history with Toshiba, and we look forward to our ongoing collaboration and future accomplishments."

Analogic has been at the forefront of developments in CT equipment technology from the introduction of the first single-slice CT system in the 1970s, to the multi-slice volumetric CT scanners used today. The company's CT technology is used by medical OEMs worldwide with its subsystems used in approximately half of the world's CT scanners installed in major medical facilities.

Focused on meeting the demands of today's challenging healthcare environment, Analogic's advanced technologies enable their OEM partners to substantially reduce operating expenses, risk and working capital, while accelerating commercialization of their products.
