

## **Analogic Corporation Receives \$10 Million Order for Its EXplosive Assessment Computed Tomography Systems**

PEABODY, Mass., Sep 25, 2008 (BUSINESS WIRE) -- Analogic Corporation (NASDAQ: ALOG) announced today that it has received an order from L-3 Communications Security and Detection Systems, Inc., for EXplosive Assessment Computed Tomography (EXACT<sup>®</sup>) systems valued at approximately \$10 million. The certified eXaminer<sup>®</sup> 3DX Explosives Detection System (EDS), developed in collaboration between Analogic and L-3, incorporates the EXACT subsystem. The eXaminer 3DX has an installed base of more than 800 systems throughout the world for screening checked baggage at airports. The system features advanced, multi-slice CT imaging technology and provides full 3-D images of all the contents of a bag, enabling automatic detection of explosives. This new order is expected to start shipping in December 2008 and continue through March 2009.

In March 2008, Analogic and L-3 announced an agreement awarding L-3 exclusive, worldwide rights to market and service the new eXaminer SX and eXaminer XLB (eXtra Large Bore) security imaging systems developed by Analogic for air carrier checked baggage applications. The eXaminer SX, designed to meet the range of needs required by small, mid-sized and larger airports, is currently being evaluated for certification by the U.S. Transportation Security Administration (TSA).

Jim Green, President and CEO of Analogic, said, "We are pleased to have received this new order from L-3 Communications. Analogic and L-3 have been working together for nearly a decade to provide the TSA and airport security regulators around the world with the most advanced, CT-based imaging equipment available. We look forward to growing our relationship with L-3 with the eXaminer SX. With the eXaminer SX and the well established eXaminer 3DX, L-3 and Analogic will offer the TSA a selection of 3-D continuous-flow security imaging systems to better meet the evolving needs of aviation security."

### About Analogic Corporation

Analogic Corporation is a leading designer and manufacturer of advanced health and security systems and subsystems sold primarily to Original Equipment Manufacturers (OEMs). The Company is recognized worldwide for advancing the state of the art in Automatic Explosives Detection, Computed Tomography (CT), Digital Radiography (DR), Ultrasound, Magnetic Resonance Imaging (MRI), Patient Monitoring, and Advanced Signal Processing. For more information, visit [www.analogic.com](http://www.analogic.com).

### About L-3 Communications

With more than 20,000 systems deployed around the globe, L-3 Security & Detection Systems--a subsidiary of L-3 Communications--is the world's leading supplier of security screening systems used to protect the public, safeguard the flow of commerce and defend critical infrastructure against terrorism and other threats. To learn more about L-3 Security & Detection Systems, please visit [www.L-3com.com/SDS](http://www.L-3com.com/SDS).

Headquartered in New York City, L-3 Communications employs over 64,000 people worldwide and is a prime contractor in aircraft modernization and maintenance, C3ISR (Command, Control, Communications, Intelligence, Surveillance and Reconnaissance) systems and government services. L-3 is also a leading provider of high technology products, subsystems and systems. The company reported 2007 sales of \$14 billion. To learn more about L-3, please visit the company's Web site at [www.L-3com.com](http://www.L-3com.com).
