

Analogic Corporation Receives \$16 Million Order for Its Aviation Security Systems

PEABODY, Mass.--(BUSINESS WIRE)--May. 7, 2009-- Analogic Corporation (NASDAQ: ALOG) announced today that it has received an order from L-3 Security & Detection Systems for Explosives Detection Systems (EDSs) valued at approximately \$16.1 million. The order includes eXaminer[®] 3DX systems as well as eXaminer SX systems, recently certified by the Transportation Security Administration (TSA).

Peter Cempellin, Vice President and General Manager of Analogic's Security Systems Division, said, "This order signifies the strong position the eXaminer 3DX still has in the marketplace. In addition, this is the first order for our new eXaminer SX, which was certified by the TSA in January of this year. The eXaminer SX provides industry leading computed tomography (CT) technology in a smaller footprint, giving smaller airports affordable, advanced explosives detection capability. First commercial shipments, which will begin this June, are destined for airports worldwide."

The adaptable, streamlined eXaminer SX is suitable for airport lobbies and baggage make-up areas and can also be fully integrated with baggage handling systems. The lower cost eXaminer SX provides the same proven detection capabilities as the larger eXaminer 3DX in a lighter, more compact frame. The system is available in three configurations: in-line, partially integrated, and standalone.

Both the eXaminer 3DX and eXaminer SX systems use 3-D Continuous-Flow CT technology and generate high-resolution 3-D color images in real time. The eXaminer systems also enable 360-degree rotational views of the entire bag and its contents, and provide continuous automatic detection of explosives.

About Analogic

Analogic Corporation is a leading designer and manufacturer of advanced health and security systems and subsystems sold primarily to original equipment manufacturers (OEMs). The Company is recognized worldwide for advancing the state of the art in Automatic Explosives Detection, computed tomography (CT), digital radiography (DR), ultrasound, magnetic resonance imaging (MRI), patient monitoring, and advanced signal processing. For more information, visit www.analogic.com.

About L-3 Security & Detection Systems

With a broad range of systems and technology, and an installed base of more than 20,000 systems worldwide, L-3 Security & Detection Systems offers screening technologies for numerous security applications that include: aviation systems for hold-baggage explosives detection, oversized baggage, and checkpoint screening; cargo and air freight screening; port and border inspection; and facility protection. L-3 Security & Detection Systems' customer base includes major airlines, airports, numerous government agencies around the world (including the U.S. Department of Homeland Security, U.S. Federal Protective Service, U.S. Customs and Border Protection, U.S. Department of State, and U.S. Department of Agriculture) and international authorities throughout Europe, the Middle East, Africa, Asia and Latin America. To learn more about L-3 Communications Security & Detection Systems, please visit the company's Web site at www.L-3com.com/SDS.

About L-3 Communications

Headquartered in New York City, L-3 Communications employs approximately 65,000 people worldwide and is a prime contractor in aircraft modernization and maintenance, C³ISR (Command, Control, Communications, Intelligence, Surveillance and Reconnaissance) systems and government services. L-3 is also a leading provider of high technology products, subsystems and systems. The company reported 2008 sales of \$14.9 billion. To learn more about L-3, please visit the company's Web site at www.L-3com.com.
