## **Thorium Power Schedules Conference Call to Provide General Business Update**

MCLEAN, Va.--(BUSINESS WIRE)--Apr. 14, 2009-- **Thorium Power Ltd.(OTCBB: THPW)**, the leading developer of non-proliferative nuclear fuel technology and provider of comprehensive advisory services for emerging nuclear programs, today announced that it will host a conference call on April 16, 2009 at 11:00 AM ET. The company will provide a general business update. The conference call will be led by Seth Grae , Chief Executive Officer, and will include additional members of the senior management team.

The telephone number for the conference call is 201-689-8565. A live webcast of the call will also be available on the company's website, [www.thoriumpower.com](http://www.thoriumpower.com). To listen to the live call online, please visit the site at least 10 minutes early to register, download and install any necessary audio software. A slide presentation that will accompany the teleconference will be posted as a PDF next to the event listing in the Investor section of the Thorium Power website.

The webcast will also be archived on the site, and investors will be able to access a recording of the conference call for one week by calling 201-612-7415, account #286 and ID #319965. The recording will be available two hours after the conference call has concluded.

### **About Thorium Power, Ltd.**

Thorium Power is a pioneering U.S. nuclear energy company based in McLean, VA. The Company develops non-proliferative nuclear fuel technology and provides comprehensive advisory services for emerging nuclear programs based on a philosophy of transparency, non-proliferation, safety and operational excellence. Thorium Power's technologies, which are aimed at both existing and future reactors, include nuclear fuel designs optimized to address key concerns regarding traditional nuclear power, including proliferation of weapons usable nuclear materials and reduction of nuclear waste. The Company maintains a seasoned team with unparalleled experience from the nuclear energy industry, regulatory and government affairs, non-proliferation and diplomacy. It leverages those broad and integrated capabilities by offering consulting and strategic advisory services to commercial entities and governments with a need to establish or expand nuclear industry capabilities and infrastructure. Thorium Power also maintains long-standing relationships with leading Russian nuclear entities, providing expert resources and facilities for its nuclear fuel development activities. The Company seeks and forms partnerships with participants in the global nuclear industry, allowing it to address a wide range of international opportunities.
