## **Datawatch and Hyland Align to Simplify and Expedite Self-Service Data Preparation and Enterprise Content Management**

### **Datawatch Monarch and OnBase by Hyland Users Now Assured Software Compatibility for Improved Agility, Efficiency and Effectiveness**

BEDFORD, Mass. and WESTLAKE, Ohio, Dec. 14, 2016 (GLOBE NEWSWIRE) -- [Datawatch Corporation](#) (NASDAQ-CM:[DWCH](#)) today announced that Hyland, a leading provider of software solutions for managing content, processes and cases, is its newest Technology Alliance Partner. The companies are working closely together to ensure compatibility of Datawatch's [Monarch](#) self-service data preparation solution and OnBase by Hyland, an enterprise information platform.

"Through this partnership, we're not only empowering customers with simplified and expedited data preparation, data analysis and enterprise content management, but we're also alleviating the burden of back-end technology challenges that previously plagued IT personnel and data users," said Ken Tacelli, chief operating officer, Datawatch. "Now, joint customers can focus on managing content and performing analysis that will result in more informed decision-making and improved operational processes."

Datawatch Monarch enables data scientists, data analysts and everyday business users to quickly and easily access, manipulate, enrich and combine disparate data from virtually any source, and then prepare it for analysis in a fraction of the time that it takes using spreadsheets and other manually-intensive measures. Monarch users who are also leveraging OnBase can now reap these same benefits from within the OnBase system — without having to worry about software compatibility.

"It's easy for vendors to work in isolation, but in a very crowded market where technologies overlap and complement each other, collaboration for the customer's benefit is extremely important," said George Angelato, vice president of quality assurance and documentation at Hyland. "Our partnership with Datawatch is illustrative of this belief, and our joint customers will benefit from advanced agility, efficiency and effectiveness, resulting in greater business value."

Any statements contained in this press release that do not describe historical facts may constitute forward-looking statements as that term is defined in the Private Securities Litigation Reform Act of 1995. Any such statements contained herein, including but not limited to those relating to product performance and viability, are based on current expectations, but are subject to a number of risks and uncertainties that may cause actual results to differ materially from expectations. The factors that could cause actual future results to differ materially from current expectations include the following: rapid technological change; Datawatch's dependence on the introduction of new products and product enhancements and possible delays in those introductions; acceptance of new products by the market, competition in the software industry generally, and in the markets for next generation analytics in particular; and Datawatch's dependence on its principal products, proprietary software technology and software licensed from third parties. Further information on factors that could cause actual results to differ from those anticipated is detailed in various publicly-available documents, which include, but are not limited to, filings made by Datawatch from time to time with the Securities and Exchange Commission, including but not limited to, those appearing in the Company's Annual Report on Form 10-K for the year ended September 30, 2015. Any forward-looking statements should be considered in light of those factors.
