Datawatch Partners with Sage to Simplify and Expedite Accounting, HR and Payment System Data Migration and End-user Data Preparation

Datawatch Monarch enables Sage and its partners to streamline data migration and accelerate service offering implementations, while end-user customers benefit from simplified operational processes with self-service data preparation

BEDFORD, Mass., Oct. 11, 2017 (GLOBE NEWSWIRE) -- [Datawatch Corporation](#) (NASDAQ-CM:[DWCH](#)) today at the HR Technology Conference, announced a joint technology partnership with [Sage](#), market leader in cloud accounting software. Through this partnership, Sage validates the Datawatch Monarch self-service data preparation platform as a solution for its accounting, HR, payroll, payments and enterprise service offerings, enabling Sage and its partners to accelerate product implementations, and end customers to simplify data preparation.

Datawatch Monarch enables analysts and business users to overcome traditional data challenges by easily and quickly accessing, manipulating, enriching and combining disparate data from virtually any source (e.g., PDF reports, text files, CSV, JSON), and then quickly preparing it for analysis and reporting — without coding, manual data entry or involvement from IT. Additionally, Datawatch Monarch streamlines and standardizes data formatting and migration for accelerated enterprise software and cloud deployments.

"With Datawatch Monarch, our customers and partners no longer need to struggle with time-intensive and error-prone manual data entry," said Jennifer Warawa, EVP of Partners, Accountants and Alliances at Sage. "Whether managing money or people, businesses now have the power to unlock data from accounting, HR/payroll and other enterprise systems, and then quickly prepare it for analysis, reconciliation, reporting and compliance purposes. This results in more informed decision-making and improved operational processes. And that, along with faster implementation times, enables us to provide a major competitive advantage and better customer experience."

"Regardless of department, every employee must now be able find, extract, analyze and share the data that is vital for them to fulfill their job responsibilities and drive the business forward," said Ken Tacelli, chief operating officer at Datawatch. "Datawatch Monarch gives even novice business users the ability to streamline their accounting and HR processes and access and create trusted datasets for analytics, while upholding data governance. At the same time, implementation service teams gain the ability to quickly and easily manipulate and combine disparate data from virtually any source and prepare it for migration. Sage understands this, and we look forward to helping its partners and customers transform the way they use data and bring value to their companies."

Safe Harbor Statement under the Private Securities Litigation Reform Act of 1995

Any statements contained in this press release that do not describe historical facts may constitute forward-looking statements as that term is defined in the Private Securities Litigation Reform Act of 1995. Any such statements contained herein, including but not limited to those relating to product performance and viability, are based on current expectations, but are subject to a number of risks and uncertainties that may cause actual results to differ materially from expectations. The factors that could cause actual future results to differ materially from current expectations include the following: rapid technological change; Datawatch's dependence on the introduction of new products and product enhancements and possible delays in those introductions; acceptance of new products by the market, competition in the software industry generally, and in the markets for next generation analytics in particular; and Datawatch's dependence on its principal

products, proprietary software technology and software licensed from third parties. Further information on factors that could cause actual results to differ from those anticipated is detailed in various publicly-available documents, which include, but are not limited to, filings made by Datawatch from time to time with the Securities and Exchange Commission, including but not limited to, those appearing in the Company's Annual Report on Form 10-K for the year ended September 30, 2015. Any forward-looking statements should be considered in light of those factors.
