Imagine Software Incorporates Panopticon Dashboards into its Real-Time Portfolio, Risk and Compliance Management Solutions

Partnership gives investment banks, hedge funds, broker dealers, pension funds, asset managers and prime brokers access to a wide range of optimized business intelligence

BEDFORD, Mass., Feb. 07, 2018 (GLOBE NEWSWIRE) -- Datawatch Corporation (NASDAQ-CM:DWCH) and Imagine Software today announced a partnership that enables Imagine to resell the Panopticon visual analytics platform alongside the firm's front-to-back-office portfolio risk and compliance management solutions.

Imagine offers the power of real-time, institutional-grade portfolio and risk management solutions, either fully serviced in the cloud with real-time pricing, security master, corporate actions, and derived market data, or a traditional in-house software deployment. The company's clients include many of the world's leading investment banks, hedge funds, asset managers and other financial services firms engaged in trading strategies and across all asset classes trading.

Datawatch Panopticon's visual analysis software leverages the power of Imagine solutions to enable easier monitoring and analysis of risk and profitability in real-time. In addition, Panopticon's business intelligence dashboards help organize the plethora of data portfolios that risk managers have to navigate through, thus reducing the noise and optimally consolidating the most critical analytics in a readily accessible console.

"Imagine customers use Panopticon to connect to a range of real-time and historical data sources — including message buses, CEP engines, and Big Data repositories — and build custom analytical dashboards in mere minutes. This enables users to respond quickly to market events and make decisions that affect their organization's profitability, compliance and exposure during the trading day, as opposed to waiting for end-of-day or end-of-period reports. That's a tremendous business advantage over depending on the backward-looking, historical information that many financial firms still use to make critical decisions," said Lance Smith, CEO and co-founder of Imagine Software.

Peter Simpson, vice president of visualization strategy at Datawatch, stated: "Imagine has some of the most advanced risk and trading solutions in the world. The combination of their excellent risk analytics and data management functions with the Panopticon visualization technology provides the industry with one of the most powerful platforms available. Imagine is ideal for helping fund managers and other investment professionals make the most of the opportunities available in volatile market conditions."

Safe Harbor Statement under the Private Securities Litigation Reform Act of 1995
Any statements contained in this press release that do not describe historical facts may constitute forward-looking statements as that term is defined in the Private Securities Litigation Reform Act of 1995. Any such statements contained herein, including but not limited to those relating to product performance and viability, are based on current expectations, but are subject to a number of risks and uncertainties that may cause actual results to differ materially from expectations. The factors that could cause actual future results to differ materially from current expectations include the following: rapid technological change; Datawatch's dependence on the introduction of new products and product enhancements and possible delays in those introductions; acceptance of new products by the market, competition in the software industry generally, and in the markets for next generation analytics in particular; and Datawatch's dependence on its principal products, proprietary software technology and software licensed from third parties. Further information on factors that could cause actual results to differ from those anticipated is detailed in various publicly-available documents, which include, but are not limited to, filings made by Datawatch from time to time with the Securities and Exchange Commission, including but not limited to, those appearing in the Company's Annual Report on Form 10-K for the year ended September 30, 2015. Any forward-looking statements should be considered in light of those factors.
