Some of our fastest growing markets are locally regulated.

The conversion of our revenue base to long-term sustainable and valuable revenues is a positive development and in line with our strategy.

Ulrik Bengtsson

MESSAGE FROM THE CEO

“Casino continues to develop well with growth of 23 percent. Total revenue increased by more than 10 percent, compared to the same period previous year, of which most was organic growth. As we indicated before, region Western Europe is back to a healthy growth. The region grew by 15.6 percent compared to the same period previous year.

The combined effect of currency fluctuations had a negative impact on operating income of SEK 19.1 million. In addition, a high proportion of “player-friendly” results in the big football leagues resulted in a lower sportsbook margin than the eight quarter rolling average and thereby lower revenue. The operating income was SEK 240.9 million, corresponding to an operating margin of 21.9 percent.

SHARE OF LOCALLY LICENSED REVENUES INCREASING

Some of our fastest growing markets are locally regulated, and local betting duties were SEK 14.5 million more this quarter than for the same period previous year. The share of locally taxed revenues continues to increase and amounted to 20.3 percent, compared to 13.3 percent in the first quarter 2016. Meanwhile, less revenue from countries with higher margin had a negative impact on earnings during the quarter. We expect that margins will go down slightly as our revenue base transforms, but Betsson has well-balanced operations, and can absorb both temporary declines in revenue and increased costs over time. Local regulations create improved growth opportunities. The conversion of our revenue base to long-term sustainable and valuable revenues is a positive development and in line with our strategy.

The region Central and Eastern Europe and Central Asia (CEECA) is still challenging with strong negative currency impacts on both gross revenue in the Sportsbook and on license revenues related to the associate Realm. The planned migration of Europe-Bet to Techsson was completed in March and the operator now has by far the region’s best mobile casino offer. Mobile gaming is growing strong in Georgia, but from low levels.

The acquisitions of NetPlay TV in the UK and a locally licensed operator in Spain were closed March. The latter will be operated under the brand StarCasino going forward.

The second quarter is normally seasonally weak. The quarter has started with higher revenues than the daily average for the second quarter last year, but lower than the daily average revenue for the first quarter 2017. The underlying activity remains strong.”

Betsson AB's new dividend policy is applicable as of the financial year 2017 and reads: "The Board's ambition for the ordinary distribution to shareholders is, provided a continued attractive capital structure, to distribute up to 50 percent of net earnings, through cash transfer, an automatic redemption process or via repurchase of own shares."

There have been no other significant events during the period.

SIGNIFICANT EVENTS AFTER THE PERIOD

Revenue in the beginning of the second quarter has been higher than the daily average for the same quarter last year, but lower than the daily average for the first quarter 2017. The underlying activity remains strong.

In April, Betsson announced that Abby Rachel Cosgrave has been appointed Vice President Legal for Betsson AB and General Counsel Betsson Malta.

On April 21st, Betsson announced that Kaaren Hilsen has been appointed new CFO and will assume the position no later than November 1st 2017.

There have been no other significant events after the end of the reporting period.

OUTLOOK

The second quarter is normally seasonally weak. The company will continue its planned investments in marketing and product development. Operating expenses in the second quarter 2017 are therefore expected to grow slightly more than 10 percent, including acquired operations, compared to the operating expenses for the first quarter 2017.

In 2017, the acquisition of NetPlay will have effect on revenue, but only have marginal effect on earnings. Betsson has a long-term view on NetPlay and will achieve significant cost synergies and operational improvements over time.

The management expects that revenue from regulated markets will continue to grow. This results in lower margins when the revenue base, in accordance with Betsson's strategy, transforms to a higher share of regulated revenue. However, local regulation creates improved possibilities for continued growth and conversion of our revenues to long-term sustainable and valuable revenues.

MARKET

The entire gaming market, including both offline and online gaming, is worth close to EUR 300 billion, and it is growing by approximately 2 percent per year. Online gaming only constitutes 11 percent of the entire gaming market. Annual growth in Betsson's core markets in Europe is expected to be 8.5 percent during the years 2017-2021. (Data source: H2 Gambling Capital.)

The growth is driven by higher e-commerce in general, as well as parallel usage of several screens such as a mobile phone, computer and tablet. Customers also expect to have games easily accessible when and where they want.

Another important driving force is that an increasing number of European countries are introducing local regulations for online gaming whereby gaming companies can apply for a local license and thus pay local gaming tax. The license gives gaming companies the chance to compete on equal terms and to gain access to more effective marketing channels and payment solutions. The markets that have introduced local regulations have also experienced a substantial growth increase in the years following regulation. Local regulations entail increased demands, and benefit operators that have a scalable, proprietary platform. This is resulting in increased consolidation in the locally regulated markets, which creates acquisition opportunities for Betsson.

8.5%

Estimated CAGR on Betsson's core markets in Europe 2017-2021

On March 31st, the inquiry (“Spellicensutredningen”) presented its report regarding a new regulation of the Swedish gambling market. The inquiry suggests that licenses for online sports betting and casino should be introduced and they suggest a tax level of 18 percent of gross gaming revenue. Betsson estimates that a new regulation in Sweden could be implemented in the first quarter 2019, at the earliest.

PRODUCTS

The gaming sites operate on an in-house developed platform, which is the core of the offer and the customer experience. It processes and hosts payments, customer information, accounts, customer transactions and games. The games are mainly casino and sportsbook, but the offer also includes poker, scratch cards, bingo and other games. First class customer experiences are crucial and Betsson continuously invests in innovation and technology to reinforce its leading position.

Betsson's Casino comprises 1,902 (1,045) different games, of which 1,446 (353) are available on mobile devices. During the first quarter, Betsson's sports book was expanded to include also betting on snooker and additional live markets.

ACQUISITIONS

Premier Casino

During the first quarter, Betsson has entered the Spanish market by acquiring the locally licensed online gaming operator Premier Casino. Premier Casino is a pure-play casino operator, but also holds General licenses for sports betting and other games online. The operator has 260,000 registered customers.

The acquisition has no material impact on Betsson's short-term financials, but enables long-term profitable growth in the Spanish market. Betsson will going forward operate the business under the brand StarCasino (starcasino.es) in Spain.

The purchase price payable in cash is EUR 3.0 million and the acquisition was closed in March 2017

NetPlay

In February, Betsson made a public offer for the British gaming operator NetPlay TV plc ("NetPlay"), the offer was accepted by the required majority of shareholders and subsequently Betsson acquired all shares in NetPlay at the end of March.

The acquisition strengthened Betsson's position in the UK, which is the world's largest locally regulated gaming market. NetPlay operates three brands, Jackpot247, Supercasino and Vernons, using mainly third party systems for backend and content. Betsson has a long-term view on NetPlay and will achieve significant cost synergies and operational improvements over time.

The purchase consideration was GBP 26.4 million. For the six months ending 30 June 2016, NetPlay reported net revenue of GBP 14.7 million and adjusted EBITDA of GBP 1.7 million. Cash and cash equivalents, net of client balances, amounted to GBP 7.5 million at 30 June 2016.

Accounting implications

The two acquisitions' balance sheets are consolidated by end of the first quarter. Excluding acquisition related costs, only Premier Casino is included in the consolidated income statement. NetPlay's income statement will be consolidated as of April 1st 2017. Goodwill amounting to SEK 159.9 million is attributable to expected cost and revenue synergies. Goodwill is not expected to be tax deductible.

APPENDIX

ACCOUNTING PRINCIPLES

Betsson complies with IFRS standards and interpretations (IFRIC) as approved by the EU. This Interim Report has been prepared in accordance with IAS 34, Interim Financial Reporting. The Parent Company's financial statements have been prepared in accordance with RFR 2.

The accounting principles applied are consistent with those presented in the Annual Report for 2015. Detailed information about the Group's accounting and valuation principles can be found in the Annual Report for 2015 (Note 2), which is available on www.betssonab.com or at the Company's head office.

This interim report refers to certain key performance indicators which Betsson and others use evaluating the performance of Betsson, KPI's which are not defined according to IFRS. These figures give management and investors important information to fully analyse the Betsson business and trends. These KPI's are not meant to replace but to complement those KPI's which are defined in IFRS.

RISK

In the majority of national markets, law regulates gambling and all such operations, in principle, require permits. Betsson operates its businesses under gaming licenses in Malta, as well as in Denmark, Estonia, Georgia, Spain, Germany, Ireland, Italy, Latvia, Lithuania and the UK. Political decisions, new interpretations of laws and new regulations can significantly affect Betsson's earnings and financial position since operations are subject to licenses.

Pressure continues to be put on EU countries to adapt their national legislation to comply with applicable EU law, and a number of countries have announced that they are working on new legislation in line with EU requirements. It is still unclear when such new legislation will be introduced in Betsson's major markets, but when this does take place, Betsson will have more opportunities for marketing and market presence. Furthermore it is unclear if there will be requirements, in relation to receiving a license or in general at the time of regulating or re-regulating of markets, demanding the settlement of any form of historic obligation and also the size of any such obligation.

Since 2010, Norway has implemented a prohibition against the execution of payments for gaming arranged outside Norway. This negatively affects, amongst others banks, as providing redemption services in conjunction with the payment of gaming via credit, and payment cards with foreign gaming companies are prohibited. Betsson's assessment is that this legislation is in conflict with EU law.

Sweden has taken a step towards liberalisation and in the official report on the re-regulation of the gaming market a path for re-regulation has been proposed.

The proposed gaming legislation in the Netherlands is currently being handled by the Senate prior to final voting. In light of the process above, it is expected to be possible to obtain licenses at the beginning of 2019 at the earliest.

In 2007, Turkey introduced legislation against internet gaming that did not fall within the local regulatory framework and it reinforced parts of this legislation in 2013. A Betsson associate, that has its own gaming license in Malta and is owned and managed separately, accepts that Turkish gamblers bet under this license. Pursuant to the legal situation described above, income originating from Turkey can be regarded to comprise a higher operational risk than income from other markets

Seasonal variations can significantly affect the Company's operations during periods of lower gaming activity and fluctuating results in different sporting events. Economic fluctuations have not affected the operations to any significant degree. Betsson is an international company with operations that are constantly exposed to various currencies. Changes in exchange rates affect Group income.

For a more detailed description of the risks mentioned above and other risks and uncertainties, please refer to the Annual Report for 2016.
