ClearOne's Media Collaboration Solution Gains Traction in Creating Powerful, Integrated Applications for Any Group Activity

Traditional Video Conferencing, Cloud Web Conferencing, and Multi-User Wireless Presentation Merge in One Converged Solution Featuring a Consistent User Interface and Experience

SALT LAKE CITY, Feb. 1, 2017 /PRNewswire/ -- ClearOne [NASDAQ: CLRO], the leading global provider of audio and visual communication solutions, continues to spearhead the conferencing technology migration that combines video conferencing, collaboration, and presentation solutions in one converged solution called "media collaboration."

"Media Collaboration" represents the confluence of powerful conferencing tools that together provide a range of integrated applications for any group activity," said Bala Krishnamoorthy, ClearOne's Senior Director of Product Line Management for MC & UC Voice. "That includes team collaboration, meetings, lectures, presentations, training, corporate communications, product launches, and other multiuse conference room options."

ClearOne's comprehensive, COLLABORATE[®] Pro series covers the full gamut of media collaboration solutions, from integrated traditional video conferencing, cloud video, and web conferencing to audio conferencing, multi-user wireless presentation, recording, and streaming. These options deliver a host of features that fit any conference space size.

"ClearOne's history is one of creating technology beyond the power curve," Krishnamoorthy said. "It originates with our intimate understanding of clients' media requirements for their conference rooms, huddle spaces, desktops, or mobile. That insight enables us to design the multi-purpose, media collaboration solutions which replace the traditional single-purpose video conferencing products. The beauty of our solutions," he added, "is that products which share the same architecture optimize simplicity, connectivity, reliability, performance, and price."

ClearOne's award-winning Spontania[™] delivers scalable video conferencing of unmatched flexibility. Spontania merges cloud video with web conferencing to connect a pair, a dozen, or even hundreds of users in a single meeting room across multiple devices — whether they be mobile, PC, telephones, or room devices — deployed on-premises or as a cloud service.

ClearOne's multi-user wireless presentation, COLLABORATE[®] Share, enables up to six users to share presentations wirelessly, while in a call or during local in-room meetings. The entire experience integrates smoothly and consistently using a simple user interface. The solution can also conveniently — seamlessly — switch between video conferencing and local presentation.

Let ClearOne Open Your World to New Solutions at ISE17, Feb. 7-10, Stand 3-C98.
