ClearOne Awarded New Patent for Spatial Audio Conferencing by the U.S. Patent and Trademark Office

SALT LAKE CITY, Dec. 14, 2017 /PRNewswire/ -- ClearOne (NASDAQ: CLRO), a global provider of audio and visual communication solutions, announced today that it has been awarded a new patent relating to ClearOne's spatial audio rendering technology for conferencing.

The U.S. Patent and Trademark Office ("USPTO") issued United States Patent number 9,843,455 to ClearOne. This patent, entitled "Conferencing System with Spatial Rendering of Audio Data," relates to conferencing systems that, among other things, transmit and receive audio with spatial information, which improves intelligibility and reduces listener fatigue in a conference.

This new patent is part of ClearOne's growing patent portfolio that currently includes over 100 patents and pending patent applications covering multiple new technologies in the fields of audio and video processing, audio and video streaming, and innovative communication technologies. ClearOne's patents reinforce and protect its market leadership position, and demonstrate ClearOne's ongoing ability to develop cutting-edge products and technologies.

About ClearOne

ClearOne is a global company that designs, develops and sells conferencing, collaboration, streaming & signage solutions for voice and visual communications. The performance and simplicity of its advanced, comprehensive solutions offer unprecedented levels of functionality, reliability, and scalability.
