## Esperion Therapeutics to Present at the Stifel 2016 Healthcare Conference

Presentation and Webcast on Wednesday, November 16, 2016 at 3:00 p.m. Eastern Time

ANN ARBOR, Mich., Nov. 09, 2016 (GLOBE NEWSWIRE) -- Esperion Therapeutics, Inc. (NASDAQ:ESPR), a pharmaceutical company focused on developing and commercializing oral therapies for the treatment of patients with elevated low density lipoprotein cholesterol (LDL-C), today announced that president and chief executive officer, Tim M. Mayleben, will present at the Stifel 2016 Healthcare Conference in New York City on Wednesday, November 16, 2016 at 3:00 p.m. Eastern Time.

A live, listen-only webcast of the presentation can be accessed on the investor relations section of the Esperion website at [www.esperion.com](http://www.esperion.com). A webcast replay of the presentation will be archived on the Company's website for 90 days following the event.

### About Bempedoic Acid

Bempedoic acid is a first-in-class ACL inhibitor that reduces cholesterol biosynthesis and lowers elevated levels of LDL-C by up-regulating the LDL receptor, but with reduced potential for muscle-related side effects. Completed Phase 1 and 2 studies in more than 800 patients treated with bempedoic acid have produced clinically relevant LDL-C lowering results of up to 30 percent as monotherapy, approximately 50 percent in combination with ezetimibe, and an incremental 20 to 22 percent when added to stable statin therapy.

### Esperion's Commitment to Patients with Hypercholesterolemia

In the United States, 78 million people, or more than 20 percent of the population, have elevated LDL-C; an additional 73 million people in Europe and 30 million people in Japan also live with elevated LDL-C. Esperion's mission is to provide patients and physicians with a new oral therapy to significantly reduce elevated levels of LDL-C in patients inadequately treated with current lipid-modifying therapies. Esperion-discovered and developed, bempedoic acid is an oral LDL-C lowering therapy in Phase 3 development. The Company plans to develop bempedoic acid as a monotherapy as well as a fixed dose combination (FDC) with ezetimibe, with a particular focus on patients inadequately treated with current lipid-modifying therapies. It is estimated that approximately 5-20 percent of patients who are prescribed statins are only able to tolerate less than the lowest approved daily starting dose of their statin ("statin intolerant").

### About Esperion Therapeutics

Esperion Therapeutics, Inc. is a pharmaceutical company focused on developing and commercializing oral therapies for the treatment of patients with elevated LDL-C. Through scientific and clinical excellence, and a deep understanding of cholesterol biology, the team at Esperion is committed to developing new LDL-C lowering therapies that will make a substantial impact on reducing global cardiovascular disease; the leading cause of death around the world. Bempedoic acid, the Company's lead product candidate, significantly reduces elevated LDL-C levels in patients with hypercholesterolemia, including patients inadequately treated with current lipid-modifying therapies.
