Marrone Bio Innovations to Hold Bioinsecticides Webinar

"Bioinsecticides: A Revolution in Insect Management"

DAVIS, Calif., Feb. 10, 2017 (GLOBE NEWSWIRE) -- Marrone Bio Innovations, Inc. (MBI), (NASDAQ:MBII), a leading global provider of bio-based pest management and plant health products for the agriculture and water treatment markets, in conjunction with Western Farm Press, is conducting a webinar on bioinsecticides on **February 23, 2017, 11am PT/1pm CT/2pm ET**.

As biopesticides have been used and studied over time, scientists and growers better understand how to deploy and use these effective microorganism-based products. Consumers are increasingly demanding softer solutions on the farm and biopesticides have emerged as a solution as well as a partner for modern chemistry in resistance management.

Dr. Pam Marrone, founder of AgraQuest & Marrone Bio Innovations, will talk about the evolution of biopesticides from their introduction decades ago to effective solutions that meet the standards of modern agriculture. Join Dr. Marrone in exploring the world of bioinsecticides, and learn how microorganisms such as bacteria, can be effective solutions for pest management, while demonstrating a lower environmental impact, often increasing yield and quality compared to synthetic-only programs.

You can register for the webinar here: [REGISTER](#)

Not able to attend? [Register anyway!](#) We'll send you a link to the webinar archive so you can view it at your own convenience.

About Marrone Bio Innovations

Marrone Bio Innovations, Inc. (NASDAQ:MBII) strives to lead the movement to a more sustainable world through the discovery, development and promotion of biological products for pest management and plant health. Our effective and environmentally responsible solutions help customers operate more sustainably while controlling pests, improving plant health, and increasing crop yields. We have four products for agriculture on the market (Regalia[®], Grandevo[®], Venerate[®] and Majestene[®]), and also distribute Bio-tam 2.0[®] for Isagro USA in the western U.S. We market Zequanox[®] for invasive mussels for water markets. We also have a proprietary discovery process, a rapid development platform, and a robust pipeline of pest management and plant health product candidates. At Marrone Bio Innovations, we are dedicated to pioneering better biopesticides that support a better tomorrow for users around the globe. For more information, please visit www.marronebio.com.
