EyeLock Receives Lenel Factory Certification Under Lenel's OpenAccess Alliance Program (OAAP)

EyeLock's nano NXT® Iris Biometric Reader Interfaces with Lenel's OnGuard® Security Management System

NEW YORK, May 11, 2017 /PRNewswire/ -- EyeLock LLC, a leader of iris-based identity authentication solutions, today announced that it has received Lenel factory certification and joined the Lenel OpenAccess Alliance Program (OAAP). The EyeLock Identity Suite interfaces with the OnGuard system, making it possible to enable and significantly accelerate the onboarding of iris-based identity authentication technology. "EyeLock has completed required factory testing at Lenel to validate the functionality of its interface to OnGuard," said Zach Roth, OAAP Product Manager at Lenel. "In addition to speeding up the onboarding process by eliminating dual-data entry for our mutual customers, this interface enables intelligent onboard memory management within the iris readers. Utilizing an individual's access control permissions, the system is able to determine and distribute iris templates only to doors which are necessary. We look forward to EyeLock's continued involvement in the Lenel OpenAccess Alliance Program." "The Lenel factory certification is an important step forward for simplifying the implementation of iris biometrics across access control environments and helps accelerate the worldwide adoption of our proprietary biometric technology," said Anthony Antolino, Chief Marketing and Business Development Officer at EyeLock. EyeLock's proprietary technology provides an unprecedented level of convenience, accuracy, and security, making it the most proven way to authenticate identity aside from DNA. EyeLock is one of the only biometric companies in the world to own and control the entire software and algorithm stack, providing dual-eye authentication, an unmatched security architecture, and anti-spoofing technology. About EyeLock EyeLock LLC, a majority owned subsidiary of Voxx International Corporation (NASDAQ: VOXX), is an acknowledged leader in advanced iris authentication for the Internet of Things (IoT), providing the highest level of security with EyeLock ID™ technology. Iris authentication is highly secure because no two irises are alike and the iris is the most accurate human identifier other than DNA. The company's significant IP portfolio, including more than 100 patents and patents pending, and proprietary technology enables the convenient and secure authentication of individuals across physical and logical environments. EyeLock's solutions have been integrated and embedded across consumer and enterprise products and platforms, eliminating the need for PINs and passwords. Corporations across the Fortune 500 recognize the level of security EyeLock provides due in part to its extremely low false acceptance rate, ease of use, and scalability. As a sponsor member of the FIDO (Fast IDentity Online) Alliance, a non-profit organization dedicated to creating a safer and more secure digital presence for consumers, EyeLock is dedicated to advancing digital privacy and next generation security.
