FireEye Receives FedRAMP Certification for Government Email Threat Prevention Service

Certification Designed to Save U.S. Government Customers Time and Money in Securing Their Move to the Cloud

MILPITAS, Calif.--(BUSINESS WIRE)-- FireEye, Inc. (NASDAQ: FEYE), the intelligence-led security company, today announced that FireEye **Government Email Threat Prevention™ (ETP™)** Service, which was granted an Authorization to Operate (ATO) from the **U.S. Department of the Interior** (DOI), has received a **Federal Risk and Authorization Management Program (FedRAMP^{SM})** Authorization. FireEye Government ETP is a comprehensive **cloud email security** offering that provides email security service to deliver advanced threat protection for U.S. federal agencies moving to the cloud.

Government organizations are migrating to a cloud-based deployment model for information technology and security and many have mandates to adopt cloud services to fulfill requirements for secure, reliable, and cost-effective solutions. Advanced threat protection delivered from the cloud allows the agencies to achieve their cloud mandates while reducing risk.

"As our government customers migrate to the cloud, we are excited to meet their security, performance and cost needs with the advanced threat protection of our FedRAMP-certified Government ETP offering," said Pat Sheridan, VP, federal sales, FireEye. "This certification is proof of our commitment to innovating for our customers."

FireEye ETP now enables federal, state and local government agencies and public education entities to save time and money as they look to add cloud-based email security for advanced threat protection. Agencies can now quickly leverage the DOI authorization package within FedRAMP in making their own risk-based determination to issue their own ATOs, and quickly begin using FireEye Government ETP.

Pricing and Availability

- **FireEye Government ETP is available today** as a subscription, which ensures customers continue to benefit from intelligence-led feature updates at no additional cost.
- **For existing FireEye Email Security appliance customers**, upgrade programs are available.
