## **FireEye Delivers End-to-End Protection With Next-Generation Endpoint Security and Managed Defense**

Based on more than one million hours of frontline expertise responding to cyber attacks, FireEye offers a comprehensive endpoint and managed defense solution to simplify how organizations stay secure.

MILPITAS, Calif.--(BUSINESS WIRE)-- FireEye, Inc. (NASDAQ: FEYE), the intelligence-led security company, delivers the industry's only complete endpoint and managed detection and response service backed by the FireEye innovation cycle.

"Organizations are burdened by complexity, under-utilized technology and a shortage of people to staff their security programs," said Grady Summers, executive vice president and chief technology officer at FireEye. "With our combined endpoint security solution and Managed Defense, FireEye offers a simple way for customers to increase the effectiveness of their security programs and protect their organizations with sophisticated defensive capabilities like managed threat hunting."

### **Better Together: FireEye® Endpoint Security and Managed Defense™**

Every day, FireEye is on the forefront of cyber attacks, conducting investigations, gathering intelligence and tracking adversaries. FireEye product teams build solutions based on this knowledge, and frontline experts further refine these solutions in real-world situations. Through this unique, continuous innovation cycle, FireEye Endpoint Security and Managed Defense come together to meet the challenges of creating a cyber defense solution that functions as a seamless, on-demand extension of a customer's security operations.

### **Next Generation Endpoint Security**

FireEye Endpoint Security combines endpoint protection technologies (EPP) with endpoint detection and response (EDR) capabilities to provide one, unified next-generation endpoint security solution. By combining signature-based prevention to filter out threats from common malware, behavioral based analytics to detect and block advanced threats, and deep investigation tools to find and remediate threats that lie hidden, customers gain an unparalleled level of endpoint defense.

FireEye Endpoint Security includes the FireEye Helix™ security operations platform, which integrates security tools and applies threat intelligence, automation and case management to help organizations take control of incidents from alert to fix.

### **An Evolved Managed Defense**

FireEye Managed Defense, formally known as FireEye as a Service™, is a managed detection and response (MDR) service that incorporates unique FireEye threat intelligence and insights from the frontlines to reveal covert attacker behavior. Analysts continually test and refine hunting scenarios, creating extensive dossiers detailing attacker targets, motivations, behavior and tactics.

Through an iterative process of discovery and development, analysts transform hypotheses into protection methodologies. This combination of industry-recognized frontline expertise and refined methodologies, applied systematically, provides customers visibility into emerging attack trends and reveals hidden threat activities within their environment.

FireEye Endpoint Security and FireEye Managed Defense are available from authorized FireEye partners worldwide. For more information please visit [www.fireeye.com](http://www.fireeye.com).

### **About FireEye, Inc.**

FireEye is the intelligence-led security company. Working as a seamless, scalable extension of customer security operations, FireEye offers a single platform that blends innovative security technologies, nation-state grade threat intelligence, and world-renowned Mandiant® consulting. With this approach, FireEye eliminates the complexity and burden of cyber security for organizations struggling to prepare for, prevent, and respond to cyber attacks. FireEye has over 6,600 customers across 67 countries, including more than 45 percent of the Forbes Global 2000.
