About Aerie Pharmaceuticals, Inc.

Aerie is a clinical-stage pharmaceutical company focused on the discovery, development and commercialization of first-in-class therapies for the treatment of patients with glaucoma and other diseases of the eye. Aerie's two lead product candidates are once-daily intraocular pressure-lowering therapies with novel mechanisms of action to treat patients with glaucoma or ocular hypertension. The NDA for RhopressaTM (netarsudil ophthalmic solution) 0.02% was submitted to the FDA in February 2017. Aerie's second product candidate, RoclatanTM (netarsudil/latanoprost ophthalmic solution) 0.02%/0.005%, which is a fixed dose combination of RhopressaTM and widely prescribed PGA latanoprost, currently has two Phase 3 registration trials underway, named Mercury 1 and Mercury 2. If these trials are successful, a RoclatanTM NDA submission is expected to take place in late 2017 or early 2018. Aerie is also focused on the development of additional product candidates and technologies in ophthalmology.
