Media Alert: Varonis Talks Insider Threats, Security, and Automation at Gartner Security and Risk Management Summit 2017

Breakout session to explore cybersecurity preparedness and how to combat risks associated with digitizing sensitive information

NEW YORK, June 12, 2017 (GLOBE NEWSWIRE) -- Varonis Systems, Inc. (NASDAQ:VRNS), a leading provider of software solutions that protect data from insider threats and cyberattacks, invites Gartner Security and Risk Management Summit attendees to learn more about the Varonis Data Security Platform, demo their latest security software solutions, and meet company executives at the event.

Varonis executives will discuss this transition, demonstrate how the Varonis Data Security Platform stops insider threats and cyberattacks, and showcase their new Automation Engine that takes the busy work out of security strategy at **booth #539**.

Conference attendees can also attend Varonis' breakout session featuring John Carlin, former Assistant Attorney General for the DOJ, who led investigations into high profile breaches and was responsible for protecting the nation against terrorism, espionage, and cyber and other national security threats.

Wednesday, June 14, 2017
3:15 - 4:00 PM: Lessons from the DOJ - Where Cybersecurity Preparedness Falls Short

News headlines offer daily reminders that industry remains unprepared for the privacy and security risks posed by digitizing our most valuable and sensitive information. In this session, John P. Carlin will provide his inside perspective on the lessons learned from investigating recent cyber incidents and practical takeaways for meeting the needs of C-Suite executives drowning in warnings about the increasing threats.

- Location
  - Gartner Security & Risk Management Summit
    Gaylord National Resort & Convention Center - Maryland C, Ballroom Level
    201 Waterfront St.
    National Harbor, MD

- Speakers: John Carlin, Former Assistant Attorney General, U.S. Department of Justice, National Security Division

About Varonis
Varonis is a leading provider of software solutions that protect data from insider threats and cyberattacks. Through an innovative software platform, Varonis allows organizations to analyze, secure, manage, and migrate their volumes of unstructured data. Varonis specializes in file and email systems that store valuable spreadsheets, word processing documents, presentations, audio and video files, emails and text. This rapidly growing data often contains an enterprise's financial information, product plans, strategic initiatives, intellectual property and confidential employee, customer or patient records. IT and business personnel deploy Varonis software for a variety of use cases, including data security, governance and compliance, user behavior analytics, archiving, search and file synchronization and sharing. With offices and partners worldwide, Varonis had more than 5,500 customers as of March 31, 2017, spanning leading firms in financial services, healthcare, public, industrial, insurance, energy and utilities, media and entertainment, consumer and retail, technology and education sectors.
