Media Alert: Experts from Varonis and Deloitte Discuss Identity-Centric GDPR Tactics at Gartner Identity and Access Management Summit 2017

Session to explore what GDPR means for data management and the importance of reducing data blind spots

NEW YORK, Nov. 27, 2017 (GLOBE NEWSWIRE) -- Varonis Systems, Inc. (NASDAQ:VRNS), a leading provider of software solutions that protect data from insider threats and cyberattacks, invites Gartner Identity and Access Management Summit attendees to join a session with Varonis and Deloitte Cyber Risk Services experts exploring the role and importance of identity-based data access in preparing for the upcoming General Data Protection Regulation (GDPR).

Session Information
SESSION: What's Everyone Looking At? The Role of Identity in GDPR
WHEN: Tuesday, Nov. 28, 2017, 3:45 - 4:30 PM
WHERE: Emperors Ballroom, Emperors Level, Caesars Palace, Las Vegas, Nevada
OVERVIEW: Under GDPR, there are steep penalties for not protecting EU citizen data -- that means understanding where it resides, who has access, who is responsible, and more. Join experts from Deloitte and Varonis to learn how companies are tackling GDPR by strengthening the ties between IAM and their data blind spots.
SPEAKERS: Patrick O'Dea, Managing Director (Deloitte Cyber Risk Services), Rob Sobers, Director (Varonis), David Gibson, CMO (Varonis).

MEET WITH VARONIS: In addition to the session, conference attendees are invited to visit Varonis in booth #413 to learn more about the Varonis Data Security Platform, demo the latest security technology, and discuss how to gain control of their sensitive information and restrict access on a need-to-know basis.

Visit our blog and join the conversation on Facebook, Twitter, LinkedIn, YouTube and our Inside-Out Security podcast.

About the Gartner Identity & Access Management Summit
Gartner Identity & Access Management Summit 2017 will discuss how to tackle complex issues and generate new ideas to reimagine approaches to IAM for success in the digital age. Gartner analysts will present the latest tactics and best practices across IAM fundamentals, and look ahead at analytics-driven automation and advances in consumer engagement platforms.

About Varonis
Varonis is a leading provider of software solutions that protect data from insider threats and cyberattacks. Through its innovative Data Security Platform, Varonis allows organizations to analyze, secure, manage, and migrate their volumes of unstructured data. Varonis specializes in file and email systems that store valuable spreadsheets, word processing documents, presentations, audio and video files, emails, and text. This rapidly growing data often contains an enterprise's financial information, product plans, strategic initiatives, intellectual property, and confidential employee, customer or patient records. IT and business personnel deploy Varonis software for a variety of use cases, including data security, governance and compliance, user behavior analytics, archiving, search, and file synchronization and sharing. With offices and partners worldwide, Varonis had approximately 5,950 customers as of September 30, 2017, spanning leading firms in financial services, healthcare, public, industrial, insurance, energy and utilities, media and entertainment, consumer and retail, technology and education sectors.
