

Southern California Chapter

ANNUAL MEETING - THURSDAY, MAY 31

Responding to Investor Interest in ESG Disclosure

Join us for a timely discussion on how companies and their investors are addressing ESG disclosure trends, best practices and proxy advisory firm influences. **Granville Martin** from the Society's national office will lead an interactive panel with representatives from **Glass Lewis** and **SASB** (Sustainability Accounting Standards Board). The panelists will provide company and investor perspectives on how ESG information is used by investors, company expectations and experience with SASB standards, and how disclosure best practices can help companies communicate with their investors while effectively managing risk. This convening is made possible by a grant from Ceres and the Moore Foundation and is part of the Society's E&S Working Group workstream. The Chapter would like to thank **EQ Shareowner Services** for sponsoring the event. We hope you will join us.
