

Event Sponsor

Whether you work for a large, multi-national publicly traded company, a small private company, an academic institution or a government agency, stakeholders are increasingly demanding disclosure of your organization's environmental, social and governance (ESG) performance information.

The growing interest in ESG information has resulted in a burgeoning group of entities that collect, evaluate and disseminate your ESG data with or without your involvement. Organizations need to prioritize and respond to the myriad of requests, as well as ensure data accuracy and transparency.

Come hear from a panel of experts who will provide an overview of the growing trends in this field, present the strategic business case for greater ESG disclosure, and demonstrate how influential stakeholders are using such information.

Come hear from a panel of experts on this topic:

Thursday, January 19, 2017
