Genocea to Present at Cantor Fitzgerald Healthcare Conference

CAMBRIDGE, Mass., Sept. 20, 2017 (GLOBE NEWSWIRE) -- Genocea Biosciences, Inc. (NASDAQ:GNCA), a biopharmaceutical company developing novel vaccines and immunotherapies targeting T cell antigens, today announced that Chip Clark, president and chief executive officer, will present a company overview at the Cantor Fitzgerald Healthcare Conference on Wednesday, September 27, 2017 at 10:20 a.m. ET in New York City.

A live webcast of the presentations can be accessed by visiting the "Events and Presentations" tab of the investor relations section of the Genocea website at <http://ir.genocea.com>. A replay of the webcasts will be archived for 30 days following the presentation.

About Genocea Biosciences, Inc.

Genocea is harnessing the power of T cell immunity to develop life-changing vaccines and immunotherapies. While traditional immunotherapy discovery methods have largely used predictive methods to propose T cell targets, or antigens, Genocea has successfully developed ATLAS™, its proprietary technology platform, to identify clinically relevant antigens of T cells based on actual human immune responses. Genocea used ATLAS to identify the antigens in its lead clinical candidate, GEN-003, an investigational immunotherapy to treat genital herpes, and is currently using ATLAS in immunoncology applications to develop neoantigen cancer vaccines (with an IND filing expected by the end of 2017), general cancer vaccines and a vaccine targeting cancers caused by Epstein-Barr Virus.
