### About Adamas Pharmaceuticals, Inc.

Adamas develops new medicines to improve the daily lives of those affected by chronic neurologic disorders, including Parkinson's disease, multiple sclerosis, epilepsy and Alzheimer's disease. Adamas has pioneered a platform to develop medicines, called chrono-synchronous therapies, for chronic neurologic disorders based on an understanding of the time-dependent biologic processes responsible for disease activity and drug response to potentially achieve symptomatic relief without tolerability issues. The company's most advanced product candidate, ADS-5102, is in development for levodopa-induced dyskinesia (LID) in patients with Parkinson's disease and walking impairment. An NDA supporting ADS-5102 for the treatment of LID in patients with Parkinson's disease is under review by the FDA, with a PDUFA date of August 24, 2017. Adamas is exploring other indications for ADS-5102 for further development. Adamas is also investigating ADS-4101 for the treatment of partial onset seizures in patients with epilepsy. Additionally, Adamas' licensed assets, NAMENDA XR<sup>®</sup> and NAMZARIC<sup>®</sup>, are currently marketed by Allergan, and Adamas is eligible to receive royalties on sales of these medicines beginning in June 2018 and May 2020, respectively. For more information, please visit [www.adamaspharma.com](http://www.adamaspharma.com).

NAMENDA XR<sup>®</sup> and NAMZARIC<sup>®</sup> are trademarks of Merz Pharma GmbH & Co. KGaA.
