About Adamas Pharmaceuticals, Inc.

At Adamas, we believe in the power and the promise of medicines derived from a deep understanding of time-dependent biology. Our expertise lies in uncovering and mapping the relationship between disease and drug activity timing patterns. From there, we strive to create medicines with therapeutic profiles that match the pattern of disease to drive a more significant and durable clinical effect. This unique understanding of time-dependent biological processes informs our every innovation, targeting advancement in treatment of chronic neurologic disorders. Our proprietary portfolio includes ADS-5102, a high-dose amantadine therapy taken once-daily at bedtime, in development for the treatment of levodopa-induced dyskinesia in people with Parkinson's disease, and ADS-4101, a high-dose lacosamide therapy taken once-daily at bedtime, in Phase 1 clinical development for the treatment of partial onset seizures in people with epilepsy. The New Drug Application for ADS-5102 is under review by the U.S. Food and Drug Administration with a PDUFA date of August 24, 2017.

Additionally, Adamas' licensed assets are currently marketed by Allergan under the brand names NAMENDA XR[®] and NAMZARIC[®], and Adamas is eligible to receive royalties on sales of these medicines beginning in June 2018 and May 2020, respectively.
